AUSTRALIAN WAR MEMORIAL AWM2019.366.2895

F.R.No.4.continued

(b) In the event of an attack warning being received by day, each B.C. will carry out immediately the manning of his battery, and so far as time will permit an inspection of his personnel and equipment.

(c) By night prior warning of attack cannot be expected and each B.C. must ensure that his personnel and equiptment are ready for action at the last preparation carried out before dark. Irregular visits of inspection will be made by an Officer to ensure that no relaxation of vigilance occurs.

(d) Any matters adversely affecting the fighting effeciency will be reported to the Fire Commander.

AUSTRALIAN WAR MEMORIAL AWM2019.366.2895

Para 5. continued (x)

In the event of two or more batteries engaging the same target the following ranging points will be selected :-

Q'cliff Bty. -Westerly Armament of target
Nepean Bty. -Amidships of target
Pearce Bty. -Easterly Armament of target

To assist observation when engaging one target Queenscliff Bty. will ensure that its first round falls "PLUS" and Pearce that its first round falls "MINUS" Other batteries will engage as ordered by the F.C. At ranges beyond the effective limit of Auto Sights, batteries will engage targets as under :-

Q'cliff Bty. - Western target

If the nature of the smoke screen is such as to make possible the immediate penetration of the Heads under its cover the F.C. will order "BARRAGE" etc. On this order all guns will be laid in accordance with the appropiate barrage tables and fired at the rate ordered by the F.C. (See Appendix A.)

BLOCK SHORE POINT SYSTEM

AUSTRALIAN WAR MEMORIAL AWM2019.366.2895

Para.5.Continued (g)

POINT OF ATTACK

Unless specially indicated by the B.C. the point of attack will be,generally low down on the vessel below the navigation bridge.

(h) GUN CONTROL

When gun control is ordered,officers,if available will direct the fire of the guns concerned.

(i) GENERAL PRINCIPLES OF FIRE CONTROL

In circumstances where the B.C. acts on his own initiative the general principles of fire control to be followed are :-

(i) Lines of fire should not be crossed

(iii) Where possible the preponderance of fire should be brought to bear on the leading target.
(iV) Too many changes of Target should be avoided
(v) Guns should give preference to targets appropiate to their class.

(j) PRIORITY OF TARGETS

Where circumstances permit,by day,the priority of engagement of targets will be :-

(i) Aircraft carriers.
(ii) Troop - carring transports.
(iii) Military landing craft carriers.
(iv) Battleships.
(v) Cruisers.
(vi) Destroyers and miscellaneous ships.

(k) "ALARM"

The general alarm will be initiated from any B.O.P. sighting hostile or suspicious craft or for any other sufficient reason.

6. IDENTIFICATION AND ENGAGEMENT OF WAR VESSELS

(a) IDETIFICATION

All officers, observers and look - outs must possess a knowledge of the appearance and characteristics of the different categories of war vessels and be capble of identifying them by their silhouettes at long range.

They should be familiar with the distinguishing features of British and Allied war vessels.

The training of Battery Officers and other ranks in this regard is the responsibility of B.C's,

B.O.P's will notify the F.C. Post at the earliest possible opportunity of any war vessel,freindly or otherwise within their range of vision,giving description and location e.g.

AUSTRALIAN WAR MEMORIAL AWM2019.366.2895

Para No.6. continued

"Queenscliff reports 1115 hrs. unknown warship Cruiser Type 3-2 bearing 185 steering North"

(b) ENGAGEMENT OF WAR VESSELS

In daylight and good visibilty, war vessels against which action may be required fall into two categories.

(i) OBVICUSLY HOSTILE VESSELS

In this case the F.C's executive order to the selected battery will be "ENGAGE"

(ii) DOUBTFUL VESSELS

In this case the F.C's executive order will be "BRING-TO", which order implies also the order to engage should the necessity arise

Doubtful Vessels can be classified as under

(i) Major war vessels not identified by the P.M.B.S. as friendly
(ii) Minor war vessels not showing the local recognition or special signal.
(iii) Submarines which have not been notified.
(iv) M.T.B's which have not been notified and are showing neither the local recognition nor special signal.

Action against (i) and (ii) will only be taken on information from the S.M.O.
The Fire Commander will be responsible for taking action against (iii) and (iv).

To assist B.C's in the identification of certain categories the following rules from the Manual of C.D. are quoted:-

(a) Submarines will approach a defended port during daylight hours only and will not approach at speed until identified by P.M.B.S.

(b) As a general rule M.T.B's will not be allowed to enter a port at night or in a fog.

(c) RESPONSIBILITY FOR OPENING FIRE

(i) In daylight and good visibility the B.C. will open fire in accordance with the Fire Commanders Orders. The Fire Commander will make the decision regarding the engagement of any war vessel and will act as laid down in C.A.T. Vol.3. Pamph.7.Sec.5.
The B.C.will on his own responsibility open fire on any obviously hostile vessel, any submarine which has not been notified and any M.T.B.which is not showing the local recognition signal or special signal, or has not been notified.

(ii) At night or in low visibility the B.C. is responsible for opening fire in accordance with the D.of F.scheme on any war vessel about which he has received no previous information; unless she is showing the local recognition signal,or special signal,or has been notified by P.M.B.S. as friendly.

AUSTRALIAN WAR MEMORIAL AWM2019.366.2895

Para.6.continued.

In all cases, unless a vessel is obviously hostile the first round fired should be a bring - to round fired in the manner prescribed in C.A.F. Vol.3. Pamph.8.Sec.1 (A.
All bring - to rounds will be shot, practice or plugged shell.

If the vessel still continues to approach after making allowance for the state of the tide, she will be assumed to be hostile and fire will be opened.

(iii) The B.C. will report the action he takes to the F.C. as soon as practicable.

(d) PROCEDURE IN BATTERIES FOR COVERING UNKNOWN WAR VESSELS

Unless the B.C. has received previous information establishing the friendly identity of a war vessel, it will be treated as potentially hostile as soon as it is sighted.
The guns will not be loaded until the vessel is identified as hostile.
If the vessel is not immediately identified as friendly, the B.C. will place his battery in a state of readiness for action and "observe", the battery "following" the vessel.

The B.C. will endeavor to establish the identity of the vessel as friendly or otherwise. He will report the situation to the F.C. Should a battery [illegible] to confirm the friendly nature of a passing war vessel, it may challenge, by day, by exposing a [illegible] searchlight trained on the ship. Both major and minor war vessels should reply by giving the "[illegible] RECOGNITION SIGNAL".

By night or in low visibility, batteries will not challenge, as their instructions are to fire on any approaching war vessels of which they have not been notified (see para. c.(ii) above). The responsibility for identifying themselves under these conditions will therefore rest with H.M. Ships.

7. DISTRIBUTION OF FIRE SCHEME

(a) The distribution of Fire Scheme is divided into two phases.

First Phase :- When an action develops outside the limits of the port.

Second Phase :- When targets pass inwards of the line Lonsdale - Nepean in an attempt to force the entrance.

(b) FIRST PHASE - ALLOCATION OF C.A.S.L's.

PORT PHILLIP FIXED DEFENCES

F.C's INSTRUCTIONS REGARDING ENGAGEMENT OF TARGETS BY :-

(a) Block Square ,Point System

(b) Barrage System

(c) Landwards Fire

(a) BLOCK SQUARE,POINT SYSTEM

(1) The Block,Square,Point System of indicating the position of the target will be adopted by day when, by reason of the presence of smoke or dead water, the target cannot be observed by Batteries.

(2) The system will be initiated from F.C.Station by the order "All or Bty,F.C.Control,Block Square Point System" Start stop watches 1-2-3.On 3 all stop watches will be started, and will remain running.

(3) Unless otherwise ordered, the method of fire will be 1.round gun fire.

(4) The Block, Square, Point co - ordinates of the predicted future position of the target, one minute ahead will then be passed to batteries at intervals of one minute, commencing on the first whole minute after the F.C's initiating order.

(5) B.C's will plot the position of the target on the B.C's Chart,assess the range and bearing from their guns to the target, apply the correction of the moment (except travel) and gun difference (if any) and ensure that the correct ranges and bearings are transmitted to the guns.regularly.

(6) Drift and concentration corrections will be applied by the gun numbers at the gun.

(7) When the Battery is laid on the first corrected range and bearing, the B.C. will report"_____Bty. Ready" to F.C.,and stand by to receive "Engage" from F.C.

(8) On the order "Engage" from F.C. the following procedure will be observed :-

(a) The time of flight for the last plotted range will be assessed.

(b) The time of flight will be deducted from the next whole minute.

(c) The result will be the time of firing

e.g. Plotted Range 9900
Time of flight 18.secs.
Time of firing 60 - 18 = 42secs.as shown on stop watch.

(d) Five seconds before the time of firing,the method of fire will be ordered to the guns (normally 1.rd. Gun Fire)

(e) At the time of firing,"Fire" will be ordered.

AUSTRALIAN WAR MEMORIAL AWM2019.366.2895

(a) Block Square, Point System continued.

(f) This procedure will be repeated each minute without further orders from F.C. until the target emerges from the screen, passes out of range, or another system of engaging is ordered. (Normally the immediate application of the distribution of Fire Scheme)

(g) If guns or batteries are unable to fire at the alloted time through guns being in danger arcs, missfires or undue delay, they will not be fired until "Fire" is again ordered

(h) "Shot" will not be reported by Bty's. to F.C.

9. The principle to be observed is that the rounds will fall on the target at the expiration of the next whole minute after the prediction of the target position was received at the Battery.

10. In the event of the target being obscured from F.C. Station and A.L.O. Postany Battery able to observe the target may be ordered to report its position using the Block Square, Point System to F.C. Station every whole minute.

(b) BARRAGE SYSTEM

(1) The Barrage System of engaging targets will be used by day or night when the presence of smoke screens the target but the position of the smoke indicates that the vessels may be moving through those areas of water covered by "A" or "B" barrage lines.

(2) The barrage will be initiated from F.C. Station by the order "All or ____Btys Fortress Control, Barrage "A", Gun Fire or --- rds., Gun Fire ---Secs. Engage.

(3) B.C's will order to the guns :-

(a) The system of engaging.
(b) The method of fire as indicated by the F.C.
(c) The correction of the moment.

(4) When the guns are laid on the barrage, ranges and bearings as corrected, the B.C. will order "Fire"

(5) The guns will continue to fire at the rate and interval ordered until the target emerges from the screen,

(6) When the target emerges from the screen the distribution of fire scheme will at once be put into force without further orders from the F.C.

(c) LANDWARD FIRE

(1) This method of engaging targets will be used if the tactical situation permits, to prevent beach landings or to engage certain selected targets on the land front.

(2) Targets will be indicated to Btys. by their number as shown in the Landwards Fire Table issued seperately

AUSTRALIAN WAR MEMORIAL AWM2019.366.2895

(c) LANDWARDS FIRE continued.

(3) The initiating order will be given by the F.C., in the form ----Bty. Landwards Fire Target 12'-' [illegible] "One round Bty. Fire" Fire by Order"

(4) On receipt of the initiating order, the B.C. will order :-

(a) The system of engaging the target e.g. "Landwards Fire"
(b) The method of fire ordered
(c) The range and bearing to the target.
(d) The correction of the moment.

When the guns are properly laid on the target, the B.C. will report '---Bty. Ready' to F.C.'

(5) On receipt of "---Bty. Ready" the F.C. will order Fire to the batteries in sucession.

(6) When clock code observations of the fall of shot are reported to F.C. by the F.O.O., the F.C. will immediately transmit the clock code observation to B.C's . B.C's will apply corrections calculated to hit the target and report "---Bty. Ready" to F.C. This procedure will apply to each round of battery fire.

(7) When the F.O.O. is unable to report the fall of shot in clock code the observation will be communicated by the F.C., to B.C's in the form "Plus and/or minus R. or L.
On receipt of the observation B.C's will order corrections of 200x. or 10 mins. towards the target and report "---Bty Ready" to F.C.
When a 200yd. bracket has been obtained with rounds of Bty Fire B.C's will order a correction to the mean of the bracket and report "---Bty. Ranged to F.C. B.C's will report "Shot" to F.C., after every round.

(8) Should the situation necissitate the engagement of a target not previously registered in the Landwards Fire Table, the map reference of the target will be indicated to B.C's by the F.C. B.C's will set the appropriate range and bearing to the target on the guns and order the correction of the moment. They will then report "----Bty. Ready" to the F.C. and the procedure set out above will apply.
When assessing the range the Elv. Ind., range to adjacent targets and the difference in height of the target should be noted when making the estimation. If time permits the Q.E., will be calculated and applied to the guns by clinometor. The range reading on the elevation indicator will be communicated to the B.C., immediately.

(9) In the event of the situation not permitting the use of a F.O.O. a form of barrage may be ordered by the F.C.

Drill When Engaging Targets By :-

14. CHURCH PARADES

The personal qualities which demand a high standard of conduct at all times and which inspire courage and self-sacrifice in a crisis, are by nature spiritual, not physical, and these are essential to our nation during the war and in the difficult years which must follow. To undermine these qualities by an excessive zeal for technical proficiency is as unsound as the reverse procedure. Hence, attendance at religious services should not be regarded as something interfering with training for war, but as a desirable adjunct thereto.
Members will not be compelled against their will to attend religious services. At the same time, everything possible will be done to provide Church Parades at appropiate times, to encourage attendance at such religious services as are available and to release men for attendance thereat.
The above are extracts from GRO 421/42

Church Parades will be held until further notice, as under :-

0930 hrs	-	"Kora-Weari"

Especial attention is directed to the necessity for economical use of MT. Petrol, rubber and maintenance are factors which compel the most drastic limitations in the use of alldescriptions of MT. The legitimate demands of training and of supply are not in question, but all officers are to confine the use of MT., as a means of travelling to cases where the use of trains or trams would appreciably prejudice their work, their efficiency or some phase of military activity. The making ofinflexible rules is neither intended nor desired, but a sense of responsibility must be created in the minds of all concerned. GRO 490/42

D.P.Classification

1. In regard to D.P.(Draft Priority)Classification the following extracts from Vic 1 of 3 Memorandum are quoted

   i. Recruits,upon joining are classified as D.P.3.and when they have completed their elementary training and have reached such a stage as would warrant their transfer to an Operational Area as a matter of emergency only,they may be classified as D.P.2.

   ii. When requisite specialist training has been completed and personnel have acquired a sound knowledge of all weapons applicable to their particular arm and have become skilled in fieldcraft etc.they may then be classified as D.P.1. i.e. suitable for service in the field.

   iii. The question of transfer of personnel from D.P.3. to D.P.2. and from D.P.2 to D.P.1.is the personal responsibility of the unit Commander and to ensure that requisite care is exercised in this regard,it is necessary that details be maintained by all Commanders of sub units giving full particulars of the training received by each individual person.

2. In future when a unit is called upon to supply a draft of D.P.1. personnel,the personnel must be D.P.1.in all respects on arrival at the place of concentration

3. It is therefore necessary that complete records of all men should be held at each Bty. H.Q. and a D.P. Classification card for each man will be compiled forthwith.

4. The progressive changes in training,medical requirements etc.will be entered on each card as they occur and each man's classification (D.P.1.or D.P.2)will be noted in the space provided.Separate files, of cards,indexed by names irrespective of ranks,will be kept for personnel in each classification.

5. The I.O. is to be in a position to supply a panel of names for purpose of draft whenever called upon.B.C's therefore must be prepared to supply a draft at immediate notice and will have~~x~~ personnel standing by ~~for~~ detailing at all times.

6. When a man is transferred between Btys.his D.P.Classification Card will be brought up to date and forwarded with him in order that the stage of his training is known.

7. Copies of D.P.Classification Cards are enclosed

Training Hy.Arty.P.P.F.D.

1. Herewith find copies of the syllabus for the above training for a period of eight weeks commencing Monday 16th November 1942.

2. The syllabus is designed to train personnel to be classified as D.F.I.es early as possible and every endeavor must be made to adhere strictly to the syllabus to ensure an equal standard of training.The syllabus will be departed from only if sufficient reasons can be given.Frequent visits by inspectors of training can be expected.

3. Particular attention will be given to the T.O.E.T's laid down in the syllabus and musketry classification will be in accordance with G.R.O.161 - 163.Careful records of information to be entered in pay books will be kept.

4. The second week is allotted for the firing of musketry classification series and the primary instruction in and classification of personnel equipted with the Lewis M.G. and Pistol.B.C's will make their own arrengements for the use of ranges,ammunition,range parties etc.

5. The limitations imposed by the lack of equipment available for certain subjects, particularly Anti - Gas and Fielderaft Tactics are known,but the training is to be as comprehensive as possible every effort made to improvise where necessary.

6. It is also appreciated that the time allotted to specialist subjects (Gun Laying and Range Taking) and the difficulty of training a large class on one instrument may not permit personnel to reach trade group standard,and it is suggested that Officers I/c Batches give additional training up to this standard to selected personnel during their period on duty.

7. T.O.E.T's in respect of earlier training can also be held regulary by watch Officers.

B.C's will report on the weeks training to the I.O.on Saturdays of each week.

Heavy Artillery War Diary. Dec. '42.

Training Notes.

Artillery Practice. Practice against water borne targets was carried out by the AA Bty stationed at Queenscliff. The results obtained reveal that this weapon (3"20cwt AA) has a high efficiency as a secondary battery against TBD and other small fast craft. Training in this direction should be exploited.

Specialists. Gun Layers and Range Finders classes were continued. The classes were completed and examined early in the month. Although the percentage of passes was high shewing that the candidates had been trained up to examination standard almost all the candidates shewed a lack of manual and mental dexterity. This should be overcome by continuous handling of guns and instruments.

DP1. Training to raise all personnel to DP1 was continued during the month. Batteries report that the time-work programme is being maintained.

Morale. Health is very good. The spirit of co-operation that is evident between officers, NCOs and men leaves nothing to be desired.

304 POWERS OF SENTRIES AND GUARDS

1. Regulation 8a of the National Security (General) Regulations (Statutory Rules 1942, No.374) provides that, without derogating from or restricting the existing powers of rights of sentries and guards, a military sentry or guard stationed or posted at, on, in, or in the neighbourhood or vicinity of, any prohibited place, protected area, controlled area, or any premises used by the Commonwealth, or used for defence purposes or for essential services, or any vehicle, vessel or aircraft used by the Commonwealth, or any enclosed wharf or picking-up place, or any merchant vessel lying in port, or any road, pathway or waterway, specified in an order by the Minister, which passes through or near a prohibited place or work of defence, may be armed, and may -

(1) Use his weapons against, or otherwise attack, any person who, in disregard of a warning given by a sentry or guard, approaches, enters, leaves, or passes over or in the vicinity or neighbourhood of, or attempts to approach, enter, leave or pass over or in the vicinity or neighbourhood of, that place, area, premises, vehicle, vessel, aircraft, wharf, picking-up place, road, pathway, or waterway, or who, after being arrested for so doing, escapes: and

(2) Use his weapons against, or otherwise attack, any person attacking him or who is reasonably suspected of being about to attack him.

2. There are, however, certain principles which must guide all sentries and guards in the execution of their duty as such, and in the exercise of the right to resort to arms.

3. These principles are:-

(a) Sentries and guards will be ordered to take any action required to ensure the safety of their posts or to defeat the activities of enemy, or suspected enemy agents.

(b) If necessary, they will fire upon or otherwise attack any persons threatening the safety of their posts or engaging in hostile actions.

(c) Before firing upon any person, the sentry or guard will, except in an urgent case of self-defence, challenge that person to "Halt". If that person does not halt, the sentry should challenge him again with "Halt" or I fire". If he does not halt, and no other means are available for stopping him-as for example, by calling on the rest of the guard - it is the duty of the sentry to shoot.

AUSTRALIAN WAR MEMORIAL AWM2019.366.2895

POWERS OF SENTRIES AND GUARDS (Contd.)

(d) The sentry will use his intelligence and sense of responsibility in choosing whether he will shoot or not, and he must be careful not to allow any suspected person to approach so close that he can be rushed and overpowered.

(e) Guards of enemy prisoners of war. An enemy prisoner of war attempting to escape may be fired upon, but a previous summons to surrender will be given if possible.

(f) Guards of members of the forces in custody. The use of weapons to prevent the escape of a prisoner (other than an enemy and except as provided in para.1 (i)) is unlawful unless -

1. the prisoner has committed a felony and cannot otherwise be re-arrested : or
2. it is necessary for self-defence, and no more force is used than is reasonable in the circumstances.

The offences which constitute a felony are indicated on Pages 146-151 of the M M L (Australian Edition).

(g) If a prisoner resorts to violence, force may be met by force to the extent reasonably necessary, and the escort may call for help from passers-by.

4. General - This order will be repeated in all unit Routine Orders. Orders for guards and sentries will be framed in conformity with the above and guards and sentries will be suitably instructed as to their powers and duties

(GRO 682)

305 CONSERVATION OF RUBBER

1. It has been brought to notice by Officers of L H Q who have visited Formations and L of C areas that the seriousness of the rubber situation has not impressed itself on the troops in the field and the waste of rubber and tyres is deplorable.

2. For example, at one station a number of searchlight generators had been removed from their trailers for installation in fixed emplacements. Although these trailers had probably not done more than 50 miles travelling they had already stood in the open for some considerable time, and it is doubtful whether the tyres were serviceable.

3. A very serious view is being taken of any case of failure to conserve rubber supplies. Instructions re Conservation of Rubber have been promulgated in G. R. O 0150 of 1942 and M B I 041 of 1942, while full details of correct inflation pressures, etc, are given in Mechanisation Circulars Nos. 305, 306 and 316.

4. G R O 0150 of 1942, Section (K) declares -

"(K) The practice of keeping vehicles constantly under load has a detrimental effect on the tyres, especially when the vehicles are stationary for long periods. Ignorance of correct methods of Rubber Conservation is, therefore, no longer excusable on the part of responsible Officers."

TO will ensure that the main points of GRO 150 are conveyed to ALL MT Personnel.

5. It is essential that a correct understanding of the situation be instilled into all O R's concerned and that the practical observance of the above instructions be much improved in future.

6. These instructions will be promulgated to all personnel.

(Vic L of C memo 187661)

306 ENTRANCE TO PROHIBITED AREAS

Officers and ORs will NOT enter prohibited areas via the beach.

It will be obvious that security would be weakened, and instructions regarding signing of registers would be evaded, if personnel were allowed to enter prohibited areas other than by the normal method.

AUSTRALIAN WAR MEMORIAL AWM2019.366.2895

307 PAY WHILST A.W.L

A soldier who is not with his unit or on the strength of a hospital unit, or attending a school, will not be paid any money, notwithstanding the fact that his pay book is in credit, if he is unable to produce the necessary authority for being absent from his unit. Leave passes will need to be carefully scrutinised as to their genuineness. Registrars of General Hospitals will take particular care to ensure that absentee personnel are NOT paid at such hospitals.

(Vic L of C Area 190942)

308 ISSUE OF [illegible] & SMALL UNITS

1. It is advised that applications have been received at LHQ from time to time for an extra increase of meat over and above the prescribed scale for issue to small units.

2. The matter has been carefully considered and authority for such issue cannot be approved.

3. It must be ensured, however, that units or detachments with a strength of 50 personnel or less will receive an issue that will ensure a minimum of 12 ozs of edible meat per man per day.

(LHQ memo 122/5/4099 12 Dec 42)

309 [illegible]

1. Instances have occurred recently of reinforcement personnel arriving in NEW GUINEA TERRITORY in possession of Cameras and films.

2. Regulations in force in N.G. allow only one Official Camera per unit and no other Cameras are permitted to remain within the area under Comd NG, NT Force.

3. This information will be promulgated to all personnel moving to forward areas so that no further infringement of these regulations may occur.

(Vic Grn Bde 5000 of 23 Dec 42)

310 [illegible] A.F.A.2

Report of Courts of Inquiry will not be shown on A.F.A.2. Report will be shown on separate sheet of paper. The only entry to be made on the foot of A.F.A.2 to be that relative to checking of evidence and names of witnesses.

(Vic Grn Bde 5027 of 23 Dec 42)

311 IDENTIFICATION OF AIRCRAFT

A lamentable lack of knowledge is being evidenced by troops in this command in the identification of aircraft. The quick and accurate identification of enemy aircraft, as distinct from allied machines, is absolutely essential to allow of counter measures being taken in time to deal with a hostile attack.

Every man must receive instructions in aircraft identification as a normal part of his training, and O C's are to insist that officers under their Command take the necessary steps to see that such instruction is imparted. This can be effectively done during mannings, smoke-ohs, and other odd intervals. Wall charts being used for the purpose where models are not available.

312 PHONETIC ALPHABET.

G.R.O. G 627/1942 is amended as follows:-

(1) For "A Adam" substitute "A able

(11) For "Z Zed" substitute "Z Zebra." G.R.O. 699

FFFD RO 247/42 is ammended accordingly.

313 NATIONAL SECURITY (WAR SERVICE MORATORIUM) REGULATION.

M.B.I. A.32/1941 (as amended by M.B.I. A54/1942 is amended.

(a) by inserting at the end of sub-paragraph (a) of paragraph 1 the following words:-

"or under contracts for the sale of land entered into after the member became engaged on war service, in pursuance of an option to purchase land granted before the member became engaged war service."

(b) by inserting after sub-paragraph (k) of paragraph 1 the following sub-paragraph:-

"(l) The compulsory acquitance of land, without the consent of the Attorney-General, for any purpose other than a purpose in connexion with the Defence of the Commonwealth or the efficient prosecution of the war.".

AUSTRALIAN WAR MEMORIAL AWM2019.366.2895

313 NATIONAL SECURITY (WAR SERVICE MORATORIUM) REGULATION. (contd)

(c) by inserting at the end of paragraph 3 the following sub-paragraph:-

"(d) the preservation during war service and a maximum period of six months after the termination of the war of rights to commence legal proceedings, or enforce any legal right or remedy.

(d) by repealing paragraph 5 and inserting in its stead the following paragraph :-

"5 Any member of the Military Forces who may be affected by these regulations should seek legal advice which may usually be obtained free of charge in the camp from visiting lawyers or from one of the institutions set out hereunder:-

314 UNAUTHORISED INTERFERENCE WITH EQUIPMENT.

1. Several cases have occurred recently where minor defects in technical equipments have been converted into major defects by unskilled attempts at repair by unauthorised personnel. In particular, clocks and watches which should have been repairable have had to be condemned as unserviceable because unskilled tampering has agravated the original damage or caused further breakage of sound parts.

2. As spare parts for certain instruments, particularly watches and clocks, are almost unobtainable, such tampering results in loss of equipment.

3. Previous orders forbidding the repair of technical equipment of all kinds by unauthorised personnel will be strictly enforced. G.R.O. 707

315 AMMUNITION-IRREGULAR METHODS OF MAINTENANCE.

1. Owing to the use of improper methods of cleaning and maintenance of ammunition, some units have removed all identification marks from a large number of rounds, thereby in some cases rendering them unserviceable. The following irregular practices have been reported :-

(a) Polishing of brass cartridge cases. This practice eventually results in the obliteration of such markings as batch letters and numbers and, furthermore, involves the danger of the various ingredients of metal polish penetrating into the cartridge case and affecting the explosive contents.

(b) Unauthorised re-painting of shell. Shell have been repainted in the wrong colours, sometimes with non-lead free paint, and all markings relating to type and date of filling obliterated.

(c) Oiling of Q.F. cartridges cases and fuses.

2. These practices will cease forthwith. Polishing of the components of Q.F. or of B.L. rounds is expressly forbidden, whether by means of metal polish, emery paper or any other polishing meduim. Re-painting, re-stencilling and re-labelling of ammunition or packages will be carried out only under the direction of an inspecting ordnance officer, who will ensure that all markings on any type of projectile are correctly reporduced after painting.

Disciplinary action will be taken against personnel disobeying these instructions.

3. Correct methods of care and maintenance of ammunition are laid down in "Notes of Care and Maintenance of Ammunition, 1941", copies of which should be held by every unit.

AUSTRALIAN WAR MEMORIAL AWM2019.366.2895

316 M.T. HEADLAMPS - BLACKOUT MASKS.

1. Approval is given for the removal of headlamp blackout masks from all Army M.T. Vehicles in Western Australia, South Australia, Tasmania, Victoria and that part of New South Wales South of Port Kembla, subject to the following provisions.
2. Vehicles with unmasked lights must not operate at night within 10 miles of the coast.
3. Blackout masks are to be carefully removed and packed in such a manner as to prevent damage, and are to be stowed in the vehicle tool box so as to be available for immediate replacement should necessity arise.
4. The headlamps are to be fitted with glass lenses coincident with the removal of the blackout mask. Units which have no glass lenses on hand are to draw requirements from Ordnance Depots.
5. (a) Where M.T. vehicles have not had blackout masks fitted to headlamps, but have been treated as set out in Mechanization Circular No. 302, the black matte paint will be removed from the lense reflector and globe.
(b) Blackout masks should be drawn from Ordnance Depots and issued to such vehicles.
(c) The masks are to be packed carefully and stowed in the vehicle tool box as in para .3.
6. M.B.I. o.15/1942 is cancelled. G.R.O. 712.

317 ARMY EDUCATION SERVICE- Expenditure on Equipment for Hobbies.

1. Limited funds have been made available for the provision of facilities for hobbies for personnel in the following or similar categories.
(a) Personnel serving on full-time duty under camp conditions.
(b) Members of Garrison Battalions and Coast Defence Units and A/A Batteries, etc.
(c) Men in hospitals.
2. Expenditure under this authority is intended to cover a wide variety of items such as the purchase of tools, gardening implements, timber, raffia, cane, drawing boards and paper, special pencils or crayons, music (sheet and manuscript), etc.
3. Expenditure under this authority will be subject to the prior approval of D.A.D. (Education) VIC L of C AREA, with the concurrence of the District Finance Officer.
4. Stores will be supplied from Ordnance Stocks if available. Non-expendable items purchased will be taken on unit ordnance ledger charge. Articles manufactured by co-operative effort for the use of a unit will be taken on regimental charge in the regimental property ledger.
5. Units wishing to initiate hobby activities will lodge an application with D.A.D. (Education), VIC L of C AREA, NOT later than Saturday, 14 Jan 43, setting out the proposed hobby or hobbies, and the estimated quantities of materials required together with the facilities available for the effective functioning of the hobby group.
