FLAK OUT-WITTED: U-BOAT DESTROYED

Taking such sharp evasive action that one of his crew was knocked unconscious, the Captain of a Coastal Command R.A.A.F. Sunderland outwitted the gunners of a German U-boat and made two low-level depth charge attacks on it, destroying the enemy. After the U-boat had blown up, survivors were seen in the water.

The Sunderland, captained by 21 years old F/Lt. R.D. Lucas, of Sydney, NSW., was on anti-submarine patrol several hundred miles west of Ireland when the front gunner spotted the wake and conning tower of a U-boat on the surface.

Although the flying-boat attempted to make use of partial cloud cover, the enemy sighted it and opened fire with all guns at 3,000 yards range.

"The flak appeared as a continuous stream from six cannons interspersed with machine gun tracer," said F/Lt. Lucas. "Instead of aiming at us, the enemy put up a box barrage through which we would have to pass to make an attack.

"I made as though to climb above the barrage and then, when the U-boat lifted it, I promptly dived under. It was violent evasive action all right and it shook up some of the crew -- my navigator was thrown around so violently he was knocked out -- but it was effective."

At 1,000 yards range, the Sunderland's front gunner, F/Sgt. G.H. SIMMONDS, of Grimsby, Lincs., returned the enemy fire with immediate and terrific effect. At 400 yards, the U-boat attempted avoiding action with a sharp turn to port and at 200 yards the enemy's fire was silenced.

"We swept over at 50 feet," said F/Lt. Lucas, "and as my bomb firing switch went unserviceable, the depth charges were released by the first pilot, F/O. R.H. PRENTICE, of Sydney, who took his time from me. This stick fell slightly short, but as we flew over we could see the effect of the front gunner's shooting. On and around the conning tower there were ten bodies and no sign of life at all.

"The U-boat, however, appeared undamaged, and we promptly circled for a second attack. This time, the depth charges exploded on each side, slightly abaft of the conning tower.

"We were circling once again to take pictures when a minute after the attack, an explosion was seen in the U-boat, which simply disintegrated, leaving a large patch of oil on the surface and a litter of wreckage, debris and bodies, both alive and dead".

As it had been the navigator who was preparing to photograph the attack before he was knocked unconscious by the evasive action, no photographs were taken.

Although the Sunderland belonged to an R.A.A.F. Squadron of the Command, the crew comprised Englishmen and a Canadian as well as Australians.

Before the war, the Captain was in a Sydney real estate office, the first pilot worked in a bank, the front gunner was a dance band musician, and the navigator, F/Sgt. C.D. BRENNER, of Burwood, Victoria, was an insurance clerk and is generally regarded as a good "probable" for Australia's post war Test Match eleven as wicket-keeper.

It was exciting while it lasted," said the front gunner, voicing the feelings of all the crew, "but above all, it was some compensation for the hours we have put in on patrol over the Atlantic and seen nothing. This makes you feel it has all been worth while and we all hope it's only the first of many U-boats."

"We've been flying together as a crew for about three months," said the Captain. "Our predecessors had christened the Sunderland 'Hop Along', and we stuck to the name, which seems to have brought us some luck."

March 3, 1944.

SEVEN CLERKS HELP "KILL" U-BOAT

Seven peace-time clerks were included in the crew of a Coastal Command R.A.A.F. Sunderland which recently sank a U-boat in the Atlantic after evading a formidable box barrage of flak fire.

The captain of the Sunderland, Flight Lieutenant R.D. Lucas, was a clerk in a Sydney real estate office and the first pilot, Flying Officer R.H. Prentice, worked in a Sydney bank. They travelled together to Canada for training under the Empire scheme. Although originally posted to different squadrons they came together again when they crossed the Atlantic.

The navigator, Flight Sergeant C.D. Brenner of Melbourne, was an insurance clerk, and his companion in the galley helping to take photographs of the "kill" during the Sunderland's violent evasive action was Flying Officer H.D. Roberts, air gunner, who was a costing clerk in Adelaide before enlisting.

Flight Sergeant W.J. Darcey of Leaderville, Western Australia, was a clerk with a firm of agricultural machinery merchants and Flight Sergeant S.T.G. Burnett was a clerk in Ferntree Gully, Victoria.

The Canadian member of the crew, Sergeant Brannen of Wood's Harbour, Nova Scotia, is another bank clerk.

The front-gunner, who silenced the U-boat's gunners by accurate and well-timed fire during the run-in, killing or wounding 10 men on the enemy's conning tower platform, was a saxophonist in a dance band in peace-time. He was Flight Sergeant G.M. Simmonds, R.A.F. of Grimsby, England.

Thrown violently to the deck during strong evasive action, a well known Australian cricketer ^{FLYSGT. COLONEL D. BRENNER} was knocked unconscious and missed photographing the first attack on a U-boat which was destroyed.

"As soon as action stations sounded," he said, "I went amidships to take photographs of the attack with a hand camera. An air gunner, Flying Officer Roberts, was in the galley cooking a meal but he threw it overboard

immediately. It was just as well, for the next thing we knew there was a terrific barrage and the captain threw the flying-boat about so violently we were thrown to the deck.

"I was knocked out for a time and missed the first attack but Flying Officer Roberts helped me up and I recovered in time to grab the camera and 'shoot' the second attack which ended with the U-boat blowing up"
