

TRED

TOTAL RECOVERY & EXTRACTION DEVICE

The ultimate all-in-one 4x4 and ATV recovery device

Designed and manufactured in Australia from highly engineered polyolefin material, TREDs can handle intense levels of torque, flex, weight and impact. With a designated shovel feature, extreme hex grip nodules, dual size offering, aggressive ramp entry teeth and ultimate wear properties, TREDs are the best option to get you going when loss of traction disrupts your journey.

SUPERIOR RAMP DESIGN

Engineered specifically for optimum vehicle recovery in all conditions

ERGONOMIC HANDLES

Integrated design provides maximum grip, comfort and control

SUPERIOR RAMP PLATFORMS

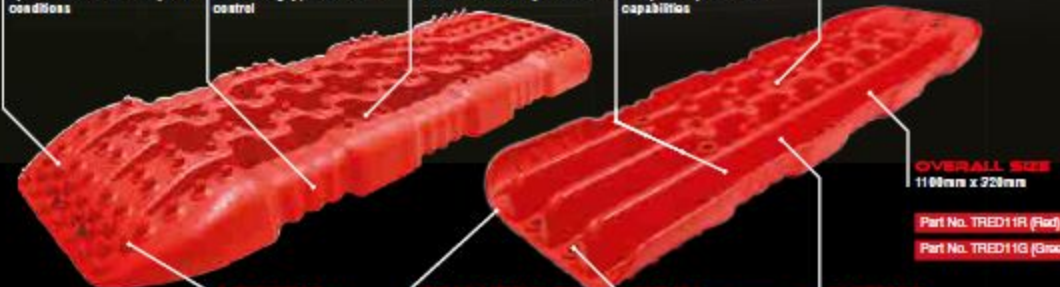

Designed to maximise traction & reduce strain as your vehicle

UNIQUE FOLD CHANNEL DESIGN

For maximum structural integrity & improved performance capabilities

UNUSUAL TRACTION

The unique end-to-end pattern reduces gross slippage in extreme conditions

AGGRESSIVE TIRTH DESIGN

Lock aggressively onto your tyre to combat the effects of wheel slip

REVOLUTIONARY SHOVEL PLATFORMS

Clear debris & obstructions for optimum TRED placement prior to recovery

LINKS & ANCHORING POINTS

Link multiple TREDs during recovery or reset securely to your vehicle

SUPERIOR MATERIALS

Extremely durable polyolefin material specifically engineered for TRED

OVERALL SIZE
1160mm x 220mm

Part No. TRED11R (Red)

Part No. TRED11G (Green)

Part No. TL1600

RECOVERY LEASHES

Designed specifically for locating and recovering TRED's after a successful extraction. Pack includes 2 salts.

Part No. TB1100

STORAGE BAG

Keeps your TRED's safe and stored in your vehicle's interior free from mud, dirt & sand.

ENGINEERED TOUGH

Industry leading engineering, design & analysis brings you superior strength, durability, flexibility & afterability
