- Family Violence Networks
- Regional and state wide PCP networks
- UH Chronic Care WG
- UH Integrated Health Promotion Steering Group

*Other networks as identified*

### Individual system integration initiatives reflecting the PCP role

- COPD project
- Linguistically Diverse GP project
- Cancer Survivorship Project
- Engagement and Participation (including focus on vulnerable families)
- Monitoring and evaluation short course
- Communication Project
- RESPOND Project

*Other capacity building initiatives as identified*

## UHPCP role

### Facilitation

- Facilitating monitoring and evaluation
- Act as the conduit between broad policy and local strategy development
- Facilitating co-design

### Planning

- Ensuring collaborative catchment planning
- Leveraging current broad membership base to support existing and emerging government policy directions
- Building and brokering successful partnerships and alliances
- Address organisational health literacy

### Embedding Frameworks

- Embedding SDH approach
- Utilise placed based approaches
- Implementing collaboration with a SDH approach
- Implementing co-design
- Enhancing innovative approaches to Government policy directions
- Enabling community/consumer engagement

### Advocacy

- Represent catchment priorities and strategic direction
- Advocate for Consumer Involvement
- Advocate for Co-design
- Advocating for under-resourced population groups

### Capacity Building

- Identify and facilitate ongoing and future opportunities for capacity building
- Modelling and enabling collaboration
- Support initiatives to improve organisational health literacy.
- Utilising systems thinking frameworks
- Increasing awareness and understanding of all member identified priority areas

## Outcomes

Health and wellbeing outcomes will be improved through the utilisation of systems thinking enabling innovative approaches.

Cross-sector collaboration, community engagement and co-design will be enabled and strengthened.

Consumer participation, and collaboration with communities to foster a culture of action and innovation will be enabled through strong advocacy.

Shared measurement, monitoring and evaluation for the development of meaningful outcomes data will be embedded.
