ACTIVE CONSTITUENT:
20 g/kg PICLORAM present as the triethanolamine salt

GROUP 1 HERBICIDE

For the control of ragwort and woody plants including sweet briar, African boxthorn, chinee apple, limebush, Eucalypt suckers and seedlings, and blackberry as specified in the Directions For Use.

Pack Size: 5 Kg

READ SAFETY DIRECTIONS BEFORE OPENING OR USING

FIRST AID
If poisoning occurs, contact a doctor, or Poisons Information Centre.
Phone: Australia 13 11 26.

SAFETY DIRECTIONS
Avoid contact with the eyes and skin • DO NOT inhale dust • After use and before eating, drinking and smoking wash hands, arms and face thoroughly with soap and water.

SAFETY DATA SHEET
Additional information is listed in the Safety Data Sheet for TORDON® GRANULES WEED AND BRUSH HERBICIDE which is available from Corteva Agriscience on request.

DIRECTIONS FOR USE

RESTRAINTS

DO NOT apply to weeds which may be stressed (not actively growing) due to prolonged periods of extreme cold, moisture stress (water-logged or drought affected) or previous herbicide treatment, as reduced levels of control may result.

DO NOT apply during high winds.

<tr>
<td>Grazing pastures</td>
<td>Sweet briar</td>
<td>Vic, Qld, SA, WA only</td>
<td>35-45 g per square metre</td>
<td>Use the higher rate on larger bushes, on blackberry, and also on very sandy, gravelly or rocky soil and in areas where very high rainfall is usual. Apply granules over an area extending from the main stem to 30 cm outside the dripline to cover the main part of the root system. Where it is difficult to apply granules to the soil they can be thrown over the top of the bush taking care to obtain even distribution. NSW ONLY For Eucalypts: Apply only to actively growing regrowth which is less than 5 years old and under 3 m tall.</td>

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.

FOR NSW ONLY:

With the exception of regrowth less than 5 years old and under 3 m tall, the clearing of more than five hectares of trees by aerial, ground or spot application in NSW is prohibited unless specifically authorised by permit. This restriction does not apply to noxious woody weeds.

WITHHOLDING PERIODS:

NOT REQUIRED WHEN USED AS DIRECTED

GENERAL INSTRUCTIONS

Tordon Granules are recommended as a spot application for treatment of scattered target plants, particularly in areas where access for spray equipment is difficult or water supplies are limited. Treat before growth begins or during vigorous growth when good rainfall can be expected. Rain after application is required to move the herbicide into the root zone and the effect on treated plants will not be observed until then.

Picloram, the active constituent in this product remains active in the soil for extended periods, depending on rate of application, soil type, rainfall, temperature, humidity, soil moisture and soil organic matter.

RESISTANT WEEDS WARNING

GROUP I HERBICIDE

Tordon Granules Weed and Brush Herbicide is a member of the pyridines group of herbicides. The product has the disrupters of plant cell growth mode of action. For weed resistance management the product is a Group I herbicide. Some naturally occurring weed biotypes resistant to the product and other Group I herbicides may exist through normal genetic variability in any weed population. The resistant individuals can eventually dominate the weed population if these herbicides are used repeatedly. These resistant weeds will not be controlled by this product or other Group I herbicides. Since the occurrence of resistant weeds is difficult to detect prior to use, Dow AgroSciences accepts no liability for any losses that may result from the failure of this product to control resistant weeds. Strategies to minimise the risk of herbicide resistance are available. Contact your farm chemical supplier, consultant, local Department of Agriculture or local Dow AgroSciences representative.

PROTECTION OF CROPS, NATIVES AND OTHER NON-TARGET PLANTS

Will kill medics and clover present at time of treatment. After use wash hands thoroughly before handling susceptible crops.

DO NOT allow the dust of this product to drift onto susceptible crops, such as, but not limited to: peas, lupins, lucerne, navy beans, soybeans and other legumes; cotton, fruit hops, ornamentals, shade trees and Pinus spp., flowers potatoes, safflowers, sugar beet, sunflowers tobacco, tomatoes, vegetable and vines.

DO NOT use under meteorological conditions likely to produce physical drift onto waterways, native vegetation and susceptible crops.

DO NOT apply close to or on areas containing roots of desirable vegetation, where treated soil may be washed onto areas growing, or areas to be planted with desirable plants.

DO NOT apply on sites where surface water from heavy rain can be expected to runoff to areas containing, or to be planted with susceptible crops or plants.
DO NOT move soil which may have been treated to areas where desirable plants are to be grown.

DO NOT use on land to be cultivated for growing susceptible crops. Legumes, vines, vegetables, cotton, tomatoes, ornamentals and many other plants are highly susceptible to this product during both growing and dormant periods. Grasses are normally unaffected and establish quickly after treatment.

PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT

DO NOT contaminate streams, rivers or waterways with the chemical or used containers.

PROTECTION OF LIVESTOCK

Poisonous plants may become more palatable after spraying and stock should be kept away from these plants until they have died down.

STORAGE AND DISPOSAL

Keep Out of Reach of Children.

DO NOT store container near food, feedstuffs, fertilisers, seed, insecticides, fungicides or other pesticides.

Store in closed, original containers, in a secure cool, well-ventilated area.

DO NOT store for prolonged periods in direct sunlight.

Shake empty pail into granule applicator.

This container can be recycled if it is clean, dry, free of visible residues and has the drumMUSTER logo visible. Triple or pressure rinse container for disposal. Dispose of rinsate by adding to the spray tank. Do not dispose of undiluted chemicals on site. Wash outside of the container and the cap. Store cleaned container in a sheltered place with cap removed. It will then be acceptable for recycling at any drumMUSTER collection or similar container management site. The cap should not be replaced but may be taken separately.

If not recycling, break, crush or puncture and deliver empty packaging for appropriate disposal to an approved waste management facility. If an approved waste management facility is not available, bury the empty packaging 500 mm below the surface in a disposal pit specifically marked and set up for this purpose, clear of waterways, desirable vegetation and tree roots, in compliance with relevant Local, State or Territory government regulations. DO NOT burn empty containers or product.

SPILL AND LEAK MANAGEMENT

DO NOT touch or walk through spilled material. Wear a face shield or goggles, overalls buttoned to neck and wrist, chemical resistant gloves and footwear. Stop leak when safe to do so.

Dam area and prevent entry into waterways and drains.

Small spills/leaks: Sweep with material such as sand, soil or sawdust. Collect spilled product and place in sealable container for disposal. Spill residues may be cleaned using water and detergent. Contain and absorb wash water for disposal. Absorb and collect washings and place in the same sealable container for disposal. Dam the area of large spills and report them to Dow AgroSciences Emergency Services at 1-800 370 754.

Hazard and precautionary statements according to classification under GHS (Globally Harmonised System of Classification and Labelling)

May cause allergic skin reaction. Contaminated clothing should not be allowed out of the workplace. Wear protective gloves. IF ON SKIN: Wash with plenty of soap and water. If skin irritation or rash occurs: Get medical advice/attention. Wash contaminated clothing before reuse.
