# From models to decisions
Translating biomechanics research to the clinical setting

The rapid generation of patient-specific musculoskeletal models
- With low-dose bi-plane x-ray
- With the Musculoskeletal Atlas Project

_____

When to return to sport?
How to detect gluteal tendinopathy
Estimate the influence of knee kinematics on osteoarthritis treatment outcomes

_____

Data-driven decision-making and design for ankle foot orthoses
New measurement devices

Presentations will be followed by panel discussions, bring your clinical problems and ideas

facilitated by

Morgan Sangeux
The Royal Children's Hospital
The Murdoch Childrens Research Institute
The University of Melbourne

Anna Murphy
