5. FITTING OF UNIFORMS(G R O 0.179)

(a) There is need for closer attention to be given to the fitting of uniforms when initial and replacement issues are being made by C D Ds and units respectively.

(b) Thoroughness in fitting is particularly necessary in regard to jackets and trousers S D. In the case of minors, it is necessary to make some allowance for probable filling out during the early period of service, but care must be taken to ensure that this is not over emphasised and made the excuse for the issue of uniform which gives the wearer a "sloppy" appearance.

OVER/

AUSTRALIAN WAR MEMORIAL AWM2019.366.2912

5. FITTING OF UNIFORMS contd.

(b) In regard to jackets, the more conspicuous parts are the neck and chest. Particular care is necessary, therefore, in the fitting of the garment at these points. Trousers should fit comfortably round the waist and permit of sufficient underclothing being worn.

(c) Preliminary fitting of uniform is to be supervised by an officer or senior N C O and not left entirely to issuing storemen to exercise their discretion as to what is "near enough". Clothing fitting parades are to be held at C D Ds as early as possible after issues are made. At these parades the inspecting officers will give adequate attention to the appearance of each man and arrange for the exchange of ill-fitting clothing, alteration by regimental tailor or the provision of special measurement garments, as may be required by the circumstances of the case.

(d) In order to minimise delay in the provision of uniforms for men who cannot be fitted from stock sizes, action is being taken at L H Q to expand, where necessary, the facilities for production of special measurement garments.
