You have done well. You have turned a retreat into a firm stand and stopped the enemy on the threshold of EGYPT. You have done more. You have wrenched the initiative from him by sheer guts and hard fighting and put him on the defensive in these last weeks.

ROUTINE ORDERS

BY

Major J.H. McLENNAN, O/C 12 Coy., A.A.S.C.

In the Field 29 July 1942

591. LUBRICANTS FOR MT VEHICLES - ISSUE OF.

1. Great delay is being caused at RASC, Petrol Issuing Depots and RASC Pumps by the practice of drivers demanding lubricating oil for their engines, and thereby holding up vehicles waiting to draw petrol.

2. Issues of Lubricating Oil to individual vehicles will only be mad from RASC Depots or Pumps in very exceptional circumatances.

3. All units are responsible for maintaining an oil store from which issues to individual vehicles will be made under Regimental arrangements. Units will draw lubricants in bulk for the whole unit from the appropriate D.I.D. or F.S.D.

4. Platoons will be responsible that vehicles carry lubricants in the spare cans forming part of the vehicle equipment.

5. Detail issues to individual vehicles will only be made when journeys are of such length that Lubricating Oil carried in the spare cans has been used.

592. MT VEHICLES ROAD SPRINGS - MAINTENANCE OF.

1. Breakages of road springs continue to occur due to the failure to keep the clamp bolts (U bolts) tight. This operation is referred to in Maintenance Task No.12 (as detailed in A.B.412) and its importance is again emphasised.

2. It is desirable that the vehicle should be loaded whilst the clamp nuts are tightened and it is most important that only the STANDARD spanner should be used.

3. No advantage is gained by using spanners of abnormal leverage as this will result only in stripping the threads or stretching the bol and will defeat its own object.

593. RAF AERODROMES AND LANDING GROUNDS.

(a) It has been brought to notice by the RAF that Army MT vehicles have been driving across aerodromes and landing grounds which are in use. This endangers the lives of personnel and damages the surface of the landing grounds.

(b) All MT personnel are warned that under no circumstances will vehicles be driven across RAF Aerodromes or Landing Grounds which are in use. Severe disciplinary action will be taken in cases of infringement of this Order.

594. OXYGEN CYLINDERS - CONTAMINATION BY OIL.

(a) It is important that Oxygen Cylinders should be maintained in a clean condition and kept free from grease and oil.

Any contamination with greasy or oily substances is highly dangerous. Oxidisation of greasy matter producew volatile hydrocarbons which are extremely inflammable and when mixed in certain proportions with oxygen can cause explosions, even in the absence of any flame.

(b) Great care must be taken by all Installations and individuals handling cylinders, whether empty or charged, that no such contamination results either from contact with plant or from careless handling of loose cylinders.

595. EQUIPMENT FOR HOSPITAL PATIENTS.

1. Patients are arriving at hospitals without respirators, A/G, and steel helmets.

2. Sick and wounded will at all times be in possession of their respirators and steel helmets. Platoons Commanders will ensure that this order is complied with in all cases.

(c) A private soldier, convicted of conduct to the prejudice of good order and military discipline in that he was in possession of a document purporting to be a genuine leave pass, well knowing it was not genuine and forging a leave pass, was sentenced to undergo detention for 90 days.

(d) A private soldier, convicted of stealing two wristlet watches was sentenced to be imprisoned with hard labour for 90 days.

597. CANTEENS PROFIT DISTRIBUTION.

1. Canteen profits amounting to £A10,391/2/5 have been distributed for the month of March, 1942.

2. Total amount distributed to 31st March 1942 is £A223,734/13/3.

1. Postcard size photographs are now available of the graves of AIF deceased personnel buried prior to 1st July, 1942 in Military Cemetaries throughout Syria, Palestine, Eygpt and in the Western Desert at Tobruk, Bardia, Sollum and Mersa Matruh.

PARCELS FOR BRITISH PRISONERS OF WAR IN ENEMY HANDS.

1. H.M.Government has, for some time, viewed with growing concern, the increasing number of food parcels, that are being sent to individual British Prisoners of War from the Middle East.
2. This is in direct opposition to the deliberate policy of H.M.Government. That policy seeks to avoid any differentiation between British Prisoners of War in the matter of food as well as to conserve transport facilities and food supplies by canalising all food supplies for Prisoners of War through the Brisish Red Cross Organisation in London.
3. The Service of the British Red Cross Organisation aims at providing each prisoner with one standard food parcel each week and apart from temporary interruptions, has on the whole succeeded in its aims.
4. The parcels, which are not addressed to individual prisoners, are sent through the International Red Cross Committee, Geneva, to the Camp Leader at the various Camps in Germany and Italy in sufficient numbers for the strength at each particular camp.
5. The ration supplied by the Detaining Power together with the contents of the food parcels are maintaining our Prisoners of War in good health, and give them a reasonable variety in food.
6. H.M.Government has, therefore, approached the British Red Cross to support this policy and discontinue the despatch of parcels from the Middle East to individual British Prisoners of War. Under present arrangements, individuals and units have been subscribing sums of money or bringing in parcels to be despatched to prisoners in whom they are interested. This will be discontinued, and in future, no fresh contributions either in cash or kind will be received by the British Red Cross War Organisation. The balance of existing contributions will, however, be utilized for parcels to be sent for the next three months only, after which they will cease.
7. The only exceptions to this rule will be where next-of kin are actually resident in the Middle East. They will be allowed to send a quarterly parcel as in the case of next-of-kin in England, but this parcel will

670. HYGIENE.

(a) An endeavour is being made to obtain an even distribution of latrines within the Div. area. This policy is being hindered by units which take latrines from old to new unit locations when reliefs are affected. If, on arrival, in the new area, a unit finds that latrine accommodation is inadequate, 2/4 Fd Hyg Sec will put the matter right as quickly as possible. In this regard, units must remember that a Fd Hyg Sec has neither the personnel nor the equipment to carry out all the work required, unless units actively cooperate.

(b) In future when units move the following action will be taken in respect of latrine seats and boxes :

(i) If the move involves units taking over, one from another, latrines will be left in situation.

(ii) If a unit moves from the Div Area for any reason without relief, latrines will be taken to RE Depot at EL ALAMEIN Sta, before departure.

671. SALVAGE.

The recent turnover of salvage indicates that some units are more actively interested than others. The following instns are issued for the guidance of all ranks and should be promulgated in conjunction with previous instns.

(a) Salvage is a matter of routine which calls for the co-operation of every man. The main duties of all tps in this connection may be summarised as follows :

i. To practice economy.
ii. To preserve eqpt by care and maintenance.
iii. To prevent the enemy obtaining or recovering material for his own use against us.
iv. To salvage and ensure the material is returned with as little damage and in the most economical manner possible.
v. If unable to do anything about sending back salvage, to send back all possible information about such material stating nature and whereabouts.

(b) The importance of practicing economy and preserving eqpt is obvious. The task of salvaging and returning material to dumps is the responsibility of all tps and not only that of specially raised salvage units. However under certain circumstances units may require the assistance of salvage or rec units, when it is still their duty to furnish information beforehand. Early recce and provision of accurate information will result in successful salvage.

Where a unit or formation cannot salvage with its own resources, it must ask for assistance from Div when special salvage eqpt or personnel will be provided.

(c) When the time factor precludes the return of all items in an area, those responsible for salvage in the unit must direct the priority in which items will be salvaged for return to dumps.

It is of the highest importance that all ranks should be salvage minded and that within each unit there should be a competitive salvage spirit provided such is consistent with the operational tasks at hand.

672. POSTAL - CHRISTMAS MAILS.

Further to 12 Coy,AASC. R/O.No.642 para (b) dated 31 Aug,42 it is advised that ordinary air-mail letters and packets addressed to the undermentioned places, intended for delivery by Christmas Day, must be posted at Army Post Offices in the Middle East not later than the dates shown.

1. Research is constantly being carried out in order to improve our present weapons and to produce new weapons. It is essential to develop new ideas if we are to outstrip the enemy.
2. Fighting soldiers may think of other or new types of weapons and equipment or possibly of completely new ideas of waging war; any of which may materially assist us in battle.
3. New ideas connected with motor transport, suitable clothing, equipment and tools, the right type of food and method of cooking it and many other essential parts of our war material may all contribute to the defeat of the enemy.
3. Suggestions made by officers and O.Rs have already been accepted and are now in general use. No officer or soldier should hesitate to put forward any genuine ideas, however novel or small, which may appear to him to be likely to improve or accelerate the defeat of the enemy.
4. It has therefore been decided that normal channels will be disregarded and that direct access to G.H.Q., will be accorded to any suggestions or inventions which may be put forward by an officer or O.R. Suggestions or inventions will be forwarded direct to G.H.Q. addressed as follows :-

INVENTIONS, G.H.Q. (G.S.D.6) M.E.F.

The regimental number, rank, name and unit of the sender will be written in block capitals at the beginning of all letters put forward.
5. The receipt of all such letters will be acknowledged at once. No effort will be spared to ensure that every really constructive suggestion is fully investigated by technical experts and if necessary the inventor will be enabled to explain details in person.
6. When security permits, descriptions of these ideas or inventions adopted and the names of the persons responsible will be published in General Orders and entries made in their documents. All questions connected with patents and rewards will be dealt with according to the provisions of K.R. and such instructions as may be laid down from time to time.
7. The contents of this Order will be brought to the notice of all ranks

706. DRO 223-SALUTING.

Saluting dates from the time of armour, the salute representing the motion of a knight raising the visor of his helmet with the open hand to the front showing that, though raised, it contained no missile.

The practice of combining "eyes right" or "eyes left" with the salute originated from the olden days, when it was the privilege of men-at-arms to look their superiors in the face, while others must pass with downcast eyes.

The salute is, therefore, a recognition of comradeship and mutual trust between men-at-arms; it is, at the same time, an acknowledgement of discipline and has become a visible indication of common allegiance which all ranks owe to the Crown and its service.

The standard of saluting is, therefore, an indication of the esprit-de-corps of units and formations. History, including the present war, has proved that high esprit-de-corps and good discipline increase the fighting efficiency of units and formations.

The recognition of comradeship and mutual trust inherant in the salute must be mutual and not one-sided, e.g., both parties must look each other in the eyes, and officers receiving the salute must return it in a smart, soldierly and orthodox manner. The slovenly return of a salute cannot but breed slovenliness. The officer will, therefore, return the salute in a proper manner and will invariably look the giver of it in the eyes.

Officers and soldiers, when on leave or detachment, will show by the standard of their saluting, their determination to maintain with pride the reputation of their unit, Corps, and Formation.
