DESCRIPTION

Augility has engaged Duratec to perform building infrastructure works at Lancelin Training Area. The scope of work includes the following:

- ▶ Conduct an UXO survey and clearance before works can commence.
- ▶ Clearing and removal from site of vegetation in approved Bushfire Protection Zones and Asset Protection Zones.
- ▶ Earthworks, trenching and backfill for services installations.
- ▶ Installation and commissioning of a waste water treatment system.
- ▶ Earthworks including backfill and compaction to raise existing ground levels to suit new building installations, and also construct swale drainage for storm water runoff.
- ▶ Installation of new electrical and plumbing services including connecting into existing water supply.
- ▶ Installation of new concrete apron, plinths and footpaths.
- ▶ Supply and installation of a new generator to suit site specific needs.
- ▶ Installation of accommodation, kitchen, ablution buildings and steel canopy plus fit a new gutter system to existing buildings.
- ▶ Installation of new security fencing including access gates.

HIGHLIGHTS

- ▶ Engaging a UXO Technician to conduct UXO scanning on site and issuing of a UXO clearance certificate.
- ▶ Works being conducted on an active Defence training area with minimal disruptions to Defence activities.
