(xi) In cases where the vehicle is allotted for several separate services throughout the day, one Work Ticket will suffice to cover the day's work, but separate entries must be made in the space provided.
(xii) On the back of the G2 the driver must report any unusual happening such as delay, accidents, or defects in vehicle.
(xiii) On completion of a day's work and after returning the vehicle to its Unit Transport lines, will sign both front and back of the G2 and hand to the Transport Office.
4. As the particulars required to compile AAFs G5s, G6 portion of AAB 20 War Log Book and for checking purposes against F55s and F78 are obtained from the G2 the necessity of seeing that G2 is most accurately completed in every detail is obvious.
5. COs will be held responsible for the observance of these and relevant instructions and will arrange regular checks to ensure that they are properly understood.

OsC platoons are instructed that individual personnel are to parade only once monthly, and that it is OsC pls responsibility to ensure that the day of the parade is in conformity with Q Store issue days.

672. MEDALS : PROVISIONAL ORDER FOR ISSUE OF THE RIBBON OF THE 1939/43 STAR.
The ribbon of the 1939-43 Star will be issued to personnel who have served with a unit in one of the qualifying operations or commands set out in GRO 289 Schedule A and B.
The area of service includes Europe, India, Burma, Middle East but NOT New Guinea or NT. Full details may be obtained from Coy HQ.
Final details of the full list of areas has not been completed yet, but in order to avoid delay, this order is promulgated to cover those areas, in which eligibility has already been determined.
As further areas are approved particulars will be notified.

673. NOTIFICATION OF CHANGES IN RESPECT OF NEXT OF KIN. Vide GRO 4330.
1. A member of the AMF may nominate any person as his next of kin for army purposes, although that person is not his legal next of kin.
2. It is the function of the 2nd Echelon organisation to notify fatal and certain other casualties sustained by a member to the person recorded in army records as the member's next of kun, or to any other person nominated by such next of kin to receive casualty advices.
3. Failure by a member to report promptly particulars of a change of next of kin or a change of address of next of kin, in order that the appropriate 2nd Echelon component may be advised, causes considerable administrative work to the Army and may delay or prevent notification of a casualty being given to the proper person, thereby causing distress to the member's relatives.
4. Each member will, therefore, be instructed that, on the occurrence of any event (such as his marriage or the death of his next of kin) which renders a change of the record of his next of kin desirable or necessary, he will promptly notify his unit of the change he desires to make. Similar prompt notification should be given of any change of address of his next of kin.
5. On being notified by a member of a change of his next of kin or change of address of his next of kin, a unit will immediately forward a casualty return containing the necessary particulars to the 2nd Echelon component for the area in which it is serving.
6. Each member will be warned that a change of his allottee or an entry in his AB 63 of a change in the particulars of his next of kin will not be sufficient to notify the 2nd Echelon organisation of a change in respect of his next of kin.

over/

AUSTRALIAN WAR MEMORIAL AWM2021.62.742

673. change in respect of his next of kin.
cont. 7. (a) Each member will be advised that, on his marriage, any will or codicil previously made by him, save in exceptional circumstances becomes of no effect and, under Australian Military Regulations, he is bound, upon marriage, to make a new will.
(b) On marriage, a member will make another will immediately, either on an AMF A150 or by a separate document and will submit the AMF 150 in an envelope (AMF A131), duly completed, to his unit HQ for transmission to the appropriate 2nd Echelon component.
(c) A member may obtain the assistance of an officer of the AALCin the preparation of a will.

674. ANGAU - APPLICATIONS FOR APPOINTMENT TO THE DISTRICT SERVICES.
Vide GRO s 15 Sep 44.
1. Applications are invited from members of the AMF for appointment to the District Services of the Australian New Guinea Administrative Unit (ANGAU). This unit is a formation of the AMF and carries on the functions of the former civil administrations of the Territory of Papua and the Mandated Territory of New Guinea.

OIL LEVELS

1. (a) It has been observed that Gear Boxes and differentials oil levels are too high in the majority of vehs.
(b) The attention of all ranks is directed to the following action which will be taken to ensure correct levels.

(A) Gear boxes will be filled to within ½ inch of filler plug.
(B) Differentials will be filled level with filler plug.
(C) In all cases vehs will be on a level plane before the above-mentioned components are filled or topped up.
(D) Gear boxes will be topped up only through filler plug provided for that purpose.

2. ENGINE MOUNTINGS Engine mountingnuts continue to be found in a loose condition. ~~XX~~ Officers, NCOs and drivers will give this matter their personal attention forthwith.

3. TYRE PRESSURES Tyres will be kept inflated to the correct pressures recorded on the wheel hubs of the respective vehs. OVERINFLATION is as detrimental as UNDERINFLATION.
Section comds will be held responsible for maintaining correct pressures, which will be checked on all vehs under their comd at early morning maintenance.

4. TRAILERS Insufficient attention is being given to the maintenance of detached trailers or trailers detached from Prime Movers.
Trailers detached must be maintained at the same standard as the Prime Mover, of which it is an integral part.
Drivers are inclined to neglect this aspect, which in some cases reduces the standard and classification of the veh as a whole.

5. INSPECTIONS BY OFFICERS, PL COMDS, AND NCOs.
(A) The attention of the above mentioned is directed to DME bulletin G19 - 22 in respect of inspections.
(B) In brief, the inspections are as follows :-

i. By drivers and section NCOs. Each veh under their comd once per day.
ii. By Pl Officer or Pl Comd as the case may be, once per week each veh under his comd.
iii. A complete inspection by Pl Officer or Pl Comd of each veh under his comd, once per month.
iv. Periodical inspection by T.O. or Transport Capts.
v. Periodical inspection by C.O.

(C) Inspections required are as follows :-
i. Pl Officers or Pl Comds weekly inspection may be physical, snap, or blitz.
ii. The Pl Officer or Pl Comd monthly inspection will be complete.

(D) RECORD OF INSPECTIONS All inspections by Officers will be recorded in the non tech inspection coln of the respective AAB20Bs and Cs, indicating the type of inspection that has been carried out.

It will be recorded immediately after the inspection.

In addition, weekly and monthly inspections will be recorded in the remarks coln of the AAF G5.

776. BARKLY HIGHWAY - DAMAGE TO ROAD SHOULDERS BY CONVOYS.
HQ COMD LL L OF C SUB AREA AASC MEM 114/0 of 21 Nov 44.
1. According to a report by OC 11 Aust Pers Staging Camp to 11 L of C Sub Area, of which a copy has been furnished to HAS, convoys operating on the Barkly Highway are running with one wheel on the shoulder because of the allegedly rough condition of portion of the bitumen pavement.
2. Rutting of the shoulder has resulted, which intenifies the maintenance problem in the dry season and is likely to have serious results by facilitating the entry of water to the road foundations during the wet season.
3. The pavement is not particularly smooth, but there is no justification for any vehicle to be driven on the shoulder with consequent depreciation of the road. As the habit has apparently firmly developed among drivers, some policing will probably be necessary to ensure compliance with the instructions, having regard to the persistence of drivers of loaded convoys on Stuart Highway in driving on the shoulder when passing unladen vehicles.
3. All convoy drivers will be instructed to drive wholly on the pavement.
4. OC C convoys will ensure that instructions are carried out.

802. DENGUE FEVER OUTBREAK: Vide NT Force memo 12595
Three cases of Dengue Fever have recently been reported in the Darwin area, and investigations have shown that mosquitoes were breeding in soap traps, 44 gal drums containing water and discarded tins and containers.
These cases are viewed with grave concern particularly in view of the fact that the DARWIN area has been recognised throughout its "civilian" history as one of the worst epidemic areas of Dengue fever in Austalia, and it is essential that every precaution be taken by all ranks to prevent further outbreaks of the disease.
The following anti-mosquito measures will be instituted (by COs) forthwith and rigidly enforced:-
(i) All 44 gal drums, fire buckets and other containers used for storage of water will be emptied and thoroughly dridd out every 4 days.
(ii) Empty or discarded drums tins and other receptacles likely to hold water will be treated and rendered water-tight immediately.
(iii) All houses and hutments will be inspected regularly, and kitchen sinks and soap traps not in use treated with Malariol.
(iv) Any actual or potential breeding grounds for mosquitoes will be reported without delay to enable treatment by malaria control units.
(v) All water tanks to be screened and oiled.
(vi) Camp areas to be cleaned of all rubbish.
(vii) The provisions of NT Force Order A189/44 para 4(b) regarding the wearing of protective clothing between the hours of dusk and sunrise will be strictly complied with.
Malarea Control Officer and platoon comds will take immediate steps to implement this policy.

803. CENSORSHIP: Vide NT Force RO 17/204/44
1. Attention is directed to para 18 of GRO 371/44
2. Troops under command NT Force may forward through the post, newspapers including "Army News" and "Salt".
3. Newspapers will not be marked nor will any reference be made in accompanying letters which would indicate exact oroapproximate Location of a unit.

804. RELATIONS BETWEEN TROOPS AND NATIVES: Vide NT Force RO 17/209/44
1. The Northern Territory of Australia Aboriginals Ordinance 1918-1933 Section 53 provides as follows:-
"Any male person (except an aboriginal or half-caste) who:-
(a) Habitually lives with aboriginal or half-castes, or with any aboriginal or half-caste who is not his lawful wife; or
(b) cohabits with or has sexual intercourse with any aboriginal or half-caste who is not his lawful wife,
shall be guilty of an offence.
PENALTY: One hundred pounds or imprisonment for 6 months or both."
2. The foregoing provision applies equally to all civilian and service personnel within the Northern Territory.

819. DRESS: Vide NT Forece RO 18/214/44

1. NT Force Order A128/44 and NT Force Adm Instn 106 of 27 Dec 43 are cancelled.
2. Attention is drawn to NT Force Order A189/44, para 4(b), regarding the wearing of shirts with sleeves rolled down and slacks from dusk to sunrise, except when protected by a mosquito net.
3. The non-wearing of shirts during the day-time is to be regarded as a privilege which may be ordered by COs with the object of preserving the health and comfort of the troops under their command.
4. When exercising the discretion allowed them under this order, COs will bear the follwoing factors in mind -

(a) Training
During operations shirts are always worn as part of battle dress in tropical climates, to pretect the skin from chafing and abrasions. Troops should therefore be accustomed to wear them in all conditions of humid weather without discomfort.

(b) Discipline
Incorrect dress is a sign of slackness and lack of unit discipline; the non-wearing of authorised items of dress without proper reason or authority comes within this category. This particularly applies to appearance in public, ie outside unit lines, whether on, or not on duty.

(c) Morale and Self-respect
A good soldierly appearance has a heightening effect upon the morale of the force, and raises it in the estimation of other services. Discarding of items of dress has the opposite effect, and causes loss of self-respect and pride in the unit to which an individual belongs. Consideration is also due to those with whom a soldier works and lives in close contact. This applies particularly to the eating of meals, & when working in offices or elsewhere in close proximity to members of the Women's Services.

5. When walking out troops will be correctly dressed in uniform and will wear web belts.

1. Reports indicate that the use of Roman numerals (1, 11, 111, 1V) in the designation of trade grouping creates a greater likelihood of error than would be the case of ordinary arabic figures (1, 2, 3 4) were used.

869. DARWIN BEACHES - WARNING TO SWIMMERS: Vide NT Force RO 19/-
1. At the present time "Portuguese Man-of-war" are prolific of most DARWIN beaches. This type of jelly fish is difficult to see in the water and consists of a semi-transparent body or float from which hang a number of stinging tentacles. The creature attacks with its tentacles, a sting from which will cause severe pain.
2. Another jelly fish which may be present in waters around DARWIN is the "Sea Wasp". This creature consists of a deep square shaped body approximately two inches across from which hang four stinging tentacles. The "Sea Wasp" is highly dangerous and the sting has frequently proved fatal.
3. Swimmers from the DARWIN beaches are warned to exercise every care to avoid contact with the "Portuguese Man-of-War" and "Sea Wasp" and to refrain from entering the water when they are known to be present in large numbers.

870. PRIVATE TELEGRAMS: Vide NT Force ROs. 20 Dec 44.
It is brought to the notice of all ranks that owing to special conditions existing in the NT the speed of delivery of private telegrams cannot approach that obtained in areas where delivery is effected by PMG telegraph messengers.
All telegrams are received by Army Signals and are then passed over to the nearest APO for collection by addressee's unit. Whilst Army Signals endeavour to advise an addressee of the contents of an obviously urgent telegram, this is not possible in many cases, due to official traffic requirements, and consequently normal delivery procedure mus be followed.

VEHICLE LOG BOOKS - AAB 20B

MT Inspectors reports disclose the fact that when the new log books were introduced little attempt was made to carry forward vital information from the old books.

The following instructions are therefore issued:-

(a) On the top line of the "Record of Mileage" Section will be entered the date and details of last 3 point oil change. (Engine, Gear Box and Rear Axle)

(b) On the top line of the "Record of Repairs" Section will be entered the date and particulars of the last major overhaul. Below that will be entered the date of the last 12000 mile overhaul and also the last 6000 mile overhaul.

(c) On the first page of the "Tyre Record" will be entered the initial positions of the tyres when the book is commenced, and subsequent movements thereafter will be recorded in the usual way.

MT TECHNICAL INSTRUCTION NO 108

Appended below is a copy of MT Force Memo Q 13676

NOTES FOR THE GUIDANCE OF UNIT & TPT OFFICERS WHEN INSPECTING TYRES

1. To carry out an inspection, the officer concerned must have a knowledge of tyre maintenance and procedure. In this connection attention is directed to Mechanisation Pamphlet No 19 1942 (Tyres - Care and Maintenance.)

2. INSPECTION PROCEDURE

(a) Examine :-

(i) Driver for knowledge of tyre pressures, care and DAILY Maintenance.
(ii) All tyres for wear or damage and D D brand.
(iii) Valve caps missing and bent valve stems.
(iv) Dented or distorted rims.
(v) Alignment of front wheels.
(vi) Duals for 'matching' and 'spacing'.
(vii) Correct rotation of Bar Tread Tyres.
(viii) Log Books, for entry of correct tyre pressures and tyre position changes.
(ix) Pressures of all tyres.
(x) Correctness of tyre gauge (with master gauge if available) and efficiency of pump on vehicle.

(b) Indents will be submitted and tyres replaced when tread pattern has almost disappeared or when cuts or abrasions extend to canvas fabric.

(c) Ground vehicles if two or more tyres excessively worn or damaged

(d) Vehicles standing idle for long periods are to be raised on blocks and tyres protected from weather. Where practicable, the removal and storage of tyres is desirable.

(e) New or worn tyres in store to be protected from weather and sunlight.

(f) Return repairable tyres promptly, correctly labelled with C 155 attached.

3. Proper maintenance of tyres can prevent premature failure in the field and help to conserve rubber. Listed hereunder are suggestions which should help unit officers in forming an opinion when carrying out an inspection of tyres in their charge.

DEFECT	CAUSE	REMEDY
Rapid and uneven wear, feather edge.	Misalignment. Excessive play in wheel bearings, tie rods and steering gear. Grabbing clutch, out of true brake drums.	Correction of mechanical irregularities.
CUTS		
Cuts and abrasions on tread and sidewalls	Bruising, road shocks, stakes, sharp rocks, nails, glass etc.	Careful driving. Inspect tyres daily. Remove all foreign material embedded in tyres or lodged between Duals.
Bulge on sidewalls of tyre or indentation in tyre tread. Indicates injury in canvas plies	Fracture of all or part of canvas plies result of striking an abrupt obstruction with enough force to break canvas plies.	Careful driving. Reduced impact or greater cushioning can be accomplished by travelling at lower speeds over rough terrain.

AUSTRALIAN WAR MEMORIAL AWM2021.62.742

DEFECT	CAUSE	REMEDY
Bulges on sidewall This can be detected by a flapping noise from the tyre when the vehicle is in motion. Drivers should be instructed to report this defect immediately.	Tread lifting from canvas Incorrect inflation plus high speeds cause excessive heat which melts junction rubber between tread and breaker strips. Result, junction rubber fails to, sidewalls of tyre, therefor no adhesion between tread and canvas.	Correct inflation Normal speeds
Perished sidewalls of tyres, particularly noticeable in 'spares'.	Exposure to weather.	If vehicles are stationary for long periods, and it is necessary to leave tyres on, jack wheels up and cover tyres. On running vehs carry no spares longer than 90 days without changing.
Abnormal wear on tread shoulders	~~Load~~ Under inflation or over-loading. load is concentrated on shoulders or outside edge of tread edges are subjected to a scrubbing or wiping action on road surface	Correct inflation. ~~Tyres~~ Ensure that vehs are not loaded beyond rated capacity. See that load is distributed evenly.
Rapid wear in centre of tyre only.	Over inflation. Undue wear at centre of tread (aggrevated by bounce & spin of the over inflated tyre).	Correct inflation. Tyres must not be inflated beyond the authorised maximum pressures.
Soft spots of spongy rubber on parts of tyre	Contact with oil and grease	Wash off immediately with solution of 5 parts of soap to 95 parts of water Vehs should not be parked on surfaces soaked with oil or grease.
Scraped or gouged tyres	Obstruction on veh or oversize tyres fitted to veh causing tyres to rub against drag link or springs on front wheels	Inspect veh for bent fenders, projecting bolts nipples, fenders, stays or bent steering stops Make certain correct size tyre is fitted to veh (vide Mech Circular 308)
One tyre of duals worn more than other	Incorrect matching of Dual tyres. The larger tyre carries the load and will wear rapidly	Match tyres correctly. Of vital importance on duals measure overall circumference with piece of string or tape. Do not match if more than 1" difference in circumfere
Rapid wear. Parts of tyre tread worn to canvas	Excessive use of brakes Rapid acceleration	Normal braking Normal acceleration and gradual stops and starts result in longer tyre life.

AUSTRALIAN WAR MEMORIAL AWM2021.62.742

4. The presence of small stumps and rocks in the approaches to, or vacinity of unit parking areas is often the cause of damage to tyre ~~sidewalls~~ sidewalls and tread . Unit officers when inspecting such areas, will initiate action for clearing such obstructions liable to cause tyre damage.

5. To obtain maximum life from tyres the following points must also be strictly observed.
   (a) Speeds must not exceed those prescribed
   (b) Overloading must be avoided
   (c) Tyre pressures must be maintained at the figure given in Mechanisation Circular 324.

6. Due to the shortage of natural rubber, tyres of synthetic rubber are being issued. These are distinguished by code letters or numerals superimposed on a coloured medallion on the tyre walls.
   Synthetic rubber tyres take longer in the production process, require additional machinery and manpower and have a shorter life
   Heat caused by carcase flexing due to under-inflation or overloading or from continued high speed is detrimental to any tyre. Synthetic rubber tyres generate more heat due to flexing, and are therefore more susceptible to premature failure than standard rubber tyres.
