DARWIN,

27 FD. BTY. EXERCISE : 17-19 OCT. 41.

1. The exercise followed the course of the narrative prepared in advance except that supplies were sent to troops in daylight.

2. During phase IV between 0600 and 1800 on 18 Oct. each troop occupied four positions.

3. At the end of phase IV a barrage was fired at dawn on 19 Oct.

4. Every effort was made to ensure the exercise was carried out under as realistic conditions as possible with the result that personnel worked very hard in hot weather and with little sleep.

5. The following points were noted:-

   (a) All officers need more experience in travelling over all routes in the area. The available map is of little use.

   (b) Without field rations it is impossible to carry out effective exercises. Sausages went bad on both days despite all precautions and cooks worked practically unceasingly without sleep.

   (c) The passing of vital information is handicapped by lack of good communications. A full establishment of M/C's and some trunk signal lines laid in advance are essential in this country.

   (d) The separation of the Command Post into Fighting and Admin. H.Q. is a great success. C.P.O. had no amn. or supply worries at all. The use of procedure in messages by troop officers is not good.

   (e) A cable layer was rather badly damaged at 1430 on 18 Oct. at a troop position. By 1830 it had been replaced by Bty., evacuated to L.A.D., a new part welded on to it and in use again.

   (f) Supplies to troops operating independently is a big problem. It can only be effective if troops supply all information to Bty. and take steps to use any available means to notify Bty. of movements or intended movements.

6. Generally the exercise, although short, was a valuable one and many lessons were learnt by all ranks.

The Cdr informed C.O's that he anticipated the enemy would land considerable reinforcements during night 18/19 Oct. and that he intended to withdraw both Bn's to previously prepared positions at the Stop Lines, the withdrawal to be completed by 0400 hrs. 18 Fd Bty would come under command 2/21 Bn. from 0300 hrs. 19 Oct. and 27 Fd Bty would come under command 2/40 Bn from the same time. 8. TRAINING OF DRIVERS M.T.- MAINTENANCE OF VEHICLES AND DISPERSION

In order that drivers M.T. may become thoroughly trained to carry out automatically the duties that will be required of them in actual operations against the enemy, the following instructions are to be strictly enforced:-

(a) Vehicles when halted, except in Barracks or Camps where M.T. lines are established or in special parking areas in Darwin town, will be dispersed so that full use is made of natural camouflage and so that vehicles do not form a clearly defined target. Such dispersion will also ensure that a minimum number of vehicles are damaged if bombed.

(b) Drivers, whenever their vehicles are halted, will continually check over their vehicles and will carry out such maintenance as is required and that can be done in the time available. In actual operations set times will not always be possible and therefore every opportunity must be taken to maintenance vehicles. Drivers must be told the approximate time that they have available during the halt so that they do not delay movement by having started a task which will take too long to complete.

(c) Cleaning of terminal points, jets and filters if frequently practised will ensure that vehicles are not held up by petrol feed blockages, which in dust country will occur. Discretion must be exercised in the frequency of such cleaning to avoid undue wear of parts.
