

NEXT GENERATION FENCING

**MODULAR POST AND PANEL SYSTEM
PROVEN NOISE REDUCTION
EASILY CUSTOMISED
FAST (DIY) INSTALLATION**

SLIMWALL™
NEXT GENERATION FENCING

CONTEMPORARY HOMES REFLECT PERSONALITY, LIFESTYLE & AMBITION. FINALLY THERE'S A FENCE TO MATCH.

The revolutionary SlimWall Designer Fence consists of lightweight composite panels and posts. Its sleek, modern design creates a stunning architectural look that can seamlessly match the existing style of any home.

Easily customised with slats, infills, lighting or gates, SlimWall transforms the garden into a stylish outdoor extension of the indoor living area. In addition, its proven noise reduction qualities increase peace and quiet around the home.

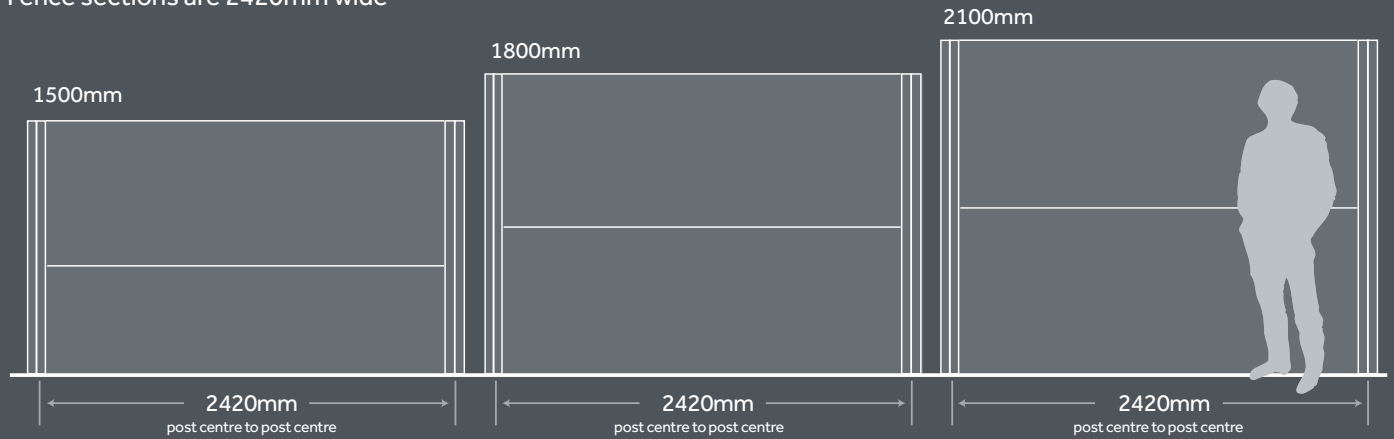

Virtually maintenance free, SlimWall is the ideal (DIY) fencing option for level and sloping sites. Add value to your home and lifestyle with SlimWall next generation fencing.

**TIMES HAVE CHANGED.
SO HAS FENCING.**

SLIMWALL IS AVAILABLE IN 3 STANDARD HEIGHTS

Fence sections are 2420mm wide

CUSTOM HEIGHTS AVAILABLE ON REQUEST

SLIMWALL CONSTRUCTION

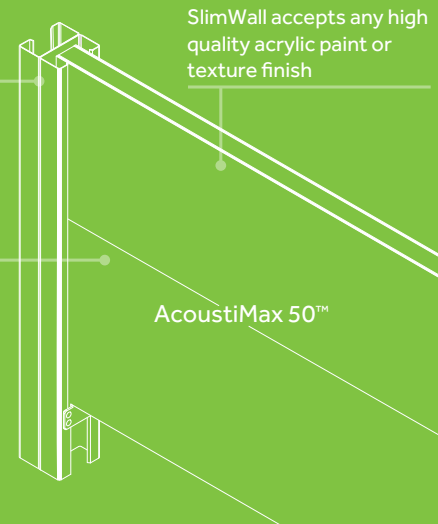

Precision Engineered Support Posts

Patented design using high tensile, galvanised and dyna primed materials for longevity and strength

Composite Panel technology

SlimWall composite fence panels are lightweight, yet incredibly strong and rigid. They provide proven noise reduction qualities, more than halving audible noise (depending on site specific circumstances)

Easily customise with slats, infills, lighting or a gate

SLIMWALL FENCE SECTIONS INCLUDE:

(based on 1800mm high fence)

- 1 x Post - 2450mm long, 90x90mm wide (2 halves form one complete post)
- 2 x AcoustiMax 50™ Panels - 2400mm x 900mm (2 panels in a stack configuration form the full height)
- 1 x Internal panel joiner
- 1 x Post cap
- 2 x Support brackets
- 2 x Panel cappings
- All screws required for assembly

Extras

- Post infills - used for end posts, any steps in the fence or to accept slats or infills
- Gate support posts
- Solid panel gates to match
