

VIXEN

AUSTRALIAN HARD

AH

NEW

ALTERNATIVE TO:

BECKOM  CONDO 
 SPITFIRE  SUNMATE 
 SUNTOP 

SOUTH-EASTERN ZONE 2018

Variety Overview

VIXEN  (IGW4279) is the highest yielding, early-mid maturing (similar to Spitfire) AH wheat in the South-Eastern region. VIXEN  offers a significant yield advantage, on average, over CONDO  (approx. 5-6%) and SUNTOP  (approx. 11%) based on NVT MET yield performance. Long-term NVT MET data also indicates yields are slightly higher, on average, than BECKOM .

VIXEN 's early-mid maturity is ideally suited to sowing from mid-May onwards. In addition to the variety's stand-out yield performance it offers good stripe (MRMS) and stem (RMR) rust and yellow leaf spot (MRMS) resistance. VIXEN  also has strong physical grain characteristics. It has a good grain size and produces low screenings. VIXEN  also has a medium plant height, providing reduced stubble loads in high yielding environments.

VIXEN  is available for planting in 2019 from local Seedclub members and resellers.

A cunning variety for those looking to win the early-mid maturing, AH wheat race.
