Mental Health in General Practice Symposium

The symposium will include case studies and rotating elective workshops covering a wide range of topics including:

- Will Transcranial Magnetic Simulation (TMS) replace Electroconvulsive Therapy (ECT) treatment for depression
- bipolar disorders*, schizophrenia*, adolescents and young adults*, and Obsessive Compulsive Disorders* (choose three)
- mindfulness* or mental health issues in the elderly*
- eating disorder*, managing medications* and anxiety* (choose two)
- Panel discussion with questions and answers

* Electives

Learning Outcomes
1. Assess and manage risk in patients with schizophrenia
2. To analyse which psychotropic medications are most appropriate for a range of mental health problems
3. To comprehend how Transcranial Magnetic Simulation and Electroconvulsive Therapy can be used to treat patients with depression
4. To formulate a safe assessment plan for patients with eating disorders
5. To list the most common mental health problems for adolescents and young adults

RACGP CPD Points
40 points (Cat 1) if completion of the predisposing and reinforcing activity.
