

Ground Level Particulate Notification Report - 02 January, 2020

Adelaide Brighton Cement, Birkenhead Works
62 Elder Road, Birkenhead, SA 501
EPA Licence No: 1126

Summary

The 24-hour average particulate matter monitoring data collected at the Community Park and Gunn Street monitoring sites during 02 January, 2020 is shown in [Table 1](#) below. The data indicates that:

- The 24-hour average PM_{2.5} concentration measured at Community Park of 26.5 µg/m³ exceeded the EPP Air criterion of 25 µg/m³

Table 1: Monitoring Summary

Monitoring Location	Pollutant	24-hour average (µg/m ³)	EPP Air Criterion (µg/m ³)
Community Park	PM ₁₀	29.2	50
	PM _{2.5}	26.5	25
Gunn Street	PM ₁₀	23.2	50
	PM _{2.5}	22.6	25

The 24-hr PM_{2.5} exceedance on the Community Park monitor is due to smoke and particulate from bush fires burning on Kangaroo Island and carried by South Westerly winds to Adelaide metropolitan areas.

Community Monitoring

Monitoring data collected at the community monitoring sites is presented in this section.

The table below shows the proportion of PM₁₀ and PM_{2.5} measured at each monitor, according to the average wind direction at the time of monitoring.

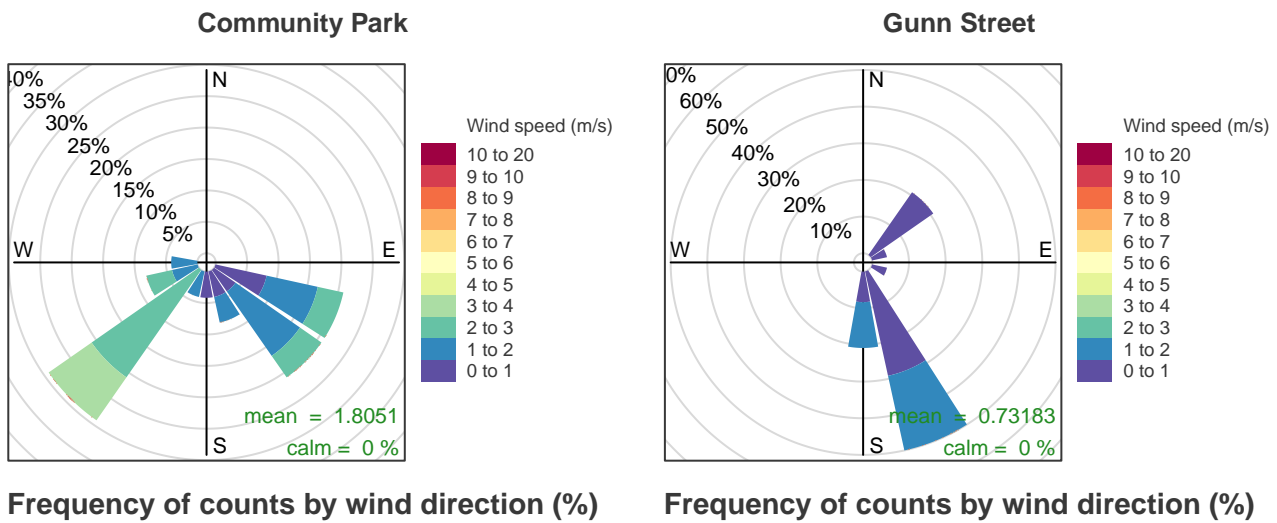

Monitoring Location	Direction	PM ₁₀ proportion (%)	PM _{2.5} proportion (%)
Community Park	From direction of ABC (WD < 180)	54	51
Community Park	From other direction (WD > 180)	46	49
Gunn Street	From direction of ABC (WD < 180)	100	100

The figures below show the time series of 1-hour average measurements throughout 02 January, 2020

The figures below show wind roses summarising the period 02 January, 2020.

The figures below show dust roses summarising the period 02 January, 2020

Meteorological Monitoring

The following figures show meteorological parameters measured¹ throughout the day.

Frequency of counts by wind direction (%)
