Atlas Autolock Awning

These fabric roll-up awnings provide a soft and stylish look for your shading issues while also protecting your carpets and furniture from direct sunlight.

The Autolock awnings style gives you the flexibility to adjust the shade in your home on an hour to hour basis. They also contribute to reducing your household heating and cooling costs whilst adding a degree of privacy. Depending on your location we can provide you with a range of fabric and component options.

Our standard awning is constructed utilising a colorbond headbox in a choice of four colours with galvanised steel guide rods. For coastal and waterway areas we can provide Aluminium or Stainless steel headboxes and stain less steel guide rods. All sliding arms are extruded aluminium with high impact resin fittings.

You can choose from our selection of Mesh, Canvas or Acrylic fabrics in a large range of colours. Powdercoating of headbox and frame is also available as an option.

- Easy manual adjustment to any height
- Sliding arms can range from a 200mm to 800mm stand out
- Fabrics range from 90% to full block out
- Designed to suit your local environment
- Full shade or up and out of the way
- Option without headbox – stainless steel or galvanised bracket
- Comes with optional stainless steel fittings ideal for coastal area
