Adidas Touchdown gives you 103 outstanding features before you even get off the ground.

Running around on turf
can be a crashing bore if your
sole can't come to grips with it.

In fact, some soles that boast grip can leave you without a leg to stand on – and give you a taste of a different kind of traction entirely.

Adidas believes in the whole of your body. We also believe we can do your whole body a big favour just by building Body Science into every shoe we make - from the sole right through to the lacing eyelets.

And, in those few words, you have the essence of Body Science: the science of taking your feet off your mind.

1. In Adidas Touchdown, a shoe designed for all traction sports from jogging through to touch football, Body Science shows itself in a unique sole that grabs deep into turf and holds you there. All up, there are 103 traction studs to keep you up and running while other shoes are likely to just slip around. The careful configuration of the studs also significantly cuts down on the body shock of running on harder, less forgiving surfaces.

So now you can run and keep running without the slightest worry that your shoes will let you down.

**Adidas Touchdown gives
you more Body Science in one
budget-priced sports shoe
than all the runners-up
combined**

We would need
pages to

explain all
the Body
Science

we've built into our Touchdown sports shoe, so let's make the best of the space we've got and take a quick look at the sort of thinking that keeps Adidas ahead.

We've already talked about the 103 outstanding features of the grabby Touchdown sole. But that's just the ground floor story...

2. An EVA wedge, a vital 3mm higher than other so-called traction shoes. This extra elevation helps absorb the step-by-step body-shock of hard running.

3. Open toe box construction – for the freedom of movement so necessary in most turf sports

4. Built-in heel counter protects the Achilles Tendon and provides stability on the run.

5. The Three Stripes.

The famous symbol of Adidas Body Science

Put them all together and you've got a jogging-sports shoe that embodies the very essence of Adidas Body Science.

Touchdown from Adidas:
the people who have made a
Science of the Body since 1920

Available for well under \$35 now - from retailers who take your body seriously.

Of course, Touchdown is only one of the Adidas Body Science range.

To find the right running shoe for the right running job, you just can't go past Adidas.

This image shows a blank, aged, cream-colored page, likely an endpaper or flyleaf of a book. The paper has a slightly textured appearance with some minor creases and discoloration, characteristic of old paper. A small dark spot is visible near the top left corner. The left edge of the page shows the binding of the book.
