FLEET REPAIR MANAGEMENT

Corporate Fleet Services Summary

Bennett Elder Fleet Repairs have the knowledge, experience, and attitude to deliver a Premium Priority Service. We are ready and able to meet your fleet accident repair needs.

We understand that your vehicles are your business and that minimal downtime is a priority.

Quality Assured Repairs require a combination of repairer knowledge and an operating system structured to deliver a predictable end result.

Our Fleet Repair Management System has been designed to suit the individual needs of each client and to ensure that damaged vehicles are repaired efficiently so that they can be back on the road as soon as possible.

We have extensive experience dealing with corporate fleet for small medium and large companies in managing their fleet repairs.

We are repairers for both local and state government fleet.

We offer the most technologically advanced smash repair services in the industry. Our commitment to safety and customer satisfaction is our number one priority.

Bennett Elder Corporate Fleet Services will provide:

- Towing arrangements if the vehicle is non driveable
- Free pickup and delivery of your fleet vehicles as part of our Premium Priority Service.
- Replacement Car, subject to availability, to ensure added convenience while your car is being repaired.

Alternatively, if you are **not at fault** in an accident we can arrange services which may be able to provide your company with an accident replacement vehicle and claim the cost back from the at fault party.

- Insurance company liaison, lodging of claims, organising repair inspections and obtaining the authority to commence work.
- End of Lease Refurbishment, at the end of your vehicle's lease period your company may be liable for any restoration work required beyond fair wear and tear. Using AFLA guide lines we can assess the condition of the vehicle to ensure it is consistent with the lessee's obligation.

Quality Assured Repairs
