(2) INTRODUCTION OF LOAD CLASSIFICATION OF BRIDGES AND VEHICLES IN MALAYA.

(A) The Army system of load classification of bridges and vehicles will be introduced into Malaya.
(B) All bridges likely to be used by military vehicles.The roads listed in Appendix"A"will be marked throughout their length.
(c) The classes are 5,9,12,a d 24.Vehicles will be marked ~~xxxxxxxxxx~~ and classified according to the equivalent load which they impose on the bridge.The classes for vehicles ~~xxxx~~are shown in appendix"B".
(d) Vehicles are permitted to cross the bridge bearing the classification number the same or greater than the vehicle classifition e,g, a vehicle of class 12 may cross a bridge marked 12,18,24,but not a bridge marked 5 or 9.
(e) Double vehicles,such a tractor with its gun or a vehicle towing a trailer will be given a double classificaa ion. The lower No will indicate the class of the tractor alone,while the upper will be that of the complete train.
(f) In cases where one vehicle is towing another in an emergency the classification of the load will be the sum of the individual classification of each vehicle-e,g. a class 9 vehicle,towing a class 5 vehicle will have a classification of 14 and may cross bridges of 18 or 24 classification.
(g) All vehicles will be marked with its own classification:- The signs will be yellow with black figures and will be fixed onto the off-side between the radiator and the front mudguard.
Signs will be issued by Ordnance for vehicles maintained by them as soon as possible.

5. SOLDIERS LIABLE TO TRIAL IN CIVIL COURTS.

It has been agreed with the civil Government that the following procedure will be adopted in all cases where soldiers commit offences which renders them liable to trial in the Civil Courts.

The Public Prosecutor is issuing Orders to his deputies and the Police that:-

(a) All Offences against the Civil Laws committed by members of the Military Forces, including traffic offences, will be the subject of such Police investigations as the Public Prosecutor thinks fit.

(b) The Public Prosecutor will, at sole discretion, enter a nolle prosequi and hand the offender over for trial by a Military Court, or direct that the case proceed in the Civil Courts.

(c) In either event, the Civil Authorities will inform the Military Authorities of the decision and in the latter event the Military Authorities may make such further representation to the Public Prosecutor as they wish.

The decision of the Public Prosecutor is final, and his discretion unfettered. He will, as a general rule, be prepared to hand over to the Military Authorities all cases except those in which civilians are involved, put in danger, or suffer actual injury to person or property.

Appended below is a list of offences which
(a) must be notified to xxxxx the Police.
(b) The Police ask should be notified to them.

(a)

3. M.T.VEHICLES SPEED OF.

Army vehicles of all types are driven frequently at excessive speed both individually and in convoy.this is not only dangerous to other users of the roads,but results in crashed vehicles as well as rapid deterioration of tyres,tracks and other parts which are most difficult to replace.

Officers and N.C.O's i/c convoys must not move off before the drivers have started their engines and are ready to follow,and must move off slowly or else the rear lorries of the convoy will be unable to keep their distances without exceeding 30 MPH.Formation and Unit commanders will check this.

It is the duty of all Officers to report immediately through the usual channe any instances of dangerous driving or speeding-giving date,time,place, vehicle registration number,unit or unit sign on vehicle,if possible,and nature of the offence.

AUSTRALIAN WAR MEMORIAL AWM2019.366.999

3.(contd)

If the estimated speed of the offending vehicle was compared with the speed of a vehicle in which the reporting Officer was travelling, should be stated.

4. SUPPLIES-W.D.PETROL TINS.

The 4-gal W.D. tin is in general supply throughout MALAYA.
On occasions,loss by leakage is heavy,but this loss can be minimised to a very large extent by observance of the following points.

Tins should never be exposed to the direct rays of the Sun. An unsheeted lorry loaded with petrol will lose up to 5% of its contents on a long run.

Loading parties will exercise close supervision to ensure avoidance of rough handling of tins.

5.FLUSHING OIL,GREASE ETC.

Flushing oil is not a service supply,changing oil when engine is hot is normally sufficient.

6. WATER. Strict supervision on the use of water will be exercised. Washing will not be done under running taps but use made of washing basins provided for the purpose. Any leakes detected will be reported immediat

Units are reminded that there is a shortage of water in certain distric

6.ELECTRICITY.

Care will be exercised in the use of Electricity as the cost of current is high.
Lights will not be switched on until Sunset,except when weather conditi may make earlier lighting necessary.

Lights and Fans will be switched off when a room is not in use.

No appliances will be connected to the electrical current other than those provided by the P.W.D. or specially authorised,and lamps provided will not be replaced by others of higher wattage.

7. DISIPLINE-CAFES AND BARS.

The following Bars will be placed "Out of bounds" to all O/R's:-

6. CARE OF EQUIPMENT.

(a) Sheets Ground Mk VII

Units will ensure that these are frequently aired or dusted with French chalk, in order to combat the rapid deterioation cuased by climatic condition

(b) All leather goods will be treated with dubbin to prevent deterioration by mildew.
Should mildew commence on any article it should be washed in warm soapy water (not scrubbed) then placed in the Sun to dry. When dry, it should be treated with dubbin.
Kerosene must not be used to remove mildew as it is likely to make the leather brittle and crack.

7. DRIVING LICENCES) CIVIL PRIVATE VEHICLES.

It is notified for information that the laws of the Straits Settlements render it an offence for a motor vehicle to be driven by any person other than a licenced driver.
An exception is, however, made in respect of a person being taught to drive, but in such cases the person being taught must be accompanied by a licenced driver and the tution must take place on unfrequented roads,

In the case of a joint ownership of a motor vehicle it must be clearly understood that each person who drives the car must hold a licence under the local law.

All licences are renewable annually.

3. INCENDIARY BOMBS.

Information on the subject of dealing with small thermite or magnesium bombs.
If the bomb should fall on the surface through which it cannot burn the bomb should be covered with a sandbag half filled with earth or sand.
A half filled sandbag can be folded and lifted by both ends with one hand and dropped on to the bomb while the other arm is used to shield the face.
The bomb can then be left to burn itself away, which it should do in about 15 minu

If the bomb should fall on to the wooden floor of a hut it can be dealt with in a similar manner, care being taken that when the bomb eventually burns through the floor it falls on to bare earth and that additional earth can be shovelled on to it.
Experence has shown that if an incendiary bomb has to be removed by the sand and bucket method a G.S. shovel is more effective than a long handled shovel, the latter being clumsy and difficult to control.
All personnel are warned of the danger of to the eyes from sputing of the b metal. Eyeshields A Gas will always be worn when dealing with incendi

AUSTRALIAN WAR MEMORIAL AWM2019.366.999

Water causes a burning incendiary bomb to burn more fiercely and helps the fire to spread by scattering burning fragments.
Dry sand or earth is the best means of limiting the incendiary effect.

TRAINING INSTRUCTIONS NO 12/41 - BY LT-COL.C.A.McEACHERN R.A.A. COMMANDING 4TH A.T. TANK REGIMENT A.I.F.

M.T.VEHICLE MAINTENANCE. 11 May 41. Page 1.

The common use of automobiles in the general- particularly civil- life of these times is probably the reason why it is difficult to adapt ideas of their maintenance and use into Army ways. The method of person using his car - usually for city driving to his office by day and to Golf on Sundays- calls for very little work on his part to keep it on the road. In fact the beauty of owning a car is the unfailing supply of transport at the turn of a switch. We are apt therefore to forget that we, as good owners, shoot the car into the service station every now and then for a check up. When we buy petrol the garage chap as a rule is told to check the water and oil,and the air in the tyres. This is all very well on the good roads around the various cities, and then again suppose the jallopps does break down we ring up the towing service, hail the first passing taxi and still get to the Theatre in time. No life and death matter there. But it is obvious to everybody here that such a carefree way of life no longer exists, and failure of a vehicle may perhaps mean the loss of stores or the lives of the troops it carries.

With this in mind we must have vehicles in such a condition at all times the breakdown simply does not occur,or in all events does not occur due to any reason in our power to obviate At all times vehicles must be in absolutely fautless condition. It is obvious that if vehicles are left to look after themselves for a while it will take a big job to acheive this condition. On the other hand if vehicles are left in good or der not very much is going to happen to them between the times set out for maintenance namely each morning. This keeping of vehicles in good order will result in short daily maintenance programs which will then consist merely of checking up.

There are certain items requiring checking each day, in orddr to keep the vehicle in proper condition for travelling These items will be dealt with under the heading of daily maintenance. Other items do not need daily checking - it is obvious that if the oil in the gear box is checked one day it will not require checking again next day as a general rule. These items will be dealt with in a weekly maintenance check up. Circumstances such as a spot of heavy action or long continuous driving may necessitate this latter check up to,be more frequent, and it is safe to say that all remarks made here are subject to the tactical situation.

The difficulty experienced so far in these checks- up is that in many cases the people directly concerned have not the knowledge of their vehicle to enable them to carry out their appointed tasks.

In view of what I have said,I will deal with the various classes of people concerned in the welfare of M.T.Vehicles, set out their duties daily, weekly and general, and then make a few suggestions as to how they can be helped and instructed to do their jobs.

DAILY MAINTENANCE.

1. Check up and if necessary replenish -
   (a) Engine oil - use a dip stick.
   (b) Water in radiator.
   (c) Petrol in tank - use dip stick.
   (d) Level of electrolyte in accumulator.Inspect terminals for tightness, cleanliness and dryness. (no grease to be used)
2. Start engine, check ammeter and oil guage then switch off. (Modern force feed engines should not be idled for long periods. At an engine speed corresponding to 26 m.p.h. in top gear the oil pump will deliver at a high enough pressure to reach all the necessary moving parts adequately. This brings up another point-that of particular-pump in the Marmon-Herrington. At no time should the engine be run with the auxiliary gear in neutral. With this happening the upper gear is being starved of oil which is thrown up by the lower gear when connected in. Always use the neutral on the main gear box.)
3. Check tyre pressures and remove foreign matter from tread.

AUSTRALIAN WAR MEMORIAL AWM2019.366.999

Tyre pressure definitely affect brake performance and steering.

4. Check over possible defects in vehicle.
   (a) Tail board - lives may depend.
   (b) Springs for broken leaves.
   (c) Functioning of horn and lights.
   (d) Loose body bolts.
5. Check tools for cleanliness and tidiness and report any deficiencies.
6. Clean vehicle inside and out. Particular attention must be paid to engine which must be kept clean of grease and oil. Dust collecting on the engine due ti this aventually finds its way into moving internal parts with the obvious result.
7. With the above carried out the vehicle is ready to move off. At this point then a check on the performance of the brake should be made. If the vehicle has been washed down and water allowed to enter the brake drums a defect will be noticeable.Discrimination should be shown here as this can be remedied by drying out in heat generated by light application of the brakes when travelling
8. All defects should be reported and if the vehicle requires attention by the L.A.D. a Defective Vehicle Report (G17) should be submitted. This on the surface may seem to be unnecessary,but unless the situation demands otherwise should be adhered to as it presents something of a guide as to the tools required by the Fitter M.T.sent to make the necessary repairs.

The driver M.T. during travel is expected to note the points set out in Standing Orders for Drivers of Mechanical Vehicles page 18, and in addition an inspection should be made of brake drums at halts for excessive heat. Trouble in this regard should be reported and rectified.

When pulling in for the night or after a journey a cursory inspection and also any points noted during travel should be entered by the driver on the space allotted on the back of Transport Work Ticket c2 for further attention by the Transport N.C.O.

It will probably be found necessary that the vehicle on returning to any post may have to be made ready for travel at any future time. Replenishment of oil, water and petrol will then become an additional duty of the driver at the completion of the day or journey.

WEEKLY MAINTENANCE. The driver M.T. has to carry out under supervision of more qualified Fitters or Mechanics M.T. a more detailed maintenance at least once every week. Extra time would be allowed and this check-over would be done in addition to the daily maintenance duties.

1. Lubricate all parts specified by maker (For Ford vehicles as shown)
   (a) Distributor (2 drops engine oil)
   (b) Generator (2 " " ")
   (c) Engine to be flushed and filled with oil.(This need only be done if the work during the week warrants it or the vehicle has covered more than 2000 miles
   (d) Air filter - clean screen with petrol and refill with clean oil-(This to be done more often than weekly in dusty places)
   (e) Grease clutch and brake pedal
   (f) Remove sludge from fuel pump filter.
   (g) Attend to all grease gun points as set out in makers reference book. These books are supposed to be issued with each vehicle in same way as tools.
2. Clean and adjust plugs. A cleaning machine and guages for gap setting are included on the L.A.D. trailer where plugs can also be tested.

continued.

AUSTRALIAN WAR MEMORIAL AWM2019.366.999

3. Check lubricant in - (a) Steering box
(b) Gear box (or boxes in the case of the Marmon Herrington.
(c) Differential.
4. Check slip on drag in the clutch. This would be noticeable during driving and should be reported at the proper time, but is included here as a reminder.
5. Check hand brake - Correct adjustment is four notches.
6. Ckeck level in hydraulic brake master cylinder - ¼" from top is correct.
7. Check fan belt adjustment - ½ inch each way.
8. Change water in radiator if dirty. This is to be done with a warm engine running slowly. Draincocks open.
9. General check over of body work canopy covers, door locks, windows etc.
10. Observe condition of tyres and report any wear so that a check can be made of toe-in, tracking etc.
11. Log books to be made up to date. This is essential as it contains the complete history of the vehicle.

Here again it is necessary that any defects or breakages be reported on A 17's to the L.A.D.

NOTE. Distribution adjustments must not be attempted other thanby qualified persons. This applies to voltage regulators, generators, fuel-pumps and carburrettors.

At Sea aboard H.M.A.T. ZEALANDIA.	31 MAY 41		H.M.A.S. SYDNEY " Thank you for your compliments and congratulations on the appearance of your troops." Weather fine. Seas calm but with a land swell causing ship to roll from side to side.	
	1 JUN 41		Bright sunny days. Seas calm. Church services were held on the boat. 4 Anti-Tank Regt utilised No 3 Hold. Remainder of the day spent in recreation -al training. Gymnasium stores and sports equipment has been made availible to the men and organised recreational training is carried on each day.	
	2 JUN 41 3 JUN 41		As wemove further North the days become appreciably warmer and the seas calmer thus making for better conditions in regard to training. Days warm and sunny.	
	4 JUN 41	0625	Our escort H.M.A.S. SYDNEY fired a number of rounds as part of its practice shoot. A.A.M.M.G. crews have been trained on the boat and have manned the guns which are mounted in the life-boats on the boat deck. The full complement of guns is two. A series of lectures for Officers has commenced and instruction is given in the following:- Tropical Diseases & Hygeine and Sanitation Attack Defence Intercommunication in the Field The construction of Tank Traps etc. During the day the weather had been fine and warm but during the night the relative state of humodity was high causing numbers of the men to vacate their cabins for the cooler atmosphere of the decks. Slight rain fell during the night.

ORDERS FOR SENTRIES

No 1 Post He will prevent any personnel from entering Firemens' Mess Room.

No 2 Post He will prevent entry of personnel to both forecastle head and crews quarters.

No 3 Post He will prevent personnel passing rails separating Officers and Engineers quarters.

No 4 Post He will ensure that starboard and port doors leading to No 3 Hatch are kept closed.

No 5 Post He will ensure that starboard and port doors leading to No 3 Hatch are kept closed.

No 6 Post He will ensure that all doors and ports are closed and no lights are showing.

No 7 Post He will prevent any unauthorised personnel entering Ship's Orderly Room.

No 8 Post He will prevent unauthorised personnel entering Pursers Office.

In addition, the following instructions will be carried out where applicable :-

(1) In case of anyone falling overboard in the vicinity of his post, he will at once throw overboard the nearest lifebouy and at the same time raise the alarm by shouting "Man overboard". He will then report to the Ship's Officer on the bridge.
(2) He will know the position of the fire extinguisher in the vicinity of his post and know how to use it. In case of fire, if he cannot extinguish it, he will immediately and quietly inform the Ship's Officer on the bridge. He will acquaint himself with the quickest way to the bridge.
(3) He will prevent anyone interfering with lifebelts in boxes except in cases of emergency, during drills or under orders of an officer.
(4) He will prevent anyone sitting on the ship's rail, slinging hammocks, or swinging from awning spars or sitting or climbing thereon.
(5) He will report to the O.C. Guard any gambling taking place on or near his post, and will prevent any other irregularities.
(6) He will prevent wastage of fresh water.
(7) He will prevent any smoking on deck after dark.

APPENDIX "C"

POSTAL ARRANGEMENTS

GENERAL

POSTAL OFFICE will be situated in the Men's Lounge on "A" Deck from 1100hrs to 1130hrs daily and will be open to Officers of Units on board who desire information re postal facilities. O.Rs will make enquiries from their Unit Offices.

CENSORSHIP. Units will ensure that all articles are censored and marked so and initialled on the outside before delivery to the Postal Office in accordance with Ship's Standing Orders.

POSTAGE RATES. Postal articles not exceeding 4oz. in weight posted at sea during transport to destination will be delivered free of any postage charge to the addressee. The concession will not apply as regards:-

(a) the registration fee on registered articles;
(b) the postage on registered and unregistered articles exceeding four ounces in weight; and
(c) articles for transmission by air.

Letters not exceeding two ounces in weight will also be delivered free in other Empire Countries.

The Postal Charges on parcels and other classes of mail matter exceeding 4 ounces in weight addressed to the Commonwealth (and exceeding 2 ounces in weight addressed to other Empire countries) will be the same as those recently adopted in Australia for mail matter to and from members of the Commonwealth Defence Forces.

These special rates are

Letters	1d per ounce
Printed matter	1d per 8 ounces
Merchandise (packages over 1 lb parcels rate applies)	1d per 4 ounces
Books, Periodicals & Newspapers	1d per 12 ounces.
Parcels not exceeding	
1 lb	6d
2 lb	9d
3 lb	1/-
5 lb	1/3
9 lb	1/6
11 lb	1/9
Letters Airmail	4d per ounce.

In each case where postage is payable the postage should be calculated on the full weight of the article. For example the charge on a package of merchandise weighing 5 ounces would be 2d.

Correspondence for foreign countries posted at sea may be prepaid in Australian Postage Stamps at Australian rates of postage. These rates are :- Letters 3d for the 1st ounce and 2d for each additional ounce, printed matter 1d per 2 ounces.

STAMPS may be purchased from Y.M.C.A. and Salvation Army Officials on board.

FREE POSTINGS. To secure the privelege of free postage articles must be posted on board the transport.

ILLEGAL POSTING. Troops should be advised prior to arrival at any intermediate Port of Call that mail should be despatched only through Ship's Postal Officers and that Mail thrown overboard to lighters Etc or on to the wharf will be confiscated.

The indiscriminate handing of mail matter overside is not in their own interests as htere is no guarantee that even if the person receiving the mail avoids having it confiscated, it will be posted.

INWARDS MAIL

Mail received at Embarkation Port and intermediate Ports en route will be delivered to Units by Postal Orderly. A List (in duplicate) will accompany all Registered articles and parcels and Units will sign one copy for receipt of same. Units will keep a Registered Articles and Parcels Book where recipients will sign for receipt of them.
