ROUTINE ORDERS PART I.

By Major R. DRUMMOND. 2/9 AUST A FD COY R.A.E.

No. 5/43 19 JAN 43

1. RECOVERY OF TRADESMEN.

It is desired to impress on all troops that the recovery of tradesmen and potential tradesmen is a matter of most urgent national importance The manpower situation is so critical that for all practical purposes the Army must provide its future requirements in tradesmen within its own resources.

It is imperative therefore that not one tradesman or potential tradesman required, is lost to the Army.

Many tradesmen are serving in capacities where their capabilities are not being fully utilised.

Many others are not aware that the Army has specific use for their skill and that higher pay can be earned by following their calling.

To overcome this a list of trade groupings is published herewith.

All ranks are requested to give their close attention to the list.

If they have any training, or aptitude in any of the occupations, they will hand in their names, giving particulars of trade, experience, etc., to their orderly room for transmission to H.Q. and subsequent submission to the Tradesmen Recovery Officer when he visits the unit.

The Recovery Officer will consider whether a man would be more usefully employed at his trade , or in his present posting. Suitable personnel will be sent for trade testing and successful candidates upgraded on being posted to an appropriate position.

Troops should realise that it is their duty to their country, to disclose their capabilities if they have received complete or partial training, in any of the trades required. In this connection NCOs need have no fear of losing pay by declaring their tradesmanship. Personnel unsuccessful at a trade test, potential and inexperienced tradesmen may be sent to schools if their services are likely to be required.

The list of trade groupings is as follows:-

No. 1/43 4 JAN 1943

1. SUNSTROKE AND HEAT EXHAUSTION.

Every precaution will beexercised to avoid the danger of sunstroke and heat exhaustion and the information given below is promulgated for the benefit of all ranks. :-

(i) Sunstroke is caused by exposure of the body to the direct rays of the sun especially in a humid atmosphere. Heat exhaustion is caused by exposure to heat and by muscular fatigue and lassitude resultant on the loss of salt to the body by perspiration

(ii) As much salt as can comfortably be taken should be used with meals to counteract the loss of salt to the system by perspiration Salt tablets are available at R.A.P.s.

(iii) Personnel affected with sunstroke or heat exhaustion should be removed to the most accessible breezy ~~spot~~ cool and shady spot, and given a drink of water to which has been added salt in the proportion of one teaspoonful to the pint. Clothing should be loosened and wet cloths applied to the head.

Sun bathing is dangerous especially during the wet season when the air is moist, and is prohibited.

Shirts may be discarded by working parties on the authority of O.C. but on no account will hats be removed in the sun.

2. FALSE STATEMENTS TO SECURE EXCEPTION, LEAVE, ETC.

A recent Statutory Rule has amended AMRAO by inserting a new AMRAO 303A, the fulltext of which will be published shortly, and which provides in effect that every person subject to military law, whether on war service or not, who makes, with intent to deceive, any false statement or representation, whether verbal or in writing, in connection with any application that -

(a) any member of the Military Forces shall be granted exemption from service or leave of absence; or,

(b) any member of the Defence Forces shall be transferred from one arm, service, department, corps , or unit, of the Defence Force to another shall be guilty of an offence and shall be liable to penalties as prescribed by AMRAO 215. The averments by the prosecution that the statements or representation attributed to the accused was false and was made with the intent to deceive, shall be prima facie evidence of such falsity and intent.

3. CLEANING WEB EQUIPMENT AND GAITERS.

The practice of bleaching articles of web equipment and web gaiters either with soap and soda or ~~xxxxx~~ other means is to cease immediately Items treated in this manner are not only unduly conspicuous in action but the treatmentgreatly deteriorates the material and reduces the life of the article.

When it is necessary to clean any item by washing, luke warm soapy water and light scrubbing only should be used. However, such washing should be restricted to occasions when it is absolutely essential.

4. COMFORTS FUND.

The company has received from the Victorian branch of the Engineers Comforts Fund 500 packets of Black & White cigarettes, which have been distributed.
