To whom it may concern:

total creative resource

As a manufacturer of COPIC products, this letter is to certify that COPIC marker is art material for professionals and can be transported as non-hazardous goods under classification of European Agreement concerning the International Carriage of Dangerous Goods by Road 2017. In addition, please be informed that COPIC marker has been non-toxic certified by ACMI as stated below.

“ACMI (the Art and Creative Materials Institute) certified product seals (AP) indicate that the following products have been evaluated by a qualified toxicologist and are labeled in accordance with the US federal and state laws.

The AP (Approved Product) Seal: Copic Classic, Copic Sketch and Copic Ciao markers
The AP Seal identifies art materials that are safe and that are certified in a toxicological evaluation by a medical expert to contain no materials in sufficient quantities to be toxic or injurious to humans, including children, or to cause acute or chronic health problems. Such products are certified by ACMI to be labeled in accordance with the chronic hazard labeling standard, ASTM D 4236, and the U. S. Labeling of Hazardous Art Materials Act (LHAMA).
If the product has the AP seal, that means it has been certified as nontoxic.”

Yours sincerely,

Too Marker Products Inc.
