- ✓ Fully Licenced & Insured
- ✓ HACCP Accreditation
- ✓ AS/NZA ISO 9001

Scientific Pest & Vegetation Management (SPVM) is a 100% Australian owned and operated national company. Spanning 40 years of specialised service, SPVM provides broad-spectrum and cost-effective pest and vermin control services to clients of all sectors, requirements and scale.

Integrated Pest Management

SPVM has developed a successful Integrated Pest Management (IPM) programme which encompasses the use of specific and highly-effective products, continuous employee education and training, full compliance with the most stringent of certifications and quality management systems, such as HACCP and AS/NZS ISO 9001, and environmentally responsible work and treatment methods.

Technology & Reporting

SPVM is a licensed user of WeedReport, a web-based reporting technology which allows SPVM to offer clients industry-leading solutions for managing pest and weed control programmes. These services are cost-effective, auditable, secure and available in real-time. SPVM works closely with clients to create tailored solutions and actively-manage programmes to help eradicate pest, vermin and weed issues.

Services and Solutions

- Crawling pests e.g. ants, spiders, cockroaches, silverfish
- Flying insects e.g. wasps, flies, bees, moths
- Vermin e.g. rats, mice and other vertebrates
- Reptiles e.g. snakes
- Feral pests e.g. cats, birds, dogs, possums, foxes
- Weed prevention programs
- Weed spraying, slashing and elimination
- Weed / Pest Reporting
- Meter reading and other site services (for large client sites)

Coverage

National Coverage - SPM maintains branches in all States and Territories to provide national coverage. In some remote areas SPM will engage trusted agents to extend our reach and provide our clients with comprehensive and tailored site treatments and solutions.

Remote Commerce, Mining and Resource work - SPM are specialist providers of pest and weed management services to remote commercial, mining and resource clients; offering fly-in and fly-out capability, efficient scheduling and ensuring site specific accreditation and safety practice standards are met. SPM utilise vehicle tracking technologies to monitor driver behaviour and to maintain remote service work records in the field.

The Team

SPVM believe its people are its business. The SPVM management structure consists of MD, CFO, Regional Managers, Resource Managers, Supervisors, Sales & Marketing, HR, Purchasing, Finance, Administration, Client Services, Accounts, Quality Assurance and Health & Safety.
