SECRET

ADDENDA TO 2/6 AUST CAV (COMMANDO) REGT ADM ORDER No.27 of 4 Sep 44.

DISPOSAL OF SIGNAL EQPT.

9 Sep 44.

1. CIVIL TELEPHONE INSTALLATIONS

In no circumstances will civil telephones or switchboards on loan to units be removed by units to new locations.

Telephones are being collected by LHQ Signal personnel immediately prior to departure of unit rear parties.

2. CABLE

All sub unit D 111 cable, recently condemned as unserviceable by Sigs 6 Aust Div, will be returned to/HQ, suitably labelled, by 110930K.

QM will arrange return of such cable together with any other unserviceable cable to Sigs 6 Aust Div before 12 Sep 44.

No cable, other than that built up on poles and used for permanent communications will be left in unit lines.

3. TREATMENT OF ACCUMULATORS FOR TRANSPORT

All accumulators on charge to sub units will be delivered to Sig Tp attached by 091400K for charging. They will be fully charged as specified by the individual manufacturers as soon as possible.

When fully charged the following action will be taken by sub units:-

(a) Accumulators will be emptied and the electrolyte stored in suitable containers for transport.

(b) They will then be thoroughly washed out with distilled water to remove all residue and impurities and securely packed in crates marked "Handle With Care - to be stowed in a cool place".

(c) Immediately after arrival at destination the accumulators will be refilled with electrolyte of the same specific gravity as that drained from them and then will be fully recharged.

(h) All Security measures for disposal of documents etc will be strictly enforced.
(i) Contracts and social appointments will be terminated with discretion so that NO movement of troops is indicated.

2. ALL orders regarding movement are SECRET and particulars will be communicated by COs only to those officers whose duties necessitate knowledge of such information, and then only at the last moment consistent with the efficient discharge of such duties.

3. Commanders of units and depts will impress on all ranks the vital necessity of NOT making in their correspondence any allusion to movements, pending, in progress or completed. Stringent orders will be issued that both before embarkation and after disembarkation, or until orders are issued to the contrary, NO telegrams will be sent notifying change of location or otherwise indicating that a move is contemplated, taking place or has taken place.

4. It is emphasised that unless otherwise ordered a change of location does NOT alter the postal or telegraphic address for private correspondence. Officers responsible for censoring correspondence will be warned to pay particular attention to these points.

5. CAMERAS: The use of cameras, except by personnel acting under specific authority during an embarkation or other move is forbidden. Approved photographers are provided with properly signed authority which must be produced on demand. Cameras other than official camera within the Regt will be withdrawn and forwarded by registered mail to
(a) Such persons as the possessor of the camera directs and at the expense of the possessor.
(b) HQ of the nearest L of C area.
(c) Officer i/c of the nearest Base Depot.

6. DIARIES AND NOTEBOOKS: Shall NOT be sent through the post.

Sqn IO will be responsible that all such material be collected and sent through Base Censor to the appropriate District Record Officer for storing.

ADM ORDER No. 27.

PREPARATION OF VEHS FOR MOVEMENT BY SEA.

1. All vehs in this unit will be prepared for movement by sea. TO will be responsible for such preparation whether the vehs are with unit or in any veh pool awaiting movement. Attention will be paid to all parts liable to be affected by salt water as any veh may be carried as dock cargo.

2. The following points are referred to for special attention :-

(a) Where ignition keys are provided, a label will be attached to each, showing unit serial number, the type and make of the veh and its WD number. Just prior to the actual loading of the vehs ignition keys will be attached to the steering wheel.

(b). Radiators will be filled; engine, gear box, transfer case and differential oil levels checked; accumulators topped up and fully charged, and tyre pressures corrected. Sufficient petrol will be provided to run to point of embarkation.

(c) All steel parts likely to be affected by salt spray will be oiled or coated with grease. These include springs and shackles, drag links, tie rods and ball-joints, clevis heads and pins, clutch and brake pedal bearings. Full normal greasing of the veh will be effected and the grease exudations allowed to remain.

(d) A coating of grease will be applied around the headlamp bezels and on the lense to prevent ingress of moisture and subsequent damage to reflectors.

(e) At the point of embarkation petrol tanks will be emptied and engines run until carburettors are empty. (one 4-gal tin of petrol per veh will be carried for immediate use on disembarkation.

4. Escorts will be responsible for the vehicles and eqpt in their charge and, particularly, will guard against the theft of tools and/or associated stores on them.

ORDER No. 27.

MALARIA.

1. The following anti-malarial precautions will be rigidly policed with careful attention to every detail. These instns are the responsibility of every officer of the unit. Any departure ~~xxx~~ from the routine laid down on the grounds of operational necessity will be carefully investigated and if considered unjustified will be regarded as a matter for strict disciplinary action.

2. From 1700 hrs each night until 0600 hrs each morning, every member except when protected with a mosquito net, will wear slacks, boots, gaiters web, and long sleeved shirt or jacket with sleeves rolled down.

3. Bathing is prohibited during the above danger hours and troops will dress and undress during such period under cover of mosquito nets.

4. Every member will be issued with a mosquito net and this will be used at night. It will be erected during the hours of daylight in order to ensure that no mosquitoes are in the net or can get in. It is the responsibility of every member to ensure that the net on issue is at all times kept in good repair. Regular daily inspections of mosquito nets will be carried out under the supervision of an offr and provision immediately made for ~~xxxxxxxx~~ the replacement of damaged nets where not repairable.

5. Mosquito spray is provided and where possible the inside of mosquito nets will be sprayed prior to the member getting into bed. Where a member leaves his bed during the danger period as in para ~~xxxx~~ 2 above, he will ensure that every precaution is taken to prevent mosquitoes getting in during his absence and on his return will, where possible, spray the inside of the net before getting into bed.

6. After men have turned in, an inspection will be made under offr supervision to ensure that all personnel are sleeping under a mosquito net and that the nets themselves are securely tucked in under the blankets. All subunits will ensure that reports are received nightly that this order is being complied with.

7. Mosquito repellant lotion (MARY) is readily available for issue through AASC channels. This will be applied by all members to all exposed parts of their body at 1700 hrs each night and thereafter at 2 hourly intervals until the soldier goes to bed. Particular care will be taken to ensure that all guards, piquets, sentries and troops when nets are not being used, apply the lotion at the above 2-hourly intervals. Personnel visiting latrines during the hours of darkness will apply the lotion to the exposed.

8. Atebrin tablets are provided to maintain all ranks in good health by the suppression of malaria. One tablet of atebrin will be taken by all ranks, under strict officer supervision, every morning after breakfast. Each tablet will be swallowed whole and followed by a drink of water. Sub Unit Comds will ensure that where possible parades are held for the purpose of ensuring that all ranks do take their atebrin. This parade will be supervised, strictly, by offrs. Precautions, to ensure that fatigues, guards, sentries, cookhouse staffs etc. do take the atebrin at the correct times, will be taken.

AUSTRALIAN WAR MEMORIAL AWM2020.71.881

9. Containers, individual, atebrin (yellow spot), will be issued to all ranks. These will contain 30 tablets and are to be held by all ranks at all times as a reserve. On no account will these tablets be consumed except in an emergency when members may be separated from normal supply and then only on the authority of an offr.

10. It is the responsibility of Sub-Unit Comds to ensure that all precautions possible are taken to prevent the breeding, in their sub-unit areas of the anopheline mosquito. Sub-Unit mosquito squads as provided for in GRO A404/43 will be employed under supervision of sub-unit RMOs within sub-unit lines and the immediate vicinity.

11. All sub-units will adopt full anti-malarial measures prior to movement at a date to be notified by this HQ. The dosage for this period is two tablets per day. Subsequently the dosage will become one tablet per day (see para 8 above). If for any reason, such as seasickness, the taking of atebrin is not possible, the following routine will be adopted :-

(a) If atebrin be not taken on one day, two tablets will be taken on the following day.
(b) If atebrin be not taken on two consecutive days, three tablets will be taken on the third day.
(c) Thereafter the normal dosage of one tablet per day will be followed.

SCRUB TYPHUS. instns

12. The following ~~xxxxxxxxxx~~ regarding the precautions against Scrub Typhus will be strictly enforced and any departure from these orders will result in disciplinary action being taken against all offenders.

13. Anti-mite fluid will be used at all times by all ranks to protect themselves from the mite. The scale of issue of anti-mite fluid will be 2 ozs per man per month and fluid may be obtained on indent through normal channels. The method for use is as follows :-

(a) Clothing should be treated every 14 days (treatment will withstand 7 washings in soap and cold water, half as many if the cloths are boiled.
(b) When men are fully exposed to risk,ie, when they have to sit or sleep in mite infested country, the method of ~~xxxxxxxx~~ treating the clothes is as follows :-
A man dips his fingers in the fluid, taking enough to smear the hands lightly. The clothing is rubbed and worked between the smeared hands at the rate of at least 4 smears per sock, 6 per trouser bottom (to provide a band from the above the gaiters to above the knees), and 6 about the fly. The shirt receives 6 smears about the wrist, 4 to each complete sleeve, and 8 to the shoulders, collar, and front. If the smears are light enough just to cover the hands it will be found that the area will be treated by ½ oz or a little over, and should be gone over again until 1 oz is used. The job can be done in under 10 minutes per set, with practice.

(c) If they are only required to stand or walk in mite infested country, socks and trouser bottoms need only be treated, and 1 oz of the fluid will serve for 5 or 6 sets of clothes.

(d) If socks are not worn, at least 4 smears inside the boots have proved to protect.

(e) Where troops have to go on long expeditions, one pre-treated set of clothes should last three weeks.

1. INFORMATION.

(a) Topographical - as already passed to Sqns.

(b) Enemy - Additional infm has been received which enables a clearer picture to be made of recent enemy movesin the WEWAK area and adjacent hinterland.

It appears that ~~xhix~~ it was planned to evacuate some key pers by submarine on or about 10 Oct, success or otherwise is not known.

Further progress has been made in the move towards the MAPRIK area by elements of 20 and 51 Divs. Indications are that the enemy intends to live off the old GERMAN and NATIVE Gardens in the mountain areas. From infm available the gardens in this area are not thought to be sufficiently fertile to support more than the local population.

It is known that the three enemy Divs in this area have suffered severely both at ALLIED hands and as a result of attrition. One recent PW who is considered reliable stated that the main enemy fighting forces remaining in the area are as follow :-

20 Div - 1500
41 Div - 1500
51 Div - 3000

[illegible]

The JAPS are in some strength at SUMUL 16 miles SOUTH of BABIANG and appear to be preparing for a move through SAHIK to YAMBES.

Allied patrols operating along the OM RIVER ambushed an enemy party moving ~~xxxfAM~~ from YAMBIL to SUAU killed three and wounded one.

Native reports state enemy are digging foxholes and obtaining food from the natives at MAI.

(c) Own Troops.

I US FORCE at BES AITERAP is commandad by Lieut ~~XXXXXX~~ MACMAKIN.

II US FORCE at KAMTI is commanded by Lieut O'BRIEN

III US FORCE at PALAURU is commanded by Lieut QUINN

IV US FORCE at BABIANG is commanded by Capt MOFFETT

I. INTENTION

WAR DIARY 2/7 AUST COMMANDO SQN OCT 44

MOs REPORT

REDLYNCH - 2 Oct - 7 Oct 44.

Blankets on issue were in poor condition and dirty. On this account these blankets were not issued.

OONCONBA - 7 Oct - 14 Oct 44.

10 - 11 Oct. There was a two day route march. The distance was about 11 miles each way, but carried out in the heat of the day. The troops were carrying full equipment. About EIGHT men fell out during the march through the effects of heat, and because of the small amount of marching in the previous fortnight, nearly every man had blistered feet. A handful of men were incapacitated for two or three days afterwards because of blistering.

S.S. KATOOMBA - 15 Oct - 21 Oct 44.

Holds used as sleeping quarters were extremely hot, and had not been aired out. The ventilation during the whole voyage was particularly poor.

Latrines and washing facilities were primitive.

Three days after departure, there was an outbreak of Diarrhoea which affected more than half the Sqn. It was traced to meat which had to be prepared in a totally inadequate butchers shop. The trouble probably resulted from the process of thawing out.

On Action Stn signal, and trial evacuation of wounded to collecting points, the shortage of medical equipment was particularly noticeable. General medical treatment aboard ship was good.

On the voyage URTI increased owing to the crowded conditions, but skin inspection after the conclusion of the voyage did not show much increase in tinea, though some prickly heat rashes appeared.

AITAPE - 21 Oct -n31 Oct 44.

No mosquitos to be found in the daytime, a very few at night, NOT Anophlylene or AEDES in type. NO sandflies.

Flies were present in small numbers on arrival.

Because of swimming the number of infected external ears has increased. These now constitute one fifth of the sick parade.

HYGIENE REPORT
2/7 AUST COMMANDO SQN
OCTOBER 1944

HYGIENE DURING TRANSIT TO AITAPE:-

Hygiene conditions in staging camps, at REDLYNCH and CONOONBA, poor and very unsatisfactory. In both camps hygiene and sanitation seemed very disorganised, and little attention paid to either.

CAMP CONDITIONS ON ARRIVAL AT AITAPE:-
Kitchens:-

Improvised kitchen was established and although conditions were far from favourable, every effort was made to keep as near to hygiene standard as possible. These conditions prevailed for approx a fortnight, during which time a proper kitchen was established.

DISPOSAL OF SULLAGE WATER:-

This caused considerable worry during the first fortnight, as no provision for disposing of same satisfactorily could be made until grease-traps were installed. Method used was to dispose of same in pits, covering in after every meal.

REFUSE - WET:-

Considerable trouble was met during the first few days in disposing of Wet Kitchen Refuse, tins etc owing to an acute shortage of wood, and very little liquid fuel. The burning of refuse was most unsatisfactory, and undoutedly caused a fly breeding area. On arrival of Desilite an improvised incinerator was constructed. This consisted of 44 gal drums made into three rows. Two to each row end to end, covered with iron mesh. With what wood there was available placed underneath and oil poured over the top, the method proved satisfactory as a temporary measure. Oil burners are to be installed as soon as material is available. Approx fuel consumption of improved incinerator was 25 gals a day.

GREASE TRAPS:-

Grease traps at the new kitchen were altered to hold more water. By closing the existing inlet and outlet holes and lengthening the baffles, at least another ten inches of water was obtained. A pit sunk down to water level and encased with 44 gal drums, is used to take the effluent from the traps, two of which are used to give better cleaning of the water before entering the pit. The mthod shows promise of being satisfactory.

STERILISING OF DIXIES:-

Sterilisation points for troops to use before going to feeding points and after messing was established on the second day. The men have made good use of these and continue to do so.

LATRINES:-

One latrine was established on entering camp area. This was not much much more than five feet deep and not in the least satisfactory. All efforts to have another constructed during the first week was of no avail, and consequently the latrine was badly fouled and breeding flies in considerable numbers. During the second week another latrine was established in 9 Sqn area, and although owing to difficulty of putting same down, was a big improvement on the first.

Method laid down for their construction, is a pit is sunk to water level and then four 44 gal drums placed in the bottom three high(12 drums in all). The latrine seat is then placed over drums and fly proofed.

Considerable trouble is experienced in sinking pit owing to loose sand which falls in continuously. Only satisfactory method found up to date, is to construct galvanised iron frame well braced and gradually dug down to required level. Frame and iron are of course NOT re-usable, owing

AUSTRALIAN WAR MEMORIAL AWM2020.71.881

to pressure from sand and has to remain in the pit.

GENERAL:-

Mess huts for men, offrs and Sjts are under construction. Also an officers and Sjts kitchen and should be in use shortly. Camp hygien throughout area is definitely on the improve, and should during the next two weeks reach a high standard.
