Series 74 Venice

You think of picturesque Venice for its architecture, artworks, canals, gondolas and romance... Now also Oslo Series 74

Oslo Series 74 Venice

New innovative, stylish European C-Section tracking. Replacing the old out-dated Styleline type tracks, this reinvented new track uses the “Easy Clip” and face fix brackets have cover plates to give a clean finish, hiding all screws.

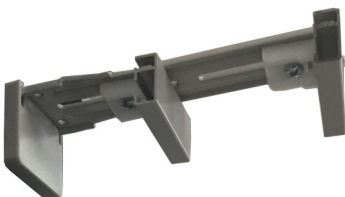

The face fix bracket also connects to the draw wheel as an end return bracket on cord drawn tracks.

Oslo Series 74 track

Not only does the modern design set a new benchmark for stylish elegance, it is versatile and strong, suitable for conventional and S-Wave curtains in both domestic and commercial applications. The track system can be bent at a 150mm radius or a continuous curve.

Unlike Anodised, the Platinum has a special electro plated finish allowing runners to glide through the track with minimal friction. Gliders have UV resistant inhibitors and are low friction. Initially available in White and Platinum with Birch White coming soon and other colours will be introduced as demand grows.

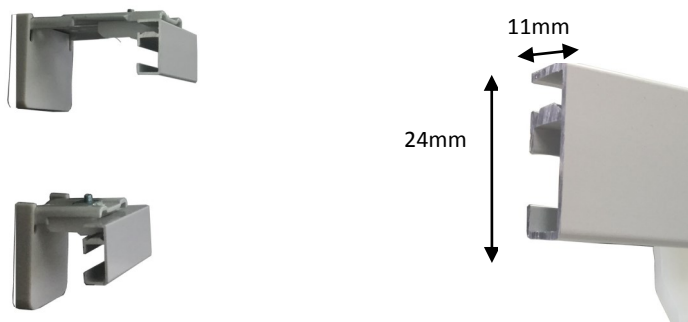

Easy Clips and Bracket Cover

Bringing both fashion, strength and practicality in one bracket, the “Easy clip” which was first introduced on Series 50 Milan, is now used on the Series 74 Venice, allowing fitters to use one bracket system.
