DESCRIPTION

The Ringwood Depot is a Department of Defence facility located on the eastern outskirts of Melbourne.

The scope of works included:

Dam rehabilitation and stabilisation

- ▶ Removal of debris from the eastern dam.
- ▶ Stabilisation of the banks.
- ▶ Rehabilitation of the dam and surrounding banks.

Site wide fence replacement

- ▶ Replacement of existing security fence to three sides of the property.

Car park civil works

- ▶ Resurface of the existing car park.
- ▶ Construction of new concrete cross-over to car park entrance.
- ▶ Resurface of entrance road.

Parade ground civil works

- ▶ Resurface of existing parade ground.

HIGHLIGHTS

- ▶ Investigation of dam bed post de-watering which allowed us to uncover historical construction materials disposed in the area prior to the site becoming a Defence base.
- ▶ Co-ordinating a variation to the fencing program with the unit security officer (USO) to comply with the site security plans.
