TRAINING etc., A.A. BATTERIES.

It is necessary to report that the continued demands on A.A. Batteries for personnel have brought about the present position that the A.A. Batteries cannot be considered to be of any use for active service - any attempt to engage an aircraft would be farcical. This position will maintain for a considerable time. There are not sufficient N.C.O. instructors of reasonable standard of knowledge left to train recruits and while O.C's are naturally making every effort to recoup the position, limitations of personal endurance are now in evidence. The superimposing of an additional Battery (28) only serves to create an additional burden to no purpose whatever, unless the appearance of A.A. guns with untrained crews as a "token" is expected to delude either the civilian population or hostile forces with a semblance of effective defences.

These defences have supplied and will have supplied by 31 JAN. 18 Officer of all ranks out of an establishment of 24. The replacements will absorb all the possible 1st. appointments (one recommendation which will be forwarded shortly was a MESS Orderly 12 months ago); 34 Sgts. have been provided out of establishment of 42 (the balance are or will be commissioned); 46 Bdrs. have been provided out of establishment of 66 and practically the whole of specialists available - those not sent away have been promoted to N.C.O. rank. Approximately 360 O.R. have been provided from strength of 620 and of the balance left after taking out administrati personnel, Cooks, orderlies and the like, each Battery has approximately50 gunners from which junior N.C.O's can be found if personnel are suitable for promotion, but must be trained for their ranks. Unfortunately the majority of the balance left are "duds" excluded from previous drafts.

It will be appreciated that the demand for "fully trained" personnel for the most recent contingent cannot be complied with unless N.C.O's are to be disrated for the purpose.

This H.Q. arranged the transfer of 2 00 men from A.A. Coys on 23 DEC. and has received 100 recruits from R.R.D. the past fortnight. These men together with the "duds" referred toabove are now the sole source of supply for further demands and if further sections must be supplied they will be untrained both in respect of N.C.O's and men.

The proposal to conduct A.A. practice will be postponed for at least two months - the provision of the latest draft - even though it involved only 3 N.C.O'xs and 15 Gunners from each Battery renders a shoot a waste of ammunition at this juncture.

It is strongly recommended that the raising of 28 A.A. Battery be postponed for at least 6 weeks to two months and that Laverton A.A. Station (now closed) stay closed until 28 A.A. Battery is raised and can take it over - it has been an undue burden on 10 A.A. Bty.

	17/2/42		This H.Q. regards this message as very unsatisfactory and one which renders A.A. Defences Melbourne and Yallourn inoperative unless bombs are actually dropped. A request was forwarded from this H.Q. asking for a definition of "hostile manner" and "does straight line flight of unidentified plane constitute hostile manner". A telephone communication was rec. from Melb. L. of C. stating that S.Comd. would not give a definition of hostile manner. A letter has since been written asking for clarification in the matter.	
	18/2/42.	0830	Approx. 50 personnel from Melbourne University Rifles join 28th. Battery at Williamstown Rifle Range.

UNTRAINED A.A. PERSONNEL.

Ref. message A.6364 Army H.Q. to Base S. Comd. of 11 Feb.

"Representation to the Minister strongly protesting
"against alleged untrained A.A. Personnel now at
"Royal Park being sent to tropical Territories.
"Urgent investigation and report desired."

It is assumed that this refers to personnel provided for "Monteiths Shadow" Force raised vide. SM.1130 of 20 JAN. '42. Many of these men were untrained. This was due to the demands made on 4th., 10th. & 11th. A.A. Batteries for personnel for Northern Stations. The position was :- at 13 Dec. '41.

Consequently at the time "Monteiths Force" was raised, 265 O.Rs. (89 NCOs. & 176 rank and file) trained and part trained, (of whom 90(approx) were A.A.L.M.O. personnel not required for any of these drafts) were available for this force. Of the personnel supplied for "Monteiths Force" the average had about one months technical training, some less and a few considerably more. The Officer detailed by A.H.Q. to take command, Captain Wook, (Staff Corps), (himself completely untrained in A.A. Gunnery), took objection to some of the men and he was informed by Staff Captain in the presence of O.Cs. 4th. & 10th. Batteries that he could take the pick of any men available in either Battery and the exchange of a few men was effected, but at the time it was clearly stressed that he could not expect to get any higher standard of training than already provided. After provision of all these drafts and replacing Officers and NCOs. each Battery had approximately 12 gunners left who had had any training (excluding A.A.L.M.O. personnel).
The gravity of the position so far as the manning of these A.A. Defences is concerned, was reported to C.C.R.A. S. Comd. on 20 JAN. prior to raising of "Monteiths Force".

1. Restricted Flying Areas.

(a) MELBOURNE.(CIVIL)

An area within a radius of 15 miles from GELLIBRAND LIGHT (955288).

(b) MELBOURNE. (R.A.A.F.)

An area within a radius of 15 miles from GELLIBRAND LIGHT (955288) excluding the segment of this circle which lies to the West of 850 Grid.

Lanes of exit and entrance to ESSENDON aerodrome (940473) (RA.A.F. and CIVIL) are 2000 yards wide on
(i) True bearing 147 deg. from ESSENDON aerodrome
(ii) " " 293 deg. " " "

Lane of exit and entrance from FISHERMENS BEND aerodrome (953348) 2000 yards wide.
True bearing 147 deg. from FISHERMENS BEND aerodrome.

(c) YALLOURN.

An area within a radius of 5 miles from POWER STATION. (R.A.A.F. Fighter aircraft only may fly over this area and then must "warn in" through C.D.H. which will advise A.A. Ops.)

2. NO CIVIL aircraft may at any time fly in the restricted flying areas save on the lanes of exit and entrance and then at a height NOT exceeding 1500 feet or below the cloud base which ever is the lower. Prior notification of the movement of aircraft over restricted areas must be given.

3. R.A.A.F. Aircraft are subject to restrictions as follows:-

(a) Non-Operational flying - as for Civil aircraft (para 2)
(b) Operational and training flying - as for Civil Aircraft (para 2).
(c) Operational and training aircraft engaged in training - as for civil aircraft (para 2).
(d) Operational Flying:-
(i) Fighter and G.R. Role NOT to enter restricted areas unless prior warning has been given to Ground Defences.
(ii) Bomber role - Prohibited from flying over restricted areas.
(iii)A.C. Role - " " " " " "

4. RECOGNITION SIGNALS. If an aircraft is mistakenly engaged by A.A. Defences or inadvertently flies in A.A. Gun defended areas under conditions prejudicial to visual identification the two star cartridge may be used during the day and the letter of the period by night. The former method may be used by night if the latter is of no avail.
In addition to the use of signals, aircraft may be considered friendly provided there is no evidence of hostile character if -
(1) Flying on a lane of exit or entrance at a height NOT greater than 1500 feet or below the cloud base whichever is the lower.
(ii) Flying in line astern on a level course.
(iii)Flying with undercarriage down.
If an aircraft is engaged by A.A.S.L's. the letter of the period is to be signalled by the aircraft. If the A.A.S.Ls. do NOT dowse the two star cartridge is to be fired by the aircraftbut only in real emergency.

AUSTRALIAN WAR MEMORIAL AWM2019.366.2095

ORDERS FOR ENGAGEMENT OF AIRCRAFT.

5. G.P.O's will therefore engage by fire :-

(a) Any aircraft recognised as hostile,

(b) Any aircraft acting in a hostile manner which is NOT clearly recognised as friendly. Acts which can be construed as "hostile" are:-

(i) Dropping flares over land (within 50 miles of the coast) or sea (within 10 miles of the coast, except by direct arrangement with the local Combined Defence Headquarters (or Fire Control Commander, where a C.D.H. does not exist) giving at least 48 hours notice.

(ii) Opening machine-gun fire on ground, sea or air targets (except when flying over a prescribed air firing range).

(iii) Dropping any type of explosive or incendiary missile, whether parachute borne or not (except when flying over a prescribed bombing range).

(iv) Dropping parachutists except from an aircraft obviously out of control.

(v) Power diving on a defended point with undercarriage retracted (except when friendly aircraft are co-operating with our own defences for pretice purposes).

(vi) The movement of any aircraft in a restricted or prohibited area (except when in restricted areas prior notification is given to the Combined Defence Headquarters concerned, or when the aircraft is recognised as friendly).

NOTE. The above list is not to be regarded as complete, but rather as a general guide.

H.Q. A.A. DEFENCES. OPERATIONAL INSTRUCTION No.4.

A.A. BARRAGE TABLES - A.A. DEFENCES MELBOURNE.

1. Herewith:-
   (a) Orders for the Engagement of Aircraft by Barrage Fire.
   (b) Barrage Table for A.A. Defences Melbourne.
   (c) Pro formas for barrage data to be used for the control of fire from each gun station.

2. (a) BARRAGE TABLE - A.A. DEFENCES, MELBOURNE:

This table shows the location to be covered by A.A. Barrage. A map reference is given for each location and a zone letter. The area of each zone is determined by a circle with a radius of 450 yards with the map reference as its centre. The gun stations, listed in column 4, are responsible for firing the barrage covering the various zones. Guns will fire the barrage at maximum rate of fire, for the period stated in column 5. Barrage will sweep slowly to and fro across zones. The gun stations set out in column 6 are responsible for the control of barrage fire over the respective zones.

Messages calling for barrage fire will be made to H.Q. A.A. Defences - e.g.
"NIBO (2) firing barrage zone A 3000"
H.Q. A .A. Defences will then order other gun stations concerned (ref. column 4) to fire barrage e.g.
"To KOGA (1)
Fire barrage zone A.3000 "

Should the control O.P. gun station (ref. column 6) consider the barrage - say 1000 feet too low - it will then call H.Q. A.A. Defences e.g.
"NIBO (2) raising barrage zone A. to 4000 feet".

(b) The following points will be carefully noted:-
(a) The control O.P. will make its own decisions to open fire, at the same time advising H.Q. A.A. Defences so that fire can be called for, from other stations (ref. column 4).

(b) The Control O.P. will make its own decision to raise or lower the height of the barrage according to the observations of the G.P.O., and will, of course, advise H.Q.

(c) If the Control O.P. considers the barrage should stop before, or continue after, the standard period of time as stated in column 5, he will advise H.Q. A.A. Defences e.g.
"Stop barrage zone A."
or
"Continue barrage zone A" for a second period".

3. Pro forma for Barrage data
Batteries will be responsible for the preparation of barrage data, copy of which will be held at each gun and by G.P.O. One copy will be forwarded to this H.Q.

4. The attached pro formas are largely self explanatory. Any matters requiring clarification will be referred to this H.Q. IMMEDIATELY.

5. All barrage data will be prepared I M M E D I A T E L Y.

Williamstown	5/3/42	2100	Night shoot postponed because of rain. It was decided to use ammunition allocated for night shoot in further day practice.	
	6/3/42	0900	Lt. Larkin from 3 A.A. Bty. Singapore attached this H.Q. pending appointment to some other Unit.	
		1400	Practice shoot continued. Drogue again shot down. Taken as a whole and considering that the Batteries were, in Dec. last, depleted of all but about 20 trained men, the practice was of a satisfactory standard.	
	7/3/42		H.Q. A.A. D. Training Instruction No. 8 issued.	
	8/3/42		Nil	
	9/3/42	1400	An attempt was made to proof the 3.7" mountings at Coode Is. For this purpose some special rounds of paper shot ammunition were used. Three rounds were fired from No.1 Gun and one round from No.2. It was then observed that the inner surfaces of the liners of both guns were severely damaged The lands of the gun were very much battered. An effort to pass a guage plug through the bore had the following result:- No.1 Gun - would move 18" up the bore. 2. " - would not enter the bore. It would appear that the shot inside one projectile consisted of steel pellets instead of lead pellets. How steel pellets came to be in the projectile should be the subject of exhausting enquiries. Two new liners had to be placed in the guns.

	15/3/42	1045	Unidentified plane flying in prohibited area engaged by Nth. Williamstown gun station. Fifteen rounds were fired. No other stations engaged this plane as they were able to identify it as an American O.47. No reason for the 'planes presence in the restircted area has been given this H.Q. The number of aircraft failing to observe the restrictions is fairly large. These breeches cause considerable inconvenience on gun stations as alarms are raised when planes are sighted without a "warning in" having been received.	
	16/3/42	1600	L.M.G. Section 11th. A.A. Bty. moved to Melb. to take part in L.M.G. practice with drogue target.

H.Q. A.A. DEFENCES. TRAINING INSTRUCTION No.8.

Four matters requiring MORE ATTENTION. March 7th. 1942.

1. CONFIDENCE IN EQUIPMENT. After witnessing and taking part in the recent practice shoot, all ranks should have considerable confidence in the equipment used. This confidence can be further increased by giving all personnel extra and more detailed instruction in their equipment and its functions.

2. Thorough TRAINING.
A.A. Training must now become more thorough and more attentive to detail. There are many rough spots to be eliminated before gun sections could be classed A.1. G.P.Os. and Nos.1 must be more flexible i.e. they must be prepared to meet calmly and easily, situations which are not laid down in Vol.1. Changes in methods of fire control should be effected smoothly and without flurry. Men must be trained with more insistence on DETAIL.

3. DISCIPLINE.
High standards of discipline must be achieved. Putting it very briefly, those in command must at all times have 100% control; and must have so impressed and trained those under them, that they will willingly and expertly follow any lead given. But remember A LEAD MUST BE GIVEN. Make your own mind up - don't wait for something to happen. Discipline, then, depends on leadership. The qualities of leadership are many and are covered fully in many publications. In some men they are very apparent - these men should be studied and imitated.

4. THE AGRESSIVE SPIRIT.
The agressive spirit is more than ever necessary today. Don't wait to be attacked - hit first; and if you are hit back then hit again - and harder. The development and fostering of the agressive spirit should have high priority in all training programmes. "Hardening training" will assist. In this regard very little has been done by Officers to implement H.Q. A.A. Defences Tng. Inst. No.6 issued 6 Oct. 1941. The activities outlined in para 2 Tng. Inst. No.6 are to be included in all syllabi from this date on. Periods covering (a) to (f) could be allotted after 1630 hrs. so as not to interfere with normal A.A. Training. Regarding bayonet drill (para g) - at least three hours per week will be done by all ranks. Dummies and "mad minute" course will be constructed immediately. Trained bayonet instructors can be made available to Units by this H.Q. for advice regarding the construction of bayonet courses, dummies, training sticks etc. and for instructional purposes. One other point about this "Agressive Spirit". Use it not only against the Japanese, but against anyone or anything which threatens to interfere with the efficiency of your Unit or your Section. Many difficulties not initiated by our external enemies, are constantly arising - they must be overcome. In this regard, if you are sure of your ground, be no respecter of persons, customs or obsolete and obstructive "rules and regulations".

5. Remember then,
   (a) Instil in your men maximum confidence in their equipment,
   (b) Let no detail, however minute, be overlooked in Training.
   (c) Achieve discipline by leadership and example.
   (d) Be agressive yourself and infuse into your men an agressive, off ensive spirit.
