

# Aviation Fluids and Chemicals

# EASTMAN

**CJ Aerospace is proud to announce we have been awarded:**

Authorised Distributor for Eastman Aviation Solution range of Turbo Oils, Skydrol Hydraulic Fluid and SkyKleen solvents.

Eastman Aviation Solutions brings together Eastman™ Turbo Oils, Eastman Skydrol® aviation hydraulic fluids and Eastman SkyKleen® aviation Solvents to provide industry-leading products, technical resources, dedicated support and improved service to all of our aviation customers. This global team of aviation experts with over 100 years of experience builds strong relationships with airlines, manufacturers and all members of the industry to help understand specific needs, enabling us to seek out innovative and flexible solutions to meet exacting requirements. We are committed to supporting the industry with exceptional products, technical services and engineering consultancy to partners worldwide.

Skydrol® is the most advanced aviation hydraulic fluid supported by recognized experts in phosphate-ester fluid technology.

The Skydrol® line of fire resistant hydraulic fluids includes Skydrol® 500B-4, Skydrol® LD-4, Skydrol® 5 and Skydrol® PE-5. Skydrol® PE-5 was developed to meet the Type V hydraulic fluid requirements developed by Airbus, Boeing, and the hydraulic fluid manufacturers.

Eastman Aviation Solutions has a range of high quality turbine lubricants for aviation, designed to suit your every need, with a strong presence globally via direct sales as well as being represented locally through key distributors.

We are committed to supporting the industry with exceptional products.

SkyKleen® is a new generation aviation solvent that combines excellent cleaning performance with environmentally friendly characteristics.

From parts cleaning to surface prep, SkyKleen® is effective and economical.

## EASTMAN TURBO OIL

Call to discuss  
your oil needs.
