2. Motor Cycle - Fire Hazard

1. A warning notice is given to Units recently issued with W.D. type B.S.A 500 c.c. side-valve model motor cycle.

2. Difficulty in starting these machines is due to incorrect setting of the controls; consequently, if the carburettor is flooded to excess, the engine is liable to back-fire and ignite the petrol.

3. Similar trouble of back-firing and petrol igniting has been experienced with these machines when in course of travel, due to slightly lean mixture.

4. Pending the result of further tests now being conducted to dispel the risk of fire, which will be promulgated at a later date, the following instructions are issued as a guide:-

(a) Riders of B.S.A Motor Cycles of the abovementioned type will adhere strictly to the advice in the manufacturers instruction book, particularly in regard to starting up.

(b) When preparing to start, set the throttle at $\frac{1}{8}$ inch (one eighth inch) open. Do not unnecessarily flood the carburettor.

(c) When machine is travelling, close the air control lever sufficiently to allow smooth running without developing too rich a mixture.

5. The correct procedure to extinguish a fire on a motor cycle is:-

(a) Turn off petrol.
(b) Raise and hold valve-lifter open.
(c) Keep on turning over the engine with kick-starter, or alternatively, wheel the machine along in gear.
