RE UNIT FUNDS G.R.O.F251.

It is advised that this unit conducts their own canteen, the turnover of which is quite considerable.

At present an A/c is operated with the local bank.

It is requested that permission be granted to this battery to continue using this bank account.

It would be impossible to conduct this canteen successfully if we have to use the method provided in the above G.R.O G.R.O., owing to the fact that the nearest Paymaster is 250 miles away, and this account would need to be operated on each day, otherwise large sums of money would have to be held while awaiting the return of the Unit Book.

It is requested that permission be given for the Officer's and Sergeant's Mess Funds to be operated through the Local Bank.

AUSTRALIAN MILITARY FORCES.

UNIT - 26th AUST A.A.BTY. LOCATION - WIVALDA.

BATTERY ORDER NO 49.

BY CAPT R.L.HOOPER, COMMANDING 26th AUST A.A.BTY.

DATE - 28th DECEMBER 1942.

1. POWERS OF SENTRIES AND GUARDS.

Regulation 88 of the National Security (General) Regulations provides that, without derogating from or restricting the existing powers or rights of sentries and guards, a military sentry or guard stationed or posted at, on, in, or in the neighborhood or vicinity of, any prohibited place, protected area, controlled area, or any premises used by the Commonwealth, or used for defence purposes or for essential services, or any vehicle, vessel or aircraft used by the Commonwealth, or any enclosed wharf or picking up place, or any merchant vessel lying in port, or any road, pathway or waterway, specified in an order by the Minister, which passes through or near a prohibited place or work of defence, may be armed, and may -

(a) Use his weapons against, or otherwise attack, any person who, in disregard of a warning given by a sentry, or guard approaches, enters, leaves, or passes over or in the vicinity or neighborhood of, or attempts to approach, enter, leave or pass over in the vicinity or neighborhood of, that place, area, premises, vehicle, vessel aircraft wharf, picking up place, road pathway, or waterway, or who, after being arrested for doing so, escapes; and

(b) use his weapons against, or otherwise attack, any person attacking him or who is reasonably suspected of being about to attack him.

There are however, certain principles which must guide all sentries and guards in the execution of their duty as such, and in the exercise of the right to resort to arms.

These principles are :-

(a) Sentries and guards will be ordered to take any action required to ensure the safety of their posts or to defeat the activities of enemy, or suspected enemy, agents.

(b) If necessary, they will fire upon or otherwise attack any persons threatening the safety of their posts or engaging in hostile actions.

(c) Before firing upon any person, the sentry or guard will except in an urgent case of self-defence, challenge that person to "Halt". If that person does not halt, the sentry should challenge him again with "Halt or I fire". If he does not halt, and no other means are available for stopping him - as for example, by calling on the rest of the guard - it is the duty of the sentry to shoot.

(d) The sentry will use his intelligence and sense of responsibility in choosing whether he will shoot or not, and he must be careful not to allow any suspected person to approach so close that he can be rushed and overpowered.

(e) Guards of enemy prisoners of war. An enemy prisoner of war attempting to escape may be fired upon, but a previous summons to surrender will be given if possible.

(f) Guards of members of the forces in custody. The use of weapons to prevent the escape of a prisoner (other than an enemy and except as provided above) is unlawful unless -

(i) the prisoner has committed a felony and cannot otherwise be re-arrested; or

(ii) it is necessary for self-defence, and no more force is used than is reasonable in the circumstances.

(g) If a prisoner resorts to violence, force may be met by force to the extent reasonably necessary, and the escort may call for help from passers-by.

2. DANGEROUS ENCLOSURES IN PARCELS FORWARDED BY POST.

(a) A fire aboard a ship carrying valuable supplies, including explosives, was caused recently by spontaneous combustion of wax match s included in mails for Army personnel.
(b) All members of the forces will be instructed to request their relatives and friends not to forward wax matches or charged petrol lighters to them through the post. The dangers stated ab above will be explained to troops.
(c) Franking officers will delete any request for for wax matches or charged petrol lighters from letters.

BY CAPT. R.L. MOORFOOT COMMANDING 26th AUST. A.A. BTY. - 3/1/43.

1. BATTERY ORDERLY.

Bdr. L.G. Palmer.

2. UNAUTHORISED INTERFERENCE WITH EQUIPMENT.

a. Several cases have occurred recently where minor defects in technic equipments have been converted in major defects by unskilled attempts at repair at repair by unauthorised personnel. In particular, clocks and watches which should have been repairabl have had to be condemned as unserviceable because unskilled tampering has aggravated the original damage or caused further breakage of sound parts.

b. As spare parts for certain instruments, particularly watches and clocks, are almost unobtainable, such tampering results inloss of equipment.

c. Previous orders forbidding the repair of technical equipment of all kinds by unauthorised personnel will be strictly enforced.

3. PRESERVATION OF THE WOODWORK OF RIFLES IN HOT CLIMATES.

a. Approval has been given for thetreatment with raw linseed oil of the furniture of rifles in use in tropical climates and countries where maximum shade temperature exceeds 95 degrees during the hot weather.

b. The oil will be applied by the soldier once a month to the outside of the fore-end, butt and handguards of the rifle inthe following manner :-

(1) Remove all dust and dirt by wiping well with a dry rag.
(2) Apply a small quantity of raw linseed oil to the woodwork and rub it well into the wood, care being taken to keep the oil away from the metal parts.
(3) Allow the rifle to stand approximately 3 hours and then wipe off all superfluous oil with a clean dry rag.
