ORDERS ROUTINE PART 1.
BY
CAPT. W.E.DAVIES.

A/O.C. 1 AUST.BULK PETROLEUM STORAGE COY (AIF) AASC.

SERIAL NO 5/45 PARAGRAPHS: 198-206 3 APRIL, 1945.

198. LEAVE WITHOUT PAY - (Extract from GRO 596/43.)

Para 105. Attention is directed to the provisions of War Financial (Military Forces) regulations, which provide, in effect, that all pay (including allotments) and pay allowances cease in respect of any period for which a member is granted leave (or an extension thereof) without pay.

Para 106. When leave (or an extension thereof) without pay is granted, the following will not be payable during the period of such leave or extension :-

(a) pay (including deferred pay.)
(b) field allowance.
(c) command allowance.
(d) special allowance.
(e) exchange allowance.
(f) dependent's allowance.
(g) travelling allowance.
(h) subsistence allowance.

199. DENGUE FEVER: -(6 Aust.Base Sub Area Order - A 48.)

1. There is a danger of dengue fever developing in this area due to tins left around camp sites. Tins and such receptacles are breeding places for species of mosquitoes conveying dengue fever.

2. As it is essential to maintain the health of troops in this area, only such tins and receptacles as are necessary for the disposal of rubbish etc. will remain in camp areas, and strict supervision will be maintained to ensure that they do not become breeding places for mosquitoes.

200. RELATIONSHIP OF TROOPS WITH NATIVES: (Moresby Base Sub Area Order Q 160.

1. FRATERNISING WITH NATIVES:-

(a) The natives of this territory are an important factor in our present campaign. It is essential that we gain their confidence and respect.

(b) Friendly relations will be maintained with natives at all times but on no account will troops fraternize with or allow natives to become familiar with them.

(c) Natives will not be given lifts in MT. The only occasion when natives will be carried in MT is when they are being transported between the Native Labour Camps and their work by the unit to whom such natives have been allocated. In no case will natives be allowed to ride in the front seat of the vehicles.

201. FLY CONTROL: (6 Aust Base Sub Area - Circular NO A.57.)

The common house fly is a filthy insect. It is bred in filth, lives in filth and carries filth within or on its body. It has no compunction in depositing filth on food stuffs, which have been prepared for human consumption.

2. It has been found by experiment, that flies have come directly from fouled areas such as refuse dumps and latrines to the mess room or kitchen. They are therefore a definite means of communicating intestin diseases such as diarrhoea, dysentry, typhoid etc from infected personn to healthy personnel. For this reason it is essential that this insect be controlled.

AUSTRALIAN WAR MEMORIAL AWM2022.5.1800

FLY CONTROL - continued.

3. The various methods of fly control are detailed hereunder. Any one method in itself is not sufficient, all three have to be adopted to successfully control this pest and prevent the transmission of disease:-

(a) Prevention of breeding.
(b) Killing of adults.
(c) Protection of food stuffs.

PREVENTION OF BREEDING.

Flies breed in filth, some of its most favoured breeding grounds is the latrine. It is therefore essential that all latrines are properly constructed so as to be fly proof, especially native latrines. The ground around the pit must be sealed with oiled sacking or canvas for four feet from the edge of the pit. The superstructure must be completely fly proof, with fly proof, self closing, close fitting lids. All vents must be fly proof and a trap be incorporated in the superstructure.

FOOD SCRAPS.

All food scraps must be kept in containers with close fitting fly proof lids, while waiting to be incinerated or dumped at sea. Food scraps will NOT be buried. The area around garbage tin stands will be kept clean and free from fouling at all times. Empty food tins will be incinerated, crushed and buried, or be dumped at the authorised dump.

REFUSE.

All refuse such as decaying bags, hessian, leaves etc., provide suitable breeding grounds so must be burnt.

KILLING OF ADULTS.

Adult flies can be killed by swatting, poisoning and fly traps and Tanglefoot. All these measures should be adopted.

4. Supplies of Sodium Arsenite for poisoning are available from the Hygiene Officer or Inspectors. Instructions on the use of sodium arsenite will be given by the Hygiene Inspectors.

5. Fly traps must be suitably placed, baited and be properly maintained, Do NOT place fly traps inside the kitchen as this attracts flies into the kitchen instead of away from it.

6. PROTECTION OF FOOD STUFFS.

All food stuffs being prepared for human consumption must be prepared in a fly proof food preparation room, fitted with self closing fly proof doors.

All food before and after preparation and all food stuffs placed on mess tables prior to meals must be protected from flies.

7. Keep your camp clean and you will do much to defeat the fly menace.

02. NOTICE: INSTRUCTORS FOR INDUSTRIAL TRAINING DIVISION - DEPARTMENT OF LABOUR AND NATIONAL SERVICE.

A notice was published with GRO's of 8th.December, 1944, advising members of the AMF that, in connection with the Commonwealth Reconstruction Training Scheme, the Department of Labour and National Service would require many additional trade instructors in technical schools and colleges and similar training organizations, particularly in the building trade.

207. WASHING OF ISSUE CLOTHING: (Extract from GRO 103/45.)

1. Due to the short supply of all raw materials involved, it is necessary that the maximum life be obtained from all items of clothing on issue to AMF personnel.

2. Incorrect methods of washing, exposure to strong sunlight, excessive sweating and using too much of certain soap powders, may seriously affect the dyes and weaken the fibre of clothing material. Failure to remove completely all soap and perspiration by thoroughly rinsing after washing, is one of the reasons for the breakdown of fabrics.

3. Neglect to pay due attention to regular and efficient washing of garments has been responsible for many cases of dermatitis. Observance of the following instructions will assist in decreasing the incidence of all skin complaints.

4. Washing flannels and woollens:-

(a) Worsted shirts, socks, woollen drawers, etc, should be washed in lukewarm water and never in boiling or hot water, as this shrinks the material. A tablespoonful of ammonia added to every two gallons of water will remove grease and perspiration stains,

(b) Good quality yellow soap only should be used, and, after washing, the garments should be well rinsed in clean, tepid water and stretched by hand before drying.

5. Washing of cottons:-

(a) If cotton garments are boiled, the washing compound or soap will be added to the water prior to putting in the garments to be washed,

(b) If washing compounds, which are usually sold in packets under well-known brands and frequently known as soap powders, are used, not more than one tablespoonful of the compound will be added to each gallon of water to be boiled,

(c) If ordinary soap is used, 1-oz (approx 1-in cube) should be added to each gallon of water to be boiled,

(d) It is most important that, after washing, the garments are thoroughly rinsed to remove all trace of soap.

6. It is realised that washing facilities and an adequate supply of water are not always available. Nevertheless, the hints and instructions contained in this order will be carried out whenever possible, especially in regard to rinsing thoroughly after washing.

208. NOTICE - GIFT PARCELS FOR UNITED KINGDOM ADDRESSEES - DUTY FREE CONCESSION.

1. The following are the conditions applicable as from 6th.April, 1945:-

(a) The usual postage rates are payable.

(b) Parcels must not weigh more than 5 lbs. each and must not include -

(ii) more than ½ lb. weight of tobacco, including cigars and cigarettes (50 cigars or 200 cigarettes) or any tobacco goods marked " H.M. Ships only"

AUSTRALIAN WAR MEMORIAL AWM2022.5.1800

GIFT PARCELS ETC. CONTINUED.

(iii) more than ½ pint of scent,
(iv) more than 2 lbs. of any one foodstuff.

(c) The maximum value of the contents of the parcels which can be sent by one person in any one year is £12, and this value may be made up as follows :-

(i) one parcel of £12 value, or
(ii) two or more parcels up to a maximum of six parcels aggregating £12 value.

(d) Special Customs declarations (AFs W5192) must be affixed to all parcels in order to secure the duty free concession. These declarations, where not already in possession of units, are obtainable through normal stationery channels.

(e) Issues to personnel will be under unit arrangements, on the basis of a miximum of six AFs W5192 per year to any one sender. A comparatively few forms should, therefore, suffice for the needs of any unit,

(f) Each AF W5192 issued will have entered upon it the sender's number and name and be signed by the issuing officer in the space provided.

(g) Each Customs declaration represents a permissible value of £2 within the parcel to which it is attached.

(h) Where the value of the contents inany one parcel exceeds £2, a further declaration for each additional £2 (or fraction thereof), up to the maximum of £12 must be attached, e.g., a parcel containing goods to the declared value of £6 would require three labels attached.

(i) Gifts under this concession arrangement may also be forwarded by letter post. In such cases normal letter postage rates will be payable and, if the sender so desires, the article may be tendered for transmission by registered post. To be eligible for the concession, articles forwarded by letter post must conform to the same conditions as those set out above for parcels, with the exception that the maximum weight for letters (4½ lbs.) will apply.

3. It is stressed that full duty will be levied in the United Kingdom (for collection from the addressees) in respect of the contents of parcels and packets which infringe the restrictions contained in para 2 (b) above. In addition to these duty charges, the contents of any parcel or packet not bearing a Customs declaration, received in the United Kingdom, are subject to purchase tax amounting in many cases to 100 per cent of the value of such contents. This tax is chargeable on most manufactured articles, but tobacco and foodstuffs are excluded.

      (a) Troops in forward areas are not being adequately catered for owing to a consequential shortage of supplies, and to a consequential shortage of supplies, and
      (b) The withdrawal of the privelege of freedom from excise duty resulting in troops in all areas being required to pay mainland prices.
   (ii) It is, therefore, in the interest of all concerned to strictly adhere to the provisions of this order.
7. Disciplinary action will be taken in respect of all disclosed breaches of papas 2,3 and 4 of this order and where tobacco or cigarettes are intercepted in transit to Australia, the same will be confiscated and, after disciplinary action has been completed, donated to the Red Cross Society.

2. Damage to Timber.

Members of the forces will not, except for operational or properly authorized official purposes, cut or authorize or direct the cutting of timber growing on private or public property (including forestry reserves) without first obtaining the consent of a person having power to agree to such cutting.

216. ECONOMY IN STATIONERY ITEMS.(Extract 6 Aust Base Sub Area Order Q.58.)

1. Considerable difficulty in being experienced in the procurement of adequate supplies of certain stationery items - and in particular all types of pencils and the larger sizes of envelopes.

2. It is imperative, therefore, that the strictest economy be effected in the use of stationery items generally, and the present stocks of pencils and large envelopes be conserved to the utmost.

3. It is apparent from the large demands made upon Stationery Depots, that there is an exorbitant usage rate in a number of items, which indicates that the need for economy in this regard is not appreciated. This again applies very seriously in the case of pencils.

4. Units will ensure that sufficient measures are taken to effect the strictest economy in all stationery items.

217. SAFEGUARDING OF MT AND PROVISION OF AUTHORISED PARKING AREAS (6 Aust Base Sub Area - Admin.Instr. A.26)

1. Safeguarding of M.T.Generally.

(ii) The driver of every AMF vehicle which is left unattended in an authorised parking area will comply with the directions issued to him by the picquet on duty at such area, and will facilitate the performance by the picquet of his duties in relation to the vehicle as set out in para 9 below. The driver will NOT remove his vehicle from such parking area without being identified by the picquet.

(iii) A driver is responsible for the safe custody of his vehicle. If it is lost or damaged as the direct result of his neglect of duty or misconduct, he may be required to make good the loss or portion thereof suffered by the Commonwealth.

2. AMF AUTHORISED PARKING AREAS

218. EFFICACY OF SUPPRESSIVE ATEBRIN.(H.Q. 6 Aust Base Sub Area - Circular No.A.78.)

1. Not a single volunteer under observation at Cairns has shown clinical symptoms of malaria with demonstrable parasites in the blood while taking 0.6 gm atebrin weekly or more. These subjects have been very heavily infected with both B.T. and M.T. strains, much more heavily than is likely even under the most intense exposure in the field. Sporozoite rates in mosquito populations in NG rarely exceed, or reach 1%, so that the bites of 10 infected mosquitoes in the laboratory are equivalent to 1000 bites in the field. These volunteers were given from 8 to 35 infective bites per session in 10-20 sessions over 7 to 13 weeks. The evidence from these experiments is conclusive that 0.7 gm atebrin weekly will suppress Benign and malignant tertian malaria and that it will cure malignant tertian malaria. Actually 0.6 gm weekly is an adequate dose and the daily tablet was introduced only to simplify the routine of administration and to provide a safety margin. No volunteer taking 0.6 gm atebrin or more weekly has developed overt M.T. malaria subsequent to cessation of suppression. Volunteers infected with both B.T. and M.T. malaria following complete cessation of suppressive atebrin do not develop overt B.T. malaria until 3 to 4 weeks later, which clearly shows that the dosage of 0.7 gm weekly provides a wide safety margin. These experiments are conclusive and have received world wide acceptance. No further work on these lines is now being carried out at Cairns and elsewhere, research is now directed toward the discovery of an effective cure for relapsing benign tertian infections.

2. The objection that results obtained from even the large numbers of volunteers at Cairns may not be fully applicable to the experience of tens of thousands of troops in the fields is answered by the actual results of suppressive atebrin in New Guinea. Whereas formerly rates of 100 per 1000 per week were not uncommon and rates of 60 or more per 1000 were the rule in troops in contact with the enemy, the position is entirely changed, and rates in excess of 2 or 3 per thousand are regarded as exceptional. For weeks on end the rate for all troops in malarious areas has been kept below 1 per thousand. Several brigades have gone for weeks in the field without a single reported case (one brigade had no cases for 11 successive weeks, and another for 8 successive weeks.) A division on the mainland, with malaria rates of 20 to 25 per 1000 per week from benign tertian relapses when placed on suppressive atebrin has quickly reduced these to 0.5 per thousand.

3. It is not asserted that no single individual can develop overt malaria while taking 0.1 gm atebrin daily. Such a statement is NOT made in GRO A321/44, which states that the use of suppressive atebrin will PRACTICALLY eliminate wastage from malaria. But such hypothetical individuals, if they exist, must be extremely rare. None has been detected among the volunteers at Cairns. If such persons were responsible for excessively high malarial rates in some units, they should be readily detected, for the same few would be repeatedly evacuated with malaria, the vast majority remaining unaffected. This does NOT occur. Further, such individuals should be present in the same proportion in every unit, so that units infected to the same degree should show equivalent rates. The experience of the last three years shows that exactly the reverse occurs. Units exposed under the same conditions, and with practically every member infected, exhibit widely different rates when on suppressive atebrin.

AUSTRALIAN WAR MEMORIAL AWM2022.5.1800

PARA 218 Continued.

The only factor differing from unit to unit is the efficiency with which the administration of suppressive atebrin is supervised. It is by no means a simple matter to ensure that every one of ten thousand or more soldiers does actually swallow his tablet every day. But it is obvious that the MINIMUM rate experienced in units under comparable conditions must be accepted as the standard by which to assess the efficacy of supervision of atebrin administration, and if a unit consistently shows rates above this minimum, it is conclusive evidence that some of its members are not consuming the full suppressive dose.

4. Repeatedly in the last two years, various hypothesis have been brought forward to explain excessive malarial rates, and they are still heard. It can be categorically stated that atebrin resistant strains of parasites do NOT occur. Malaria in every part of the world responds to the same dose of atebrin for suppression and cure. Different batches of atebrin do NOT vary as regards drug content or absorbability, and if they did, conditions of distribution are such that the effect could not be confined to a single unit or formation. Excessive sweating does NOT result in undue excretion of atebrin, the amounts so excreted are too minute to affect blood atebrin levels.

5. Review of the experimental data and careful analysis of AMF Malarial Statistics make it possible to state with certainty that Malarial rates consistently in excess of the minimum must be attributed to some breakdown in administration of suppressive atebrin.

Summarising, it is absolutely definitely proved that provided one tablet of atebrin is taken daily for a few weeks before entering a malarious area, during the period of exposure to infection, and for one month after coming out of such area, that :-

(a) Both M.T. and B.T. malaria will be suppressed during the period of drug administration.

(b) No carriers will develop for parasites never appear in the blood during the period of drug administration.

(c) M.T. malaria will be cured.

This implies a death rate of 0% and no blackwater fever. About 3 weeks after stopping the drug B.T. relapsing malaria begins to appear.

221. COLOUR PATCHES - GENERAL PRINCIPLES. (G.R.O. 60/45.)

1. A member will wear the colour patch authorised for his unit, arm or service and no other, except for a miniature colour patch as set out in paras 7-11 below. With winter dress, colour patches will be worn only on greatcoat, serviee dress, hat, khaki fur or beret (wool), black or khaki. When personnel are in summer dress, unit colour patches will be worn only on hat, khaki, fur or beret (wool), black or khaki.

2. When worn on the sleeve head, unit colour patches will be attached to the jacket or greatcoat sleeve, 1 inch clear from the top, except when miniature patches are worn in addition, when the top of the miniature will be ½ inch from the top of the sleeve with ½ inch space between miniature and unit colours. Colour patches will be worn so as to present exactly the same appearance on both arms when viewed from the front, consequently all patches divided obliquely are made in pairs.

5. "Attached" personnel will wear colour patches as follows :-

(a) A member who is only attached for duty will wear the colour patch of the unit, arm or service to which he belongs and will not wear that of the formation HQ or unit to which he is only so attached.

(b) Individual members of a service attached by WE to a unit, other than a formation HQ, will wear the colour patch of their service.

(c) Individual members of a formation HQ will wear the formation HQ colour patch, excepting that officers posted to a service appointment, and distinct from a staff appointment, within the WE of a formation HQ, will wear the colour patch of the service concerned.

(d) All members, whether members or not of a service, posted within the WE of LHQ or an echelon thereof, will wear the LHQ colour patch.

NOTES:-

(i) Sub-paras (c) and (d) have no application to a member of a unit or sub-unit when such unit or sub-unit is attached by WE to a formation HQ or to LHQ or an echelon thereof, Such member will wear the colour patch prescribed for his unit or sub-unit.

(ii) For the purpose of this order, a formation HQ will include the HQ of a brigade, division, corps, army, base and L of C area or sub-area.

(b) When units of arms and services, other than those detailed in para 6(a) above, are transferred from one formation to another, they will change their colour patches to the standard arm or service colour patch, unless they have already been allotted the standard colour patch.

(a) A member of the AIF may wear a miniature of the colour patch of the AIF unit (if any) with which he previously served or, in the case of an AIF member who has served overseas, a miniature of any colour patch which he was entitled to wear whilst so serving.

(b) A member of the CMF who has served overseas may wear a miniature, without a battleship grey background, of any colour patch which he was entitled to wear whilst so serving. If, however, at the time of such service, the member was in the Second AIF, the miniature will be worn on a battleship grey background.

(c) A member who is entitled to wear a colour patch in miniature of a unit of the First AIF may wear such miniature. Such miniature colour patch shall not be worn on a battleship grey background.

8. A member who changes his colour patch in the circumstances set out in para 6(b) above may wear above the standard arm or service colour patch a miniature of the previous colour patch of his unit, but only if -

(a) he is a member of the AIF, or

(b) he has served overseas with the unit where the unit is CMF.

9. For the purposes of paras 7 and 8 of this order, a member will be deemed to have served overseas during the present war only if he is qualified to wear a service chevron or chevrons under the conditions prescribed by GRO A.441/1944.

10. Only one miniature colour patch may be worn. Miniature colour patches will not be worn on hat, khaki, fur or beret (wool), black or khaki.

11. Miniature colour patches will not be an item of issue nor will authorized colour patches be issued for the purpose of making miniatures.
