SPEED LIMITS.

The speed limit for all vehicles in the camp area is 10 M.P.H. and is not to be exceeded.

It has been generally observed that all M.T. is driven at too fast a speed. No vehicle is to be driven above the speed stated in Standing Orders and only at this speed when traffic and safety precautions will allow.

Extreme care is to be exercised in all villages or when in proximity of civilian traffic on account of the native drivers.

BACKING OF VEHICLES.

No vehicle will be reversed until the driver makes sure by dismounting that the area is clear. When another person is carried on the vehicle he will dismount and direct the driver when reversing. A serious view will be taken if damage is done through failure to comply with this instruction.

TRANSPORT: Split wheels as fitted to MT vehicles recently issued will become the standard in future. The two halves are bolted together by an outer row of nuts and will burst apart with extreme violence if the nuts are slackened while pressure is in the tyre, and personal injury, sometimes fatal, will surely be sustained. The nuts must on no account be slacked off at all until the tyre is completely deflated.
