AUSTRALIAN WAR MEMORIAL AWM2020.71.2809

If the creek or surface gravel is accepted by the Railways as foundation ballast below sleeper level, arrangements have been made for supply of mechanical loader, tractor and plough with C.R.B., but we cannot place the gravel until the revetment is completed and 3" gravel bed is laid and rolled on the clay trench bed on Nos 3 and 4 Ranges. This work to be done by C.R.B. will take at least three weeks, and by that time the the U.S.P will be departing and we will be short of labour. If other labour is not available, arrangements could be made for C.R.B. to cart in the gravel and ballast with their trucks, and our hired trucks paid off.

Owing to the use of sleepers as revetment posts, and the abandonment Of No 1 Range, it is difficult to judge the number of sleepers and revetment pieces needed. Original estimates need revision. Until the timber is actually placed we cannot say when to cease cutting.
