

| serviced apartments

The inclusions required for a Serviced Apartment FF&E package or refurbishment are very comprehensive. We consider all areas such as beds, soft furnishings and electrical items, right down to the very last detail such as kitchen packages. To ensure that the property fitout is complete, we unpack and distribute all items so it is ready to operate on handover.

Our involvement includes assisting the builder with intricate details such as the location of power outlets so that, when the furniture is installed, everything is pre-determined and therefore runs smoothly.

Our designer will develop a Colour Palette exclusive and individual to each property, which ultimately means it will suit the nature and location of the Apartments, accentuating your guests' experience.
