

SERIES 81 TURBO MOTORISED S-FOLD SYSTEM USING SNAP TAPE

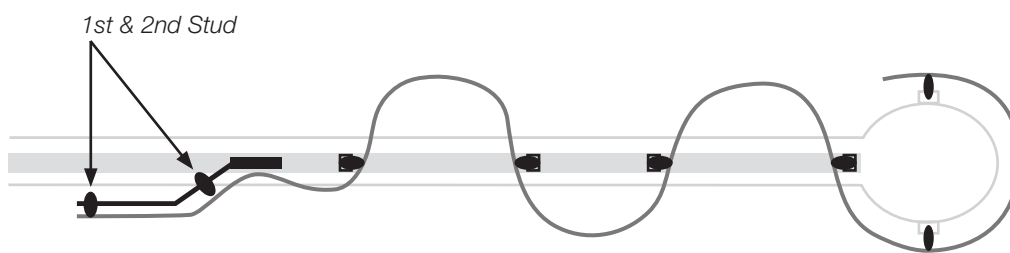

=100% Fullness

=80% Fullness

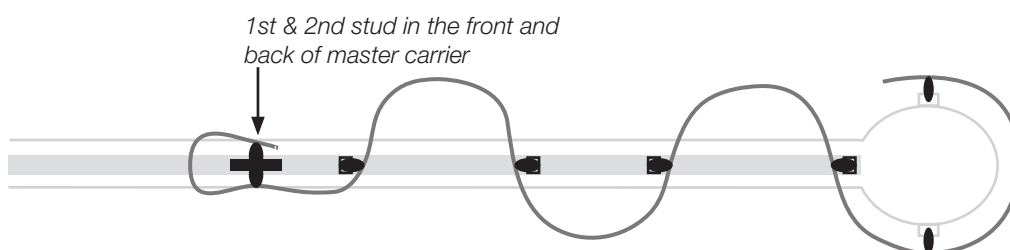

- The length of tape supplied is sufficient to wrap the curtain around the motor/idler using two studs.

- Two of the studs on the other end are used for either the overlap arm or master carrier

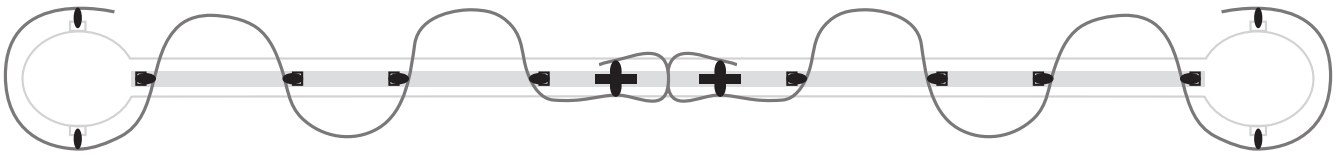

- For the Master Carrier on a centre open curtain, the 1st and 2nd stud go either side of the master carrier creating a folded edge.

SERIES 81 MOTORISED S-FOLD SYSTEM USING SNAP TAPE

CENTRE OPENING CURTAIN OPTIONS

For the most consistent wave appearance, two Master Carriers can be used.

Alternatively if an overlap is required for better light block out an overlap arm can be used on one of the master carrier blocks.
