

# AWNINGS

## Alpha Straight Drop Awning

### Atlas Alpha Straight Drop Awning

The Alpha straight drop is an external awning designed for areas where there are no mounting points such as walls or posts. The awning is operated by either crank control or can be motorised for ease of operation.

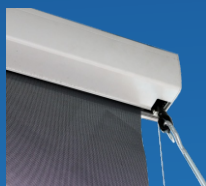

The awning skin drops vertically and is held in place by simple easy to use straps with sliding mounts attached to the floor. A modern industrial look can be attained by eliminating the aluminium headbox

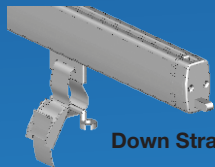

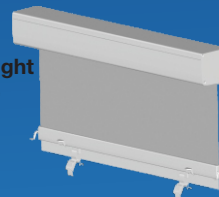

Alpha Head box & crank

Straight Crank Control
