

Printing Instructions

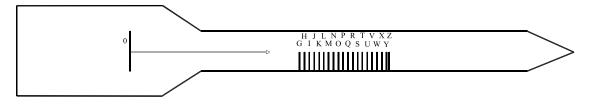

- 1. Print this file with the instructions.
- 2. Set the scale to 100% before printing and don't select any option similar to 'scale to fit' or 'fit to page'.
- 3. After printing, verify the page scale by measuring the following scale using a ruler. The scale in the printout should be equal to the real scale.

Method A - Using a Plain Paper Strip

- 1. Cut a paper strip and wrap around your finger at the largest section.
- 2. Mark the point where the paper overlaps using a pen.
- 3. Measure the strip in millimeters and then select the corresponding ring size from the circumference of rings shown in method C.

Method B - Using Finger Measurement Tape

- 1. Cut along the outline of the measuring tape and a slit along the zero line.
- 2. Wrap the measuring tape around your finger at the largest section of your finger (numbers should be facing out).and insert the end through the slit. The ring should be comfortably slide onto the finger over the knuckle. Do not let it be very tight or very loose.
- 3. The reading at the overlap is your ring size.

A note for Method A & Method B - Measure the finger at the end of the day when it expand to its largest size.

Method C - Using an Existing Ring

- 1. Find a ring which fits to the relevant finger.
- 2. Place the ring in the circles below and find the mamtching size.
- 3. The inner edge of the ring should fit with the corresponding circle.
