Ultragrip Lamination for Digital Output

High clarity thermal low melt lamination film produced utilizing a unique two-pass adhesive metering system. This ensures superior adhesion to digitally printed products including fuser oil-based inks. Manufactured with 100% EVA adhesive and a solvent based primer for long term durability. Premium adhesive "wets out" at 240'F. This film is resistant to water, oil, acid and alkali. Recommended temperature setting is 230-250'F

for 3” Core

ScuffProof® film, is the new standard in premium scuff-protection laminate film. Different from every other type of anti-scuff film on the market, ScuffProof® utilizes new secret technology that changes the molecular structure of the film surface, through a chemical reaction, to greatly increase the hardness and durability.

Cutter Supplies

CUTTING BLADES

All cutting blades are not created equally,

PDS uses only hi-grade steel, giving longer life, better cutting results
