1. Officer in charge of photography is : LIEUT. F.W. BENNETT

2. All ranks who have cameras may in future use them subject to orders issued from time to time.

3. Officers and ORs will be responsible for ensuring that cameras in their possession are registered with the Officer in charge of photography.

4. Films of photographs taken by Officers and ORs for non-official purposes will be forwarded to an approved photographer for processing. The names of approved photographers will be published from time to time in Routine Orders.

15. POINTS TO REMEMBER

1. That, dangerous as are enemy agents, traitors, defeatists, Communists etc., the greatest menace of all is generally the well meaning, but unthinking soldier, of whatever rank, who by unguarded speech or writing gives away information of military value.

2. That security mindedness is in no sense a thing different from or independent of discipline in general. Security mindedness is indeed only one of many military virtues embraced by the word "discipline".

3. That by "Military Security" we understand measures designed to provide the maximum security for our own forces and insecurity for those of the enemy.

DUTIES OF PRIVATE SOLDIER OF THE GUARD

1. During his tour of guard duty, a soldier is subject to the orders of the Non-Commissioned Officer of the guard only.

2. Sentries will not present arms to any Officer or armed party (except grand rounds) after retreat; but as long as they can discern an Officer, they will halt and turn to their front on his approach, and salute with the rifle at the slope as directed.

3. After a private has been assigned to a relief and a post, he must remember the number of his relief and the number of his post, and under no circumstances is he to change from one relief or post to another relief or post unless under instructions from the Commander of the guard.

4. A sentry should never quit his post without an explicit order from a Non-Commissioned Officer of the guard, and under no circumstances should he ever yield it to any one else.

5. Sentries moving about on their posts will always turn outwards when turning about.

6. Soldiers will not take off any article of clothing or accoutrements while on guard, but the wearing of the great-coat in the guard room will be optional.

7. Sentries in their sentry boxes will salute by coming smartly to attention.

8. Sentries must not quit their arms, lounge or converse with any one on any pretext, nor may they stand in their sentry boxes, if any, in good or even moderate weather.

9. Privates of the guard are not allowed to use the countersign, except in the performance of their duties while posted as sentries.

10. Whenever relieved a sentry should repeat in detail to his relief all special orders relating to his post.

11. A sentry must not, under any circumstances, make known the countersign to any one but the sentry who relieves him, or to a person from whom he properly receives orders, such as the Commanding Officer, the Officer of the day or an ~~officer~~ Non-Commissioned Officer of the guard, on such person's order given personally.

12. Sentries should distinctly understand that they are placed on their post for a definite purpose, and that the rule that they must not leave their post does not mean that they must remain on the fixed beat or inactive if any person disobeys their orders. They should at once arrest the man, and call the Commander of the guard to their assistance. They should, however, remain in the vicinity of their post.

13. A sentry should never stand to speak to any one while on his post, but if spoken to should answer civilly and walk on. If a person is doing anything contrary to the orders of his post he should tell him to desist in a quiet and respectful tone, and if it has no effect, he should then call for the Commander of the guard.

14. Sentries should carry out their orders with firmness and determination and should not permit any trifling or nonsense; they have commands to be obeyed, and should make them so.

DUTIES OF THE COMMANDER OF THE GUARD

by

MAJOR FLEMING O.C. 900

1. The Non-Commissioned Officer of the guard is Commander of the guard.

2. The Commander of the guard is responsible for the instruction and discipline of the guard. He will see that all its members are correctly instructed in their orders and duties and that they understand and properly perform them.

3. He receives and obeys the orders of the Commanding Officer and the Officer of the day, and transmits to his successor all material instructions and information relating to his duties.

4. He is responsible under the Officer of the day for the general safety of the camp as soon as the old guard marches away from the guard tent. In case of any emergency occurring while both guards are at the guard tent, the senior commander of the two guards will be responsible that proper action is taken.

5. A Commander will never quit his guard except to visit his sentries, and will then inform the next in command of the probable time he will be absent, and will not allow any Non-Commissioned Officer or soldier to quit the guard without leave, which will be granted only for very special purposes.

6. The standing orders of the guard will be read and explained to the men as soon as the guard has mounted and again when the first relief comes in. Every relief will be inspected before going out and on its return.

7. When any alarm is raised in a camp, the guard will turn out immediately. If the case be serious, the Commander of the guard will cause the Field Officer to be at once notified.

8. The Commander of the guard will inspect the guard and see that they are properly dressed and in possession of their arms and equipments when turned out for any purpose whatever.

9. The Commander of the guard will inspect his guard at reveille, retreat and tattoo to assure himself that the men are in proper condition to perform their duties, and that their arms and equipments are in proper order.

10. He will see that the sentries are relieved every two hours unless the weather, or other cause, makes it desirable that it be done at shorter intervals.

11. The Commander will visit his sentries at least twice a day and twice by night, to ascertain that they are alert, on their posts and acquainted with their orders.

12. In their guard reports, Commanders are to mention the hours at which they went their rounds personally, as well as the hours at which their guards were visited by Officers on duty and by rounds. They are also to send an immediate report to the Orderly Officer, of any unusual occurrence on or near their guards. The authorised forms for guard reports are specially applicable to guards where soldiers under detention are confined.

13. The Commander of the old guard should require the Commander of the new guard to countersign the relieving guard report before the old guard marches off; the Commander of the new guard then becomes responsible for the correctness of the report, so far as it relates to the guard tents, number of prisoners, articles of furniture, including sentry boxes etc., in charge of the guard.

AUSTRALIAN WAR MEMORIAL AWM2021.62.909

DUTIES OF THE COMMANDER OF THE GUARD

14. Should a man be taken ill while on guard a report should at once be sent to the Orderly Officer, who should at once see that one of the waiting men is sent to relieve him.

15. The Commander of the guard receives such soldiers in arrest as are made over to him by an Officer or Non-Commissioned Officer, and should on no account release a man committed to his charge without proper authority. A written report should in all cases be required with each, but the Commander of a guard should not refuse to receive a man accused on the ground that a written report is not given him with the man. It is sufficient for him to know that the accused is amenable to military law, and that the person confining him is responsible.

16. All stores and furniture in charge of a guard are to be handed over from one Commander to another. The Commander of the relieving guard will be responsible for their correctness.

Whenever engines (which have previously been painted) are being fully dismantled in workshops, action will be taken to clean off the old paint.

(A) To civilians in

Aden	Eire
Anglo Egyptian Sudan	India
Bayrein	Iraq
British Somaliland	Kenya
Canada	Uganda
Ceylon	Mauritius
Cyprus	Northern Rhodesia

Iran (Persia)	

and the charged payable are as follows :

1. For Airgraph letters to the members of the forces of the British Empire 5d.
2. For Airgraph letters to civilians 10d.

Forms upon which Airgraph letters may be written by senders are available from Army Postal Orderlies service with units, from whom further details of the service can be secured by personnel.
Normal unit censorship arrangements will apply to Airgraph letters lodged by personnel. The franking officers signature will appear in the lower left hand corner of the form (above the direction "This space not to be used". The Unit censorship stamp will be affixed in the space between the address panel and the single printed line directly there under; it it will be placed as far to the left as practicable. Censorable matter will be obliterated and not excised. Detailed instructions covering preparation of the letters by senders are set out on the backs of the forms, which will however, in every case following censorship be passed throug unit channels by postal orderlies for onward transmission. If one form be insufficient for the whole of a letter, two or more separate forms may be used, but in such case each form will be treated as a separate letter and a separate fee must be paid for each. The full address of the sender and the date of writing will be written at the top of the letter portion of the form and at the foot of the letter the senders full name will be written in block lettering followed by his signature.
The Airgraph letter as delivered to the addressee overseas will be less than one quarter the size of the original lodged by the sender. The need need for block lettering as above described and clear writing generally will therefore be readily understood.

---

8. RETURN OF CYLINDERS AND CONTAINERS.

A grave shortage of compressed gas cylinders still exists and is considered to be due, in a large measure to the non observance of the instruction in para 1 of G.R.O. 0.520/42.

The need for the immediate return of empty cylinders is again stressed and any laxity in this regard in future will be viewed seriously.

The prompt return of empty containers for the distribution of acid and distilled water is of equal importance, as these also are in extremely short supply and service needs can only be met by keeping the containers available in constant circulation.

CLEANING OF WEB EQUIPMENT AND GAITERS.
The practice of bleaching articles of web equipment and web gaiters, either by excessive washing with soap and soda or other means, is to cease immediately.
Items treated in this manner are not only unduly conspicuous in action, but the treatment greatly deteriorates the material and reduces the life of the article.
When it is necessary to clean any item by washing, luke warm soapy water and light scrubbing only should be used. However, such washing should be restricted to occasions when it is absolutely essential.

SILENT PICTURES will be shown tonight 19 July 43,in the YMCA Hut at 1945 hours.

ADMINISTRATIVE INSTRUCTION NO. 3 — 20 AUG 43

G.R.Os 585 & 589 are repeated below for your information :

CLASSIFICATION OF MECHANICAL VEHICLES (MECHANICAL CONDITION)

1. Classification of vehicles as to mechanical condition is necessary for two reasons :-
   1. Operational requirements : To enable a Commander to have a reliable knowledge of what his vehicles are fit for in operation.
   2. Workshop commitments : to enable preparation of forecasts of workshop commitments for repair of vehicles.

2. Responsibility for the classification of vehicles will, in the main, be that of LAD Commanders and OCs, AASC workshops.

3. It is desirable that a standard system of classification should be adopted throughout the Army. For this purpose, the following basis is laid down.

4. There will be four classes, based on the mileage or period for which vehicles should give adequate service, viz :

Class 1. Vehicles fit for a minimum mileage or period of -

Tanks, Medium, M3	50 hours
Aust.Cruiser Mk 1	500 miles
Tanks, Light M3	50 hours
	500 miles
Tanks, Infantry Matilda	100 hours
	500 miles
Carriers (All types)	500 miles
Armoured vehicles (other than tanks and carriers)	1000 miles
All other vehicles	2000 miles.

Class 2. Vehicles requiring repairs not beyond the scope of 1st echelon

Class 3 Vehicles requiring repairs not beyond the scope of 2nd echelon

Class 4. Vehicles requiring 3rd or 4th echelon repairs.

5. The classification of vehicles will be entered in Log Books (AAB.20) and revised, if necessary, at each inspection. Units will maintain an up to date record of the classification of vehicles on their strength.

MECHANICAL VEHICLES INSPECTION PRIOR TO TRANSFER

1. An AAF C.4 will be prepared for all mechanical vehicles prior to transfer from a Unit to another Unit or to an ordnance field park of depot.

2. The necessary inspection will be make by AEME workshop personnel or, in the case of vehicles on strength of AASC Units, by AASC workshop personnel.

3. One copy of the AAF C.4 will be placed in the Log Book (AAB 20) of the vehicles concerned and will accompany the vehicle to the receiving Unit Field Park or Depot.

9.

SOME"DON'TS" FOR " MT DRIVERS AND OTHERS"

DEAD RUNNING. Don't use a 3 ton truck to do the work of a motor-cycle.

JOY RIDING. The Army is not a philanthropic institution which provides free tpt for joy riding. Don't use MT uselessly when trams or trains will fill the bill. Even in these days of mechanization walking will be found quite a beneficial excercise.

SPEEDING. It is a recognized fact that excessive speed means excessive consumption of petrol. Don't speed. ~~Forty miles an hour is fast enough to get there, and, what is more, you have a better chance of getting there~~.

TYRE PRESSURE. A tyre gauge is quite a useful little gadget which should be used regularly. Don't kick the tyre with your boot and say " That's O.K." use the gauge and see how often you are wrong. Flat or insufficiently blown up tyres means road friction, road friction means loss of power, loss of power means more petrol.

REGULAR MAINTENANCE. The working parts of a car, van or truck need lubrication. Lubrication means less friction, less friction means more power, more power means less petrol. Don't forget that the grease gun is an essential part of the vehicle equipment, but see that it is used regularly and not just kept in the tool box.

IDLING. It is amazing how much petrol is burnt up by unnecessary idling or keeping the engine running. Don't keep your engine running during halts. If your maintenance is good your vehicle should be easy to start.

AUSTRALIAN WAR MEMORIAL AWM2021.62.909

MOTOR MASTER SHIP

The horse is gradually being replaced by mechanical vehicle but there is no difference between horse mastership and motor mastership. Don't forget that the better you look after your motor vehicle the better service you will get from it. Morning inspections and check ups should replace morning "stables".

REGULAR CHECK-UP.

Remember, a few minutes, whenever the opportunity offers to check up on your vehicle may save hours spent in the workshop.
