Connecting people and place

Based in Fremantle, Western Australia, Eco Structures Australia designs, manufactures and supplies cost-effective, environmentally sustainable accommodation, strategically designed to help resort owners and operators capitalise profitably on the rapidly growing demand for unique, experiential eco travel concepts. Led by our flagship Eco Tents glamping product, our ability to understand the demands of modern accommodation needs has seen us become an international leader, from Australia to the USA, Asia, Saudi Arabia, Africa and beyond.

Be Our Guest

We know we’re selling more than tents – we’re selling experiences. We believe ecotourism doesn’t just allow travellers to see beautiful destinations - it reminds us all how important it is to preserve the precious natural ecosystems, biodiversity, and the environment itself. Everything we do is designed with your guest in mind to ensure the experiences we create are 100% authentic, shaped by the environment and driven by demand.
Never stop exploring

Eco Structures Australia has never settle for standing still. Explorers, dreamers, darers – as international icons of experiential glamping accommodation, we go beyond the limits of the ordinary to ensure your travel concept is as rewarding for you as it is for those who experience it.

With our sustainable, light on earth eco tents and cabins, resort owners and operators can capitalise on the modern travellers hunger for one-of-a-kind tourism experiences through unique, value enhanced eco assets that generate exceptional returns on delicate footprints.

Our story

In 2000, Cyclone Rosita tore through Broome, Western Australia, wiping out the world-famous Eco Beach Resort – but not the steel resolve of its owner, Karl Plunkett. Amidst the rubble and ruins, Karl conceived a vision to redesign and rebuild a completely new resort concept fusing glamorous eco design with extreme weather structural integrity.

In 2009, Eco Beach Resort was reborn as a thriving tourism ‘village’ of structurally engineered, cyclone rated, modular, demountable structures, ranging from tents, to cabins and gazebos. It was a grand accomplishment – but it was just the beginning. Fuelled by his burning desire to innovate and revolutionise, Karl launched Eco Structures Australia to change the way travellers interact with the people and places. Today, the company’s eco tents are dotted all around the world.

Eco Structures leads the way helping resort owners and operators capitalise on the modern traveller’s demand for luxurious, ‘one of a kind’ experiences.
We can help you

We’re passionate about joining you on your ecotourism journey, all the way.

• We can start at concept stage with you, working to develop your vision of a fully functioning eco-retreat drawing on our experience and industry leading products to make you the most appealing consumer choice.

• We can work with you on any size project, from the humble beginnings of a two-tent exclusive retreat, nurturing your business as your budget and vision grows.

• We can evolve your existing resort by building more rooms and new unique offerings to your already award-winning establishment.
Five (billion) star accommodation

Our rich industry experience as tourism operators has taught a lot about the beauty of nature – and its raw power. Wind, fire, floods, drought – we’ve seen it all. That’s why every one of our products are designed uniquely around your travel concept and the environment it will exist in.

**Eco Tents**

Our Eco Tents are gateways to unique experiences where guests can escape life, pause, unhook and reconnect with nature without giving up creature comforts.

Every Eco Tent can truly be custom. While all come supplied in kit form complete with all structural steel and fixings, the canvas ceiling and walls, large fly windows and doors and internal and external decking, we give you the freedom to ‘make your own’ masterpiece by hand-selecting various components that match your vision, such as Bath pods, ensuites, decking and glass front doors.
A home away from home

To ensure every Eco Tent stands the test of time, we not only guide you on the design, we treat our tents as if we were building a house. That’s why all Eco Tents are high standard, permanent structures, made to comply with the highest Building Code of Australia (BCA) standards and engineered and manufactured to the maximum cyclonic wind rating of Australia for any structure (Region D).

Standard Inclusions

- RT12 canvas walls and ceilings
- WPC internal / external flooring
- Shade net roof fly
- Floor joist and bearers galvanised 200C
- Steel structural frame – hot dipped galvanised steel
- All fixing required for install

Product Warranty

- RT12 canvas: 5 year limited warranty, estimated life 10-12 years
- Flooring external WPC board: 5 year limited warranty, estimated life 10 years
- Floor joist and bearers Blue Scope Lysaght 200C: 10 years limited warranty, estimated life 20 years
- Structural hot dipped galvanised steel frame: 15 years limited warranty, estimated life 25-50 years
The Eco Tent
Customizable, comfortable and environmentally sustainable.

- **ECO FRIENDLY**
  Can be built anywhere e.g. National Parks.

- **FAST ROI**
  Fast installation equals fast return on investment.

- **SNOW ROOF**
  High tensile stretch PVC roof.

- **FAST INSTALLATION**
  Average two day installation time.

- **MAKE IT YOURS**
  Custom design your own Eco Tent.

- **FLOOR PLANS**
  Unlimited designs & variations.

- **INSULATED CANVAS**
  High-end double insulated canvas available.

- **15 YEARS WARRANTY**
  Warranty on galvanised steel structure.

  Price on Request

- **2 × 6.3m x 6.3m with 6.3m link**
  - **216sqm under roof**
  - **Functions comfortably suitable for 100+ people**

  Price on Request.
Wabi Cabin & Villa:

Designed for all conditions

Designed as a natural evolution from the Eco Tents, our Wabi Villa and Cabin fuses the tried and tested tent structure with a lightweight PIR structural wall panel that replaces the traditional canvas, making it ideal for climate control in extreme temperatures.

Supplied in kit form, each Wabi comes with all structural steel and fixings, ceiling and walls, as well as large glass windows and doors. Thanks to the innovative panel technology, the installation time of a Wabi Cabin or Villa is similar to that of an Eco Tent.

Just like our Eco Tents, we build each Wabi as if it were a house. That’s how we create high standard, permanent structures that stand the test of time in any conditions around the world, from Rottnest Island to Karijini National Park, the jungles of Costa Rica, the coastal deserts of Oman, the pristine white beaches of the Virgin Islands, the mountains of China, and everywhere in between.

Why WABi:

• Make something beautiful with sophisticated designs that are both stylish and flexible
• Built tough to stand strong in a range of uses and environments
• Stay cool or cosy with high thermal performance
• Fast delivery to your site
• Slashed construction costs and time.
Simpler, Smarter, Stronger, Faster than any other comparable building system.

Wabi Villas and Cabins are architecturally designed and affordable, making them also ideal for more traditional housing uses including:

- Weekend retreats
- Workers accommodation
- Private sites
- Holiday parks
- Community housing.

All Wabi Villas and Cabins include those ‘must have’ features such as LED lighting, stone bench tops and fully tiled bathrooms. Wabi structures can be clad, painted, molded or fitted with your choice of traditional external finishes from render to weatherboard, to create a huge array of final looks.

Our unique panel system is simpler, smarter, stronger, faster and more affordable than any other comparable building system in the world.
Canvas

Our unwavering commitment to quality has seen us carefully select and choose our canvas to deliver you the kind of value you demand out of your investment. Made of Rhino Tuff Fire retardant 12oz canvas as standard (not just available as an upgrade), our Eco Tents are rot resistant, waterproof, water repellent, fire retardant, and breathable, with a greener footprint.

Benefits of our canvas tent:

- Ideally suited to the outdoors
- Durability
- Longevity
- Sturdiness
- Breathes better than synthetic fabrics
- Retains its shape and colour
- Classic look and colour.

You can invest with confidence knowing Rhino Tuff Fire retardant 12oz canvas is supplied under license by a handpicked, ISO9001 accredited factory in India, which supplies 30-50% of all canvas that goes to the USA, and 30-40% of all canvas that comes to Australia.
Your eco experience should be appreciated whatever the weather. Extend the glamping season with our Snow Roof, engineered with extra strength with a high tensile membrane structure to handle heavy snow loads and pitch designed so the snow does not accumulate on the roof. You can leave the tent up all year, eliminating time-wasting pack down and re-pitching, while enhancing your chances of maximising your yearly returns.
Stamp your own design and flare with our bath pods. Prefabricated in a controlled environment to ensure workmanship meets the highest standards, the systems can reduce on-site installation time from months to a matter of hours, so you can start booking sooner.

- Flexible: Fits any Eco Tent or Cabin
- Easy install: Connects directly onto Eco Tents/Cabins
- Cost-effective: Cheaper than conventional bathroom systems
- Fully tested: Tested to meet and exceed regulations
- Worldwide shipping: Developed to fit inside shipping containers.
Ensuites
Bathrooms are rooms that signify luxury and ‘me-time’ in today’s world. We’ve taken that thinking to offer guests the chance to bring life’s luxuries along on the journey with them. Your Eco Tent can be upgraded with one of our three ensuite choices:

• The Kakadu
• The Sahara
• Add-on Enclosure

Add-on Enclosure
Add-on enclosures are the ideal solution for developers on a budget, operating in remote areas or the savvy hotelier looking to create an eco-retreat with an earthy, outdoor feel.
As an extension of your Eco Structure tent, the add-on enclosure, with its canvas walls and ceilings over hot dip galvanized steel frame components, complements the tented resort look of your development whilst offering your guests a bathroom retreat to restore and revitalise after a long day of adventure.

The Kakadu
The Kakadu is a true crowd pleaser. The design is functionally flawless, using our patented panel system to the walls and ceilings. With a spacious Aeros Shower Unit, freestanding vanity unit with integrated vitreous china top and closed couple toilet suite all ensure the luxuries of home travel with your guests.

The Sahara
For the ultimate in premium ensuites, treat your guests to The Sahara. We’ve created a level of comfort reminiscent of a hotel room with impeccable detail throughout this indulgent bathroom. The Sahara is a true game changer in the glamping scene that creates a soul restoring sanctuary for guests.
Make your own masterpiece

Eco Structures offers a range of fully customisable eco solutions, designed to exist in harmony with each site’s natural surrounds to enhance the guest’s sensory experience. Make your own masterpiece by choosing from the below add-ons:

- Eco Decks
- Ensuites
- Gazebos
- Walkways
- Glass Front Doors
- Heating & Cooling
- Enclosures.

Eco Decks

Our eco-friendly Eco Decking is manufactured to the highest standards and used in resorts all around the world. As a high-quality wood-polypropylene composite product that will not rot, is termite resistant, requires none or very minimal maintenance and is guaranteed for 10 years, Eco Decking can be used for internal flooring, verandas, walkways and pool areas in your ecotourism concept.

Eco Anchor

The Eco Anchor is patented technology unique to Eco Structures that offers an innovative concrete free foundation system. This saves time and money by allowing Eco Tents to be installed with ease in remote, undulating environments.

Here’s how it works. The four drive rods of the Eco Anchor are driven into the ground using a pneumatic hammer, forming a structurally stable and level foundation system in a fraction of the time and a third of the cost of conventional concrete foundations. The Earth Anchor connects to the adjustable base plates of the Eco Tent steel floor frame, allowing for 100mm of adjustment for ease of obtaining final level on site. If the ground is undulating, 1-metre long sleeve extensions are utilised that simply slip onto the Eco Anchor steel stumps and columns during install, and if needed, cut to the required length on site.

With minimal impact to the ground surface combined with an extremely small footprint, the Eco Anchor is the environmentally friendly alternative to the conventional foundation systems.

Linked Structures

Our Eco Grow concept allows you to link tents, cabins and modules together to grow your accommodation project as your business evolves. Tents and modules can be grown via hall/walk/breeze ways or joined at the eave lines to create your own unique designs – simply dream up your design to best suit your needs and we’ll help make it a reality.
Gazebo
Extend and enhance your outdoor living space with our 3x3m Eco Gazebos, perfect for beach shade shelters or undercover shady cooking/eating areas. Simple to construct, eco friendly, cost-effective, low maintenance and easily transportable to anywhere in the world, they come flat-packed with all structural steel, all fixings and a 95% UV block out commercial grade shade roof.

Walkways
Minimal impact is a key philosophy of the ecotourism movement. So tread lightly with our attractive and highly durable Unique Walkway System. Made from a composite, renewable material that combines polyethylene and organic rice husks to reduce deforestation, the system arrives to you flat packed and ready to be bolted together, saving costly on-site installation time so you can take bookings sooner.

Glass Front Doors
Enhance your glamping experience and frame your beautiful views with glass sliding doors. Our Australian designed and manufactured sliding doors and windows are high quality and long lasting, made to meet the highest wind Region D standard and designed to fit most climatic situations.

Heating & Cooling - Insulated Canvas
Climate control ensures your guests can enjoy complete comfort, whatever your destination's outside conditions. You can heat and cool your Eco Tent just like at home at a surprising level of efficiency. It's all thanks to the clever canvas construction. Unlike glass that absorbs heat and cold and will need to reach ambient air temperature before the room will start heating or cooling to the desired temperature, canvas maintains the ambient air temperature. This speeds up the process and means your room will heat or cool down almost instantly.

Add-on Enclosures
With our add-on enclosures, we make it possible to start small and evolve over time by installing new rooms on any side of the Eco Tent, at any time. Choose from:

• Bathrooms
• Bunk rooms
• Storage
• Kitchenettes
• Sitting areas
• Increasing internal floor plan.
Ways we add value

Eco Structures is all about value enhancement, not simply selling tents. Our real world experience has taught us industry lessons that eco tent suppliers simply wouldn’t understand. So if you’re serious about creating a travel concept that is as rewarding for you as those who experience it, you need to know that true value goes beyond price alone.

**Design**

Our internal design team can manage your project from end-to-end, from the initial design concept through the complex authority approvals process, even providing you with a set of approved documents ready for construction.

**Architectural Design**

We can assist you with all levels of concept design including internal room layout, finishes and overall tent layouts on your property.

**Master Planning**

For the larger scale or specialised case sensitive projects we can work collaboratively with your appointed development team or provide recommended specialists who you can work with directly. Alternatively, we can manage on an outsourced basis.

**Council Approvals**

We have a thorough understanding of the compliance requirements of our product, including Tourist park accommodation. Tourism accommodation, Communal facilities and Education camps. We can provide you with preliminary advice or manage the complex council approvals process on your behalf, allowing you to focus on the overall project and/or the operation of your existing facility.

**3D Renders**

We can deliver high-resolution pre-visualisation imagery of your project as required.

**Interior Design**

It’s time to get creative. Stamping your own style of furnishings and fittings can elevate your Eco Tents and Modules to another level of luxury, with the flexibility to ‘make your own’ masterpiece.
Success stories

Eco Structures Australia has built for customers around the world, meeting the needs of diverse environments, climates and terrain, from the red coastal cliffs of Australia, to the jungles of Costa Rica and mountains of China. We invite you to see how we bring different experiential travel concepts to life by staying true to quality, innovation, service and experience.

INVERLOCK BIG 4
Victoria
Inverloch Big 4 Holiday Park customised a range of 6.3m Deluxe Eco Tents, working out to $45,395 each. With each tent generating $32,000 in the 2016-17 financial year, Inverloch paid off their investment in just their second year of booking.

“The Eco Tents have brought a new dimension of accommodation to our family orientated Holiday Park. We have had them occupied for 38% of this financial year and they have each earned more than our budget end cabins.”

Ray and Adrian Edwards – Inverloch Big 4 Holiday Park

VINETREE HONGHEGU TENTED RESORT
China
Vinetree Honghegu Tented Resort is located in the Rustic Shitou village, Jiayin Town, Honghe County, Honghe Prefecture, above the ruins of an ancient village where modern tents sit alongside old buildings. The resort boasts 17 rooms, bath facilities, and public spaces combining the culture and history in such a way that it tells the story of the Hani ethnic group’s epic migration and terraces history.

“We chose Eco Structures due to their aesthetically pleasing sustainable products and the flexibility in their system, which allowed us to custom design multiple layouts, orientations and finishes to suit our resorts site conditions and climate.”

Koko Tang - Vinetree Tourism Development Co. Ltd

OLIO BELLO
Margaret River
Located on 320 acres of certified organic olive farm in the heart of Margaret River surrounded by 8000 olive trees and 14 unique olive groves, Olio Bello sought to transform its visitor experience with a Lakeside Glamping concept - the first time in the company’s 30 year history that visitors will be able to stay on the award-winning property.

“Its all about getting back to basics and providing an authentic farm and tourism experience. Luxury is rapidly being redefined and people are changing the way they want to spend their weekends and holidays.”

Dr Garry Garside - Olio Bello
New frontiers, not just awards.

The true innovators of the world chase new frontiers, not awards. That makes our achievements wonderful recognition for our dedication to ‘go beyond’ traditional ways of delivering eco-tourism accommodation.

**Special moments:**
- Inducted into the Australian Tourism Hall of Fame for Unique Accommodation (2013)
  - Unique Accommodation Development
  - Ecotourism
  - Sustainable Tourism
  - Indigenous Tourism
  - New Tourism Development.

**Our award-winning resorts:**
- Karijini Eco Retreat
- Ramada Eco Beach Resort
- Sierra Escape
- Olio Bello
- Lady Elliot Island Eco Retreat

We are also proudly members of Ecotourism Australia, ensuring our products are certified and backed by a strong commitment to sustainable practises providing high quality nature-based tourism experiences.
