117. WAR LOANS:-

Special methods of application and entry into paybooks of credits to be applied to War Loans have been instituted. Particulars are obtainable from Coy Orderly Room.

118. UNAUTHORISED INTERFERENCE WITH EQUIPMENT.

1. Several cases have occured recently where minor defects in technical equipments have been converted into major defects by unskilled attempts at repair by unauthorised personnel. In particular, clocks and watches which should have been repairable have had to be condemned as unserviceable because unskilled tampering has aggravated the original damage or caused further breakage of sound parts.

2. As spare parts for certain instruments, particularly watches and clocks, are almost unobtainable, such tampering results in loss of equipment.

3. Previous orders forbidding the repair of technical equipment of all kinds by unauthorised personnel are to be strictly adhered to.

119. Powers of Sentries and Guards. (G.R.O. A. 682.)

1. Regulation 8 A ot the National Security (General) Regulations (Statutory Rules 1942 No. 374) provides that, without derogating from, or restricting the existing powers of rights of sentries or guards, a military sentry or guard stationed or posted at, on, in, or in the neighbourhood orvicinity of, any prohibited place, protected area, controlled area, or any premises used by the Commonwealth, or used for defence purposes or for essential services, or any vehicle, vessel or aircraft used by the Commonwealth, or any enclosed wharf or picking-up place, or any merchant vessel lying in port, or any road, pathway or waterway, specified in an order by the Minister, which passes through or near a prohibited place or work of defence, may be armed, and may -

(1) use his weapons against, or otherwise attack, any person who, in disregard of a warning given by a sentry or guard, approaches, enters, leaves, or passes over or in the vicinity or neighbourhood of, or attempts to approach, enter, leave or pass overor in the vicinity or neighbourhood of, that place, area, premises, vehicle, vessel, aircraft, wharf, picking-up place, road, pathway, or waterway, or who, after being arrested for so doing, escapes: and
(2) Use his weapons against, or otherwise attack, any person attacking him or who is reasonably suspected of being about to attack him.

2. There are however, certain principles which must guide all sentries and guards in the execution of their duty as such, and in the exercise of the right to resort to arms.

3. These principles are:-

(a) Sentries and guards will be ordered to take any action required to ensure the safety of their posts or to defeat the activities of enemy, or suspected enemy agents.
(b) If necessary, they will fire upon or otherwise attack any person threatening the safety of their posts or engaging in hostile actions.
(c) Before firing upon any person, the sentry or guard will, except in urgent cases of self-defence, challenge the person to "Halt". If that person does not halt, the sentry should challenge him again with "Halt or I fire". If he does not halt and no other means are available for stopping him - as for example, by calling on the rest of the guard - it is the duty of the sentry to shoot.

(d) The sentry will use his intelligence and sence of responsibility in choosing whether he will shoot or not, and he must be careful not to allow any suspected person to approache so close that he can be rushed and overpowered.
(e) Guards of enemy prisoners of war. An enemy prisoner of war attempting to escape may be fired upon, but a previous summons to surrender will be given iff possible.
(f) Guards of members of the Forses in Custody. The use of weapons to prevent the escape of a prisoner (other than an enemy and except as provided in para. 1 (1) is unlawful unless -
(i) the prisoner has committed a felony and cannot otherwise be re-arrested: or
(ii) it is necessary for self-defence, and no more forse is used than is reasonable in the circumstances.

The offence that constitutes a felony are indicated on pages 146-151 of the M.M.L. (Aust. Edition).

(g) If a prisoner resorts to violence, force may be met by force to the extent reasonably necessary, and the escort may call for help from passers-by.

Under normal circumstances, Officers will NOT drive Military Vehicles In the following circumstances ONLY will an Officer drive-

(a) when the driver is incapacitated
(b) in an emergency
(c) to afford relief to driver on long journeys

215. ESCAPES OF PRISONERS OF WAR FROM ENEMY HANDS

1. It is the duty of all soldiers if captured by the enemy to effect their escape at the earliest moment.

2. It is equally important that the soldier having completed his escape should not disclose the method by whichhe, or any companions he may have had, evaded enemy and achieved freedom.

3. The disclosure of such information-
(a) prejudices the chances of other escapees;
(b) prevents other members of Allied Forces from using the same or similar methods of escape.
(c) endangers the lives of those who may have assisted the escapees at any stage of their escape.

4. Therefore, escaped prisoners of war will not, without the permissi of GSI of a corps or higher formation, disclose any details of thei experiences in connection with their escape-
(a) either verbally or in writing to their friends and relatives
(b) either verbally or in writting to the press or broadcast statio

5. Full details, however, will be given by the escaped prisoners of wa at the earliest opportunity to the nearest Allied Military Headquarters, from whence it will be transmitted to GSI at LHQ or Advanced LHQ direct.

248. DISCIPLINE. All troops are warned that they must obtain permission from the NCO's supervising their work before leaving their place of working in order to visit thier tents, latrines, Orderly Room or any other place not related to their work. This is for your own protection as it is an offence to be absent from your place of duty.

249. TIMBER SUPPLIES. Timber of any size or description shall not be removed from the timber yard or mill without permission of S/Sgt. Alexander other than that authorised by work ticket or written instruction. S/Sgt Alexander will ensure that requirements of troops are met from scrap indicated by Sgt. Baldwin otherwise he will request instructions from the O.C.

250. MAINTENANCE OF ROADS. Subtended is copy of memo received from DA & QMG 2 Aust Corps.

1 Experience has shown that passing or overtaking of vehicles at points where road shoulders or gutters are soft destroys the draining of the roads and thus creates boggy sections.

2. Urgent repairs are now being undertaken on roads without closing them to traffic. This work, however, is being seriously interrupted by demands for immediate right of way. Except when URGENT business, officers will wait without demanding immediate right of way and allow men unloading gravel onto the roads reasonable time to complete unloading their trucks. Traffic must use that portion of the road indicated by the Road Patrol.

3. Maintenance and repair parties employed on the roads are to be fully informed of the importance of their task and necessity for pushing it fo forward with all energy and speed.

4. All Corps Units, Branches and Services are accordingly requested to co-operate in preserving the roads by enjoining MT drivers under their control to avoid, as far as possible, running on soft shoulders or gutters, and to pass all "soft" spots carefully and at slow speed. Generally, it is advisable for one vehicle to stop while the other passes.

5. With the very limited roads at present available in the Corps Area, it is the duty of every officer, NCO and man to use his utmost endeavours to keep these open for traffic. The exercise of alittle patience, forethought and common sense will do much to achieve this end. The loss of time caused by exercising a little care is negligible to that following a complete road block.

154. TRAFFIC CONTROL - GILLIES HIGHWAY.

Attention of all Units is drawn to the necessity for avoiding congestion of vehicles at the Toll gate entrances to Gillies Highway. Some vehicles arrive well before the time of the opening of the gates and this causes congestion on the narrow approaches. Times of opening and closing gates should be made known to all MT drivers, so that arrival at the gates can be timed to avoid the banking up of vehicles waiting to enter.

A maximum speed of 15 miles per hour through the pass has been fixed for safety reasons and to avoid wear and tear on the road. This means that vehicles should take NOT less than 48 minutes to traverse the 12 miles. Arrangements have been made for vehicles exceeding this speed limit to be reported to this HQ and Units will be asked to take disciplinary action against the drivers concerned.

There are no exception to this instruction.

(1) Demands for replacements of hand tools indicate that wastage is unduly high.

(2) An acute shortage of these tools exist. Many types are not manufactured locally and have to be imported from overseas. It is essential, therefore, that all ranks be impressed with the necessity of ensuring that wastage is reduced to a minimum.

(3) Care is to be taken that tools are used only for the purpose for which they are supplied.

(4) Unit commanders and officers or other ranks in charge of workshops, etc., are to take all action necessary to ensure that these instructions are observed by personnel under their control, and that appropriate steps are taken to ensure safe keeping of hand tools on issue.

234. Hygiene Discipline

1. The incidence in the Army area of preventable diseases such as dysentry indicates that units are neglecting training in Fiel hygiene.

2. The importance of sound training and strict discipline in th phase of Army activities must be realised by all ranks, as sickness can destroy an army far more quickly and completely than enemy action

3. Hygiene staffs are provided in all formations, and these mus energetic and practical. A hygiene inspector is a unit's technical adviser against its most dangerous enemy, and his advice should be sought deliberately, never rejected or avoided.

4. An efficient unit always has a low wastage rate, because it prevents unnecessary disease.
