Message from NT Farmers, CEO - Mr Shenal Basnayake

Welcome to Northern Australia Food Futures 2016.

NT Farmers represents farmers who have succeeded in northern agriculture, producing around \$200 million of turnover in 2015, starting from a small cottage industry in 1980. Success in northern agriculture is possible, led by good government policies, driven by markets and economics and implemented by good business models. Politicians have created a great environment for northern development. It's up to us in the community to put some meat on the bone of development, the can do and the how to.

Food Futures Conferences brings together our friends in Western Australia and Queensland to discuss development of cropping in northern Australia. Held in the Darwin NT, Food Futures is truly a northern event, with farmers from a vast area covering the Top End, the Gulf, the Cape, the Ord the Center and the Kimberley. We are all in the same development space, with common issues and common problems. Different regions have different ideas and different solutions, an important part of Food Futures Conferences.

Thank you for supporting and participating in this important industry event and we hope you enjoy your stay in Darwin.
