~~INTELLIGENCE SUMMARY~~

(Erase heading not required.)

Instructions regarding War Diaries and Intelligence Summaries are contained in F.S. Regs., Part II. and the Staff Manual respectively, Title pages will be prepared in manuscript.

Place	Date	Hour	Summary of Events and Information.	Remarks and references to Appendices
WADI SARAR (Pal) MR.138135	18/24 Feb.41		During this period balance of Coy. completing details of work, expediting ballasting and proceeding in small parties on 4 days leave.	
	19/24		Ballasting of line proceeding rapidly. Engine spur and locomotive pit in Station Yard completed.	
	25.2.41		C.of I held in connection with derailment on 16.2.41. President of Board, Mjr.MM.Newman, 1 Aust. Survey Coy. AIF. Members - Lieut. N.Taylor, 3rd Aust.Rly.Con.Coy - Mr D.A.M.Cooper, Asst. D.E. Pal.Rlys. Lydda. Shorthand writer Sgt.E.J.Kerr, 3 Aust.Rly.Con.Coy. 9 Witnesses (mil.Personnel) examined. Briefly report of Board was as follows. 1. That 3 Arab Labourers were killed (one outright) and 18 injured. Accident not due to negligence 2. That derailment occurred at 1645 Hrs whilst personnel were returning to camp from work. 3. That persons injured were travelling legitimately on the train. 4. That the points at which derailment occurred had been tampered with by person or persons unknown. 5. That the points were efficient and in good order - trains had paased over them previously during the day. 6. That a poor telephone service caused considerable delay in procuring medical assistance and ambulances. Report forwarded to D.A.A. & Q.M.G. Lydda Area (Pal.)	
	26.2.41		O.C. visited RAFA (Job 540) in connection with new job.	
	27.2.41.		Coy. Orderly Roommoved to RAFA by Road transport.	
	28.2.41.		With exception of small amount of ballasting and erection of Kilo and grade posts work completed at Wadi Sarar Ammn. Depot. Available tents etc. being pulled down and taken to RAFA by road. MEDICAL: Health of Mil.personnel generally good. 231 Arab Labourers employed on work treated at R.A.P. during month. Posted strength at 28.2.41. 147 O/Rs. 4 Offrs.

AUSTRALIAN IMPERIAL FORCES

ADMINISTRATIVE INSTRUCTION NO. 3/41.

S E C U R I T Y

1. SECURITY OF ARMS & AMMUNITION: Each Officer and soldier is personally responsible for the security of Arms and Ammunition whilst in his possession or placed in his charge. In this respect the following arrangements will apply so far as this Company is concerned :-

Racks have been provided in Q.M. Store and the C.S.M. will parade each Section, separately, to the Store where rifles of all men will be placed by Q.M. in Sectional racks provided, and securely locked. Keys of racks will be retained by the C.Q.M.S. who will be responsible for safe custody. Rifles will not be taken from racks unless required by personnel on duty or on being transferred to another Unit. At the same time all Ammunition in possession of personnel will be returned to the Q.M. Store and locked in box provided for this purpose, Ammunition will only be withdrawn from the Store as required.

All Officers and Other Ranks will keep a personal record of the number of his rifle, rifle bolt, and pistol.

PISTOLS: Officers and N.C.Os will retain pistols and ammunition and will be held personally responsible for their safe keeping.

These instructions apply also to ATTACHED personnel.

2. CLEANING OF ARMS. The C.S.M. will make arrangements to parade each Section separately Once per WEEK, withdraw rifles from Q.M. Store, and have same thoroughly cleaned. A certificate to this effect will be submitted to O.C. weekly.

3. ARAB VILLAGES: All Villages are "OUT OF BOUNDS". When it is necessary for a party to enter a Village on duty, the Senior Officer or N.C.O. present will be responsible for discipline of the party. When on duty in a native Village, respect for the women and religion of the inhabitants will be strictly observed.

4. PERSONAL SECURITY MEASURES In principle all Officers, W,O's, and Sergeants armed with pistols will carry them at all times with the following exceptions :-

Over/2.

AUSTRALIAN WAR MEMORIAL AWM2020.71.3451

4. PERSONAL SECURITY MEASURES (Contd.)

(b) In Urban areas of Towns in which Troops are stationed other than those mentioned hereunder :-
Officers and O/Rs may move about singly and unarmed whether on foor or in W.D. or private vehicles in those areas which are "IN BOUNDS".

(2) In HEBRON and LYDDA Officers and O/Rs will move about in pairs BY DAY ONLY and will carry arms or mallet handles at the discretion of Local Commands. Walking out in these Towns by night is NOT ALLOWED.

5. CIVILIAN EMPLOYEES IN CAMPS - PASSES.

Civilian employees employed by Canteen, or for Sanitary duties or other purposes are issued with Passes and these must be produced on demand by sentries and other personnel. The loss of passes by civilian employees must be immediately reported to Coy. Orderly Room. Passes issued are available only for the area controlled by O.C. of Company. (See Appendix "A" for type of pass issued by Company).

Civilians desirous of entering camp area and not in possession of authorised pass will be questioned by sentry approached and if considered necessary, will be conducted to Coy. Orderly Room by sentry, who will be further instructed.

6. SECURITY OF INFORMATION:

The greatest care MUST be exercised in conversation with civilians and also when using a telephone. When on leave and staying at Hotels, the entering of Regimental No. and name of Unit in visitor's book is forbidden.

Wadi Sarar. (Pal.)
11 Feb.41.

C. R. E.
Force H.Q.

D.C.R.E. Sarafand.

SUBJECT: Transfer of No.3 ARCC (RAE) to RAFA.

REF: Tn/P.436/397 of 9 Feb. 41.

1. Respecting above memo addressed to H.Q.Rly.Con. & Mtce Gp.RAE., copy of which was forwarded to you.

2. Regarding para 3 (i) of memo referred to - it would greatly facilitate establishment of camp at RAFA and expedite commencement of work there if permission be granted for all Tools, Camp Equipment etc., obtained from Sarafand to continue on charge to this Company. In this connection I would point out that [illegible] considerable delay occurred in expeditious commencement of work at Wadi Sarar owing to lack of tools and equipment generally and it is essential that a repetition be avoided.

3. As the matter is urgent will you please advise quickly.

EJK.

Wadi Sarar (Pal.) وادي الصرار القوى الاسترالية الامبراطورية 11 Feb. 41. ١١ فبراير ١٩٤١

NOTICE TO ARAB LABOURERS

The work at Wadi Sarar is now almost completed. The next job will be at RAFA and it is the wish of Major Farley to take as many of the labourers as possible from Wadi Sarar to RAFA. Men willing to go to that place to wok are invited to give their names, and address, to Abbas Salahat at once. It must be understood that those who volunteer will not necessarily be accepted. Those accepted will be given notice in time to enable them to make arrangements to go to RAFA.. The rate of pay will be the same as you are now receiving. Tents will be provided for your accommodation at RAFA. You will go there on train provided by the military authorities about the end of the month.

EJK. Sgd: W.M.FARLEY, Mjr.

REORGANISATION OF TRANSPORTATION DIRECTORATE, G.H.Q. MIDDLE EAST.

1. The above Directorate has recently been reorganised and the work divided between the following branches :-

(a) Directorate General of Transportation.

(b) Directorate of Docks and Inland Water Transport.

(c) Directorate of Railways

(d) Directorate of Transportation Stores.

2. The functions of each of the above Directorates are briefly as indicated below.

DIRECTORATE GENERAL OF TRANSPORTATION:

Controls policy and all general questions relative to the provision and planning of the necessary facilities to meet the requirements of the army for Transportation in the Middle East, apart from Sea Transportation. Also co-ordinates and exercises general supervision over the technical work of the other Directorates of the Transportation Directorate including Branch Directorates overseas.

DIRECTORATE OF DOCKS AND I.W.T.:

Is responsible for the technical and executive control of all Military Docks and I.W.T. work in the Middle East, and for the provision of the necessary facilities required in this connection.

DIRECTORATE OF RAILWAYS:

Is responsible for the technical and executive control of all work in connection with the railway operational requirements for military purposes on the Egyptian and Palestine Railways, and for the provision of the additional facilities required in this connection.

DIRECTORATE OF TRANSPORTATION STORES:

Is responsible for the executive control of all matters connected with the provision and issue of technical stores, equipment and materials required for the Transportation Directorates.

3. As each directorate is responsible for the functions indicated all correspondence in connection with executive matters relative to these functions should be addressed to the Directorates concerned direct. All questions relative to policy and general administrative matters, however, should be addressed to the Director General Transportation.

Appendix A is a chart setting out the revised organistation and giving the designations of the Officers in the various Directorates.

Appendix B gives details of the work undertaken in each of the sub-Branches of the Directorates.

Appendix C is a complete list of Officers giving their room and telephone numbers.

All Branches, G.H.Q.

The Transportation Directorate, M.E. has recently been reorganised and expanded. Attached is a note which gives an outline of the reorganisation together with Appendices which show this diagramatically and indicate briefly the functions of the individual Directorates and their Sub Branches.

Appendix "C" will be circulated as soon as the full list of Telephone Nos. is available. Telephone Nos. of Senior Officers, however, are noted on Appendices A and B.

Will Branches please address Directorates direct with respect to matters which come under their functions. It would also be appreciated if copies of minutes of Meetings, circulars such as General and Detachment Orders and Camp Instructions could be sent to Directorates to save time and speed up work,

C O P Y.

Subject: Railway Accident at WADI SARAR on 16 Feb 41.

H.Q. Lydda Area. Tn/P.289.

In confirmation of conversation of 17 Feb 41, D.A.Q.M.G., LYDDA Area - [redacted]; details of the accident which occurred on 16 Feb 41 in connection with the railway construction at WADI SARAR Depot, and involving death and injury to Arab labour employed thereon, are as yet unknown in this office.

I am not taking any steps to institute enquiries into the cause of the accident, as it is presumed you will convene a Court of Inquiry which will report fully on the matter. May a copy of the proceedings be sent to this office please.

As the Inquiry is likely to be largely of a technical nature, it is suggested that it should be presided over by an Officer with Railway experience. Major M.M. Newman, O.C. No.1 Rly. Survey Coy., R.A.E., GEDERA, is suggested as suitable.

P. Rlys are concerned only as far as the labour is recruited and paid by them on behalf of the Army. It is suggested that they should be represented at the Inquiry by Mr. Taylor, District Engineer, P. Rlys., LYDDA.

Attendance of all necessary witnesses can be arranged by O.C. No.3 Rly. Const. Coy., R.A.E., and by District Engineer, P. Rlys., LYDDA.

AUSTRALIAN WAR MEMORIAL AWM2020.71.3451

TRAIN DERAILMENT AT WADI BARAR, 16 FEB.41.

Ist WITNESS: No.[illegible] Driver CONSTANTINE J. 199 Fly.Workshops Coy. R.A.E. having been called and duly sworn states.-

I am the driver of R.D.Loco No.1 at Wadi Barar. At about 3.45 PM. on 16 [illegible] I took a train from Wadi Barar Statio in a Western direction to approximately Chainage 1150½ where some material was discharged. After discharging the materia it was then about knock off time, approximately 4.30 PM., as the train was prepared to return. On returning two small flat top trucks would be propelled and the engine travelling in a forward position. Before starting an attempt was made to overcrowd the two flat tops preceding the engine wit Arab labour. Many of these were refused accomodation on the trucks and the train started back with approximately a number approaching 100. All these men were made to sit down before starting. The shunter was on the engine plat with me, slightly behind, and although I could not see him he was probably keeping a lookout ahead. From the point of commencement of journey the curve is relatively a right hand one and from my position on the driving side I had goo visibility around this curve right up to scene of derailment. As we approached the points concerned they wer in my opinion, not correctly for the Main Road. At this time we were travelling at about 10 miles per hour. My first intimation that anything was wrong was when I saw the leading flat top start to take the loop road. On seeing th leading wagon take the wrong road I applied my brakes quiet so as not to jerk the trucks. The Regulator had been close just prior to this action; I brought the train to a standst as quickly as was then possible. After definitely being convinced that the trucks were by this time derailed I descended from the engine and found it to be with all wheel on the Loop Road and that two men were lying under the engi From the position of the two leading trucks it was obvious to me that we were badly derailed and to release the men under the engine I proceeded to uncouple the engine. Having uncoupled the engine I took it back clear of the injured men. I then walked back to the points and found them to b correctly set for the main road with the tumbler in its correct position. The engine was then brought back to the main and I proceeded by/Return Main road to Wadi Barar wher I stabled my engine. I had been during my shift trailed through and passed the points at which the accident occurred several times, and did not notice anything which would have indicated that they were not efficient.

By Lieut.Taylor. Q. Have you at any time noticed any of the points apparently interfered with?

A. Yes; on three occasions when I had been going out to work in the morning [illegible] POINTS HAD BEEN opened for to derail the engine and on one occasion it was pointed out to Lieut. Taylor and this is the reason I am keen on noting facing points when proceeding.

The evidence is read over to witness who signs

and withdrawn.

AUSTRALIAN WAR MEMORIAL AWM2020.71.3451

[illegible] WITNESS. NX.20817 Spr. MALONEY P. 3rd Aust.Fly.Constr.Coy. RAE. having been called and duly sworn states.-

I was acting as Fireman on the shunting engine on the 16 Feb. 41. When we left work to return to camp in the evening the train was composed of an engine and two 10 ton flat top trucks. The trucks were in front of the engine.

There were a number of Arab Labourers on the trucks but I would not say how many as I did not make a count of them. They were all sitting down as Sapper Sydenham, who was Shunter, made them do so. He also told them to keep their feet clear of the buffers. When we came out of the curve to the straight our speed was no more than 8 miles an hour, and out of the curve the speed was approximately 10 to 12 miles an hour at most. We went over the crossings at about that speed. I did not know there was an accident until I heard the shouting and there was no apparent bump of the engine. The Driver was looking out and stopped the engine by using the steam brake. It would have taken him longer to pull up by using the handbrake. I was standing in the middle of the cab of the engine and the shunter at the other side.

By Lt.TAYLOR. Q. Did you look at the points after the accident?

A. Yes; they had not been touched and were set for the main line.

By President: Q. You were firing at the time and did not notice the points yourself.

A. No; but I heard Sapper Sydenham tell the Driver that the points were O.K. and the driver said "Right-O", I can see them myself".

The evidence is read over to witness who signs

P Maloney

and withdraws.

3rd WITNESS: No.NX.7220 Spr. SYDENHAM R. 3rd Aust.Fly.Con.Coy.RAE. called and duly sworn states.-

I was acting as Shunter on the train on 16.2.41. On the return journey on that day two 10 ton flat tops were in front of the engine. There were a considerable number of Arab labourers on the trucks and before starting I warned them to take their feet away from the buffers and to be seated, which they all did, and when the train started they were all comfortably seated. As the trucks were loaded I stopped other labourers from getting on the train. As there was no room on the flat tops I got on to the engine myself. The speed off the curve on to the straight, in my opinion, was about 20 miles an hour and the driver checked the engine. We ran through the crossings at approximately 15 miles an hour - we ran through three crossings. I was leaning out of the engine cab and had a good view of the road. I noticed nothing wrong at the points in question. I saw the leading truck jump in the air - I was keeping a sharp look out ahead. When I saw the truck jump I immediately called to the driver to stop and he applied the steam brake, whi which was the only one applied. I was standing adjacent to the driver, leaning out in order to give the driver a good view through his window. I asked the driver if I was in his way and he said "No". It is possible that the Fireman would be obstructed from working the handbrake. All the men were not thrown off the trucks. I jumped off the engine and had a look to see what the position was. I noticed two men under the engine but none under the trucks. I did what I could to make one of the men under engine comfortable and could see that the other was dead.

11

[redacted] (Contd).

I then looked around to see if the engine could be moved. I then went to the points to examine them - they were full on to the LOOP when I examined them but the Tumbler was not in its correct position. I then went back to see if I could give any aid to the men. The engine was not moved to extricate the man who was alive under it. In my opinion the accident was caused by split points., the points not being properly set.

By President:

Q. At what mileage were you working when you prepared to go home?

A. At about Culvert 16.

Q. At approximately what time did the derailment occur?

A. I looked at my watch whilst making men under the engine comfortable and it was 4.45 PM.

Q. Why did it take you a quarter of an hour to travel from Culvert 16 to the point of derailment?

A. We had many interruptions in picking up men.

By Lieut. [redacted]: Q. The points in question - They appeared to be set to the main line?

A. To the Main.

Q. After the derailment when you examined the Points they were set to the LOOP?

A. Yes: but I switched them two or three times and left them set for the Main.

The evidence was read to the Witness who signs

R. M. [redacted]

and withdrawn.

[redacted]: NX.12197 Lieut. [redacted] C. 3rd Aust.Fly.Con.Coy.RAE. having been called and duly sworn states.-

On the afternoon of 16.2.41 I was on duty and I saw train despatched with workers for Camp. The train was despatched at about 1635 hours from approximately mileage 15,000 ft. The engine was propelling two 10 ton Flat top wagons loaded with Arab labourers. I then went back to camp in a truck and at about 4.30 PM., Corporal Burns informed me, in camp, about the accident. I immediately had Orderly Room instructed to ring for Ambulance and to advise Headquarters. I then went to the scene of the accident and found the train in the position shown in Plan "A" submitted. I saw to the comfort of the injured and made arrangements for their transport to Hospital at Rosle. I examined the track for about 100 ft. preceding the points and at the point of derailment and saw nothing which, in my opinion, would cause it. The following day I made survey of the scene of the accident plan marked "A" which shows position of engine and trucks after derailment, also markings on sleepers caused by the two derailed trucks. I also took photographs illustrating the points in question, which I now submit, (1) showing position of trucks when derailed train came to rest, (2) illustrating kink in main line, apparently caused by a flat top being dragged across and also kink in siding where flat top resisted this, and photos (3, 4 and 5) to illustrate lever diagram of Plan "A".

//

4th Witness (Contd.)

By President. Q. In the course of your duties have you had any reason to believe, or have you had evidence, of points being wilfully interfered with.

A. No.

Q. You have no reason to believe that this particular set of points were tampered with.

A. No.

The evidence is read over to witness who signs ~~and with~~

_____

and withdrews.

5th WITNESS: No.NX.7135 Sapper BAILEY W.J. 3rd Aust.Rly.Con.Coy. RAE. having been called and duly sworn states.-

I work with the Platelayers and was travelling back on the engine to Camp on completion of work on 16 Feb. 41. The train was made up of two trucks in fron of the engine. There were no military men on the trucks - there were Arabs but how many I am not able to say. The Arabs were all sitting down on the trucks but I heard no instructions given to them. When the train came to the curve approaching the straight I would say it was travelling at approximately 10 miles an hour and it checked speed going towards the points. I noticed the back part of the train swinging on to the loop line and thought it strange and I then saw an Arab jump off on the side I was on, another Arab also jumped off but I saw no others leave the trucks. When the train pulled up I jumped off to see if I could give any aid. Sapper Cooling had a look at the points immediately the engine stopped and he said they were set for the main line. I have no idea how the accident occurred. I never felt any shock and did not know the trucks were off the ~~main~~ line until the train nearly stopped.

By Lieut.Taylor. You did not look at the points yourself?

A. No.

Q. Immediately the engine stopped Sapper Cooling went back and looked at the points?

A. Yes.

By President: Q. He found them set for the main line?
A. Yes.
Q. On what part of the engine were you riding?
A. I was riding on the engine plate, about the centre, towards the right hand side

The evidence is read to Witness who signs

J. Bailey

and withdrews.

[redacted]: No.WX.8282 Sapper GOOLING F.B. 3rd Aust.Rly.Con.Coy.RAE. having been called and duly sworn states.-

I was on the train returning to camp on 16.2.41. The trucks, two 10 ton flat tops, were being pushed in front of the engine. There was quite a few native labourers on the trucks. I got on the train where it started from. Before starting Sapper Sydenham told them to sit down and to keep their legs in safely. Travelling down on the straight I should say the speed was about 10/12 miles an hour. The speed was not excessive. I never noticed any increase in the speed after leaving the curve. I was in cab of engine, the driver on my right and the Shunter, Sapper Sydenham, at the other opening on the driver's side. I suddenly heard Sydenham tell the driver to stop. I had a look at the points when the train stopped because I wondered what made the train jump the points. I had a look at the switch plates which were straight on the main line. I did not see anyone near the points before me. I did not touch the points and did not notice anyone near the locality of the accident. To my knowledge the Loop was not used during the day and the train had passed along the main during the day.

By President. Q. Are you sure that when you observed the points on walking back that they were then set for the through main.

A. Yes.

Q. You are certain that no one else was at the points before you.

A. I am not positive but I returned quickly to the points from the derailment and saw nobody.

Q. While travelling on the train prior to the accident would you have a clear view of the points?

A. No.

Frank B. Gooling

[redacted]: No.WX.8304 Sapper MURRAY S. 3rd Aust.Rly.Con.Coy.RAE. having been called and duly sworn states.-

I was on the train returning to the camp on 16.2.41. The engine was propelling two trucks with Arabs sitting on them. Coming around the curve approaching the straight the train was travelling no more than 8 to 10 miles an hour. Coming off the curve the speed was decreased coming on to the points. My attention was drawn to something being wrong when I heard Sapper Sydenham call out "Stop", and also the shouts of Arabs. The engine was stopped very quickly. In my opinion the engine was not overcrowded and the Driver, Fireman and Shunter were not impeded in their work. I cannot throw any light on how the accident occurred. From my position on the engine I was able to get a clear view of the points as we approached them and they appeared to be set for a straight road. After the accident I walked back to the crossing and observed that the points were still set for the main road.

By President: Q. Did you see anybody about the points before you looked at them and observed they were in correct position?

A. No.

Q. In your opinion they had not been interfered with after the engine passed over in the wrong direction?

A. Nobody interfered with them while I was there.

Q. Can you account under these conditions for the engine being on the Loop road and not being derailed?

A. I think it was a case of split points.

11

S Murray

5th WITNESS. No.QX.2891 Cpl. DUNNE C.P. 3rd Aust.Rly.Con.Coy.RAE., having been called and duly sworn states.-

I was on the train returning from work to camp on 16.2.41. the train consisted of two trucks, propelled by the engine towards the camp, along the main line. I would say there were between 100 and 150 Arab labourers on the two trucks but I did not make a count of them. The train was travelling off the curve at about 6 miles an hour. When we left the curve the speed increased slightly. We crossed the first set of points (A1) and shortly after leaving this we crossed the second set of points (B). Then on passing the Loop points I heard a general scream from the Arabs and saw at least two Arabs jump off; they picked themselves up and looked under the train. The speed when the crash occurred was no more than 10 to 12 miles an hour. I saw that a man was jammed underneath the cowcatcher of engine. I then left the scene and returned to camp to report the matter to C.O. The names of military personnel on the train are Sapper Pollard, Sapper Murray C. myself and Sappers Sydenham and Maloney. Who was acting as Fireman, and Driver Constantine of 199 Fly. Workshop Coy. R.E.P. Sapper Sydenham was acting as Shunter. Nobody said that the driver was going too fast and nobody asked him to increase speed. I was standing in the cab of the engine. The accident occurred at about 4.45 PM.

By Lieut.Taylor: Q. Did you see the points before the train arrived at scene of derailment?

A. No.

Q. In you opinion did the Arabs see anything wrong with the points?
A. No. The Arabs shouted after the first truck passed the points.
Q. Did you look at the switch points after the accident?
A. No.

The evidence is read to witness who signs

---

and withdraws.

6th WITNESS: QX.7201 A/Cpl. Osborne J. 3rd Aust.Rly.Constr.Coy.RAE having been called and sworn states.-

I am Medical Orderly of No.3 Aust.Rly.Constr. Coy. I was called to the scene of the accident on 16.2.41. I took stretchers and first aid equipment from the R.A.P. A 30 Cwt lorry was available and I used this for getting there quickly. On arrival I saw 7 or 8 native labourers who appeared to be seriously hurt. I examined and did all I could for them and had them placed in the 30 Cwt lorry and taken to Ramle Hospital. I instructed the driver to watch out for the Ambulance on the way. Six men were placed in the 30 Cwt lorry and two others were put on stretchers and sent to Ramle Hospital in a utility truck. A number of others who were not seriously injured were treated by me on the spot. Later others attended at R.A.P. in the camp and were treated there by me. Several ambulances arrived later and other men were sent to Ramle.

By President: Q. Did you see a dead man when you arrived at scene of the accident?
A. Yes; The back of his neck was badly cut, both legs were broken and abdomen was open.
The evidence is read over to witness who signs

---

and withdrawn.

INVESTIGATION CLOSED.

9th Witness (Contd.)

By President: Q. Did you at the time know his name?

A. No.

Q. How many men were sent to Hospital?

A. 10. One man was carried in front seat of the utility truck.

The evidence is read over to witness who signs

W. J. Osborne

and withdrawn.

EVIDENCE CLOSED.

AUSTRALIAN WAR MEMORIAL AWM2020.71.3451

DERAILMENT AT WADI SARAR 16 FEB. 42.

The Board having considered the evidence Reports.-

1. THAT the derailment which occurred at WADI SARAR on 16 Feb. 42 in which three (3) Arab Labourers were killed and 18 injured was an accident and not the result of negligence on the part of any person or persons.

2. THAT the derailment occurred at 1645 and although outside working hours (i.e.0730 to 1630) that the men killed or injured were legitimately returning from work, the method adopted being the usual one for return to the point of dismissal for the day, ie. WADI SARAR Station, at about 1700 Hrs. The accident may therefore be considered to have occurred within working hours.

3. THAT the Points at which derailment occurred had been tampered with by person or persons unknown and had been left in a condition that the leading pair of wheels of the leading propelled vehicle struck the right hand switch blade causing at least the leading pair of wheels to take the Loop Road.

4. THAT the Points in question were efficient as the construction train had passed over them several times during the day in both directions and it had not been necessary for any authorised person to alter them.

5. THAT a poor telephone service caused considerable delay in evacuating injured men to Hospital and a more efficient telephone service is recommended for the operation of this line or works of a similar nature in future.

DERAILMENT OF TWO- 10 TON FANS AT WADI SARAR - 16 FEB 41.

On the 16th. instant at 1645 hours Engine W.D.I was propelling two 10 ton Fans containing a number of Arab Labourers who were returning from work. The Fans were derailed at the Points to the Loop adjacent to Spur B. There were 21 Casualties - One man was killed outright, and two died on the way to Hospital. The list of casualties is enclosed. Particulars of injuries have not yet been received.

From an inspection it appears that the fans split the points owing to them not being properly set. As the engine and a large number of trucks had passed previously twice through the points each way, it appears that somebody had opened the points to the Loop for some purpose and had not properly reset them for the main. Investigation is being made in this regard. From statements made by Military personnel who were on the train, it does not appear that there was any negligence to take ordinary precautions.

Immediately on report of the accident, the Ambulance and Police at Rumle were notified and all possible steps were taken by us to alleviate sufferings of the injured and convey them to Hospital.

I await instructions regarding further action.

AUSTRALIAN WAR MEMORIAL AWM2020.71.3451

Translation from Arab. Newspaper.

A Derailment of two Wagons

4 labourers killed and 17 wounded

Yesterday at half past four, an accident took place, where 4 were killed and 17 were dangerously deeply and slightly wounded.

The accident happened Thus:- One of the trains that carries the labourers was returning back at half past four of yesterday night and these labourers were all sitting on two Ford Wagons before the engine. One Kilometer before their work, the two wagons derailed and kept moving about 50 meters on the sleepers. In consequence a big shock occured and the labourers fell violently off the Wagons, where two died instantly and a third died afterwards while the fourth died in the Hospital.

Their names are as follows:- (1) Hamed Moustafa Abou-Jamil from Kouleh 25 years old (2) Abdulla Issa from Abou-Shousha 22 years old (3) Mahmoud Matar from Deir Soumeid 23 years old, and the name of the fourth is not yet Known.

The wounded were 17; they were sent to the government Hospital at Ramle, and after that 9 of them that were dangerously wounded were sent to the Hospital at Jaffa.

Their names are as follows :—

1) Mouslem Ali :- From Khoulda, he is wounded in his breast and left hand
2) Saleh Mouhamed Saleh :- From Beit Hantala, he is wounded in left hand and foot.

AUSTRALIAN WAR MEMORIAL AWM2020.71.3451

3) Mahmoud Ali Kateh :- From Aleou Shousha, he is wounded in his face, head and left foot

4) Mouhamed Issa Souleiman :- From Aleou Shousha, he has got great shocks in his face, eyes and breast.

5) Hassan Souleiman Moubarak :- From Koulek, he is wounded in his head, hands and breast

6) Othman Moustapa Othman : From Seidous (Ramle District), he has his fingers cut off from his right hand, and is wounded in his head and body

7) Yacoub Ismaeil Dalmash :- From Lydda station, he is deeply wounded in his left leg.

8) Mohamed Ismaeil ; he is wounded in his hand, and has left the Hospital

But the rest in the Hospital at Ramle are six, two of them left the hospital after being treated.

We understood that the points were wrongly turned, when the train was passing from the land of Katyatje to Wadi ES-Sarar.

The Police of both Ramle and Katra went instantly to that place and sent the wounded to the Hospitals; and the case is now in the hands of Katra Police, because the accident occured in his district.
