

INNOV8 PROGRAM - STEM IN THE EARLY YEARS

WONDER WITH US

OVERVIEW

Our Innov8 Programs are designed to upskill educators with each program kicking off with a hands-on, interactive workshop where every participant receives a tool kit they can keep and use in their classroom. After the initial workshop, participants explore how the tools in their kit and approaches and pedagogies they have been introduced to can be used in their own classroom environment. A key focus of the program is on supporting P-2 educators to successfully implement STEM based learning activities in their classroom through an inquiry based approach and age-appropriate pedagogies.

PROGRAM STRUCTURE

Kickstart Workshop -
Saturday 28th April 2018

Online Support -
8 Weeks via Innov8 Blog and
Fortnightly Webinars

Innov8 Showcase Webinar -
