GRO 222/45 ENGINES; SPARK IGNITION - FIRE HAZARD.

1. Attention of all ranks is drawn to the danger of priming petrol engines by pouring liquid petrol into induction manifolds. In addition to this practice being harmful to cylinder bores, piston riggs, and valve guides, etc, grave fire risk is involved which has in the past been responsible for loss of life, loss of valuable equipment and painful injuries to personnel.

2. The introduction of petrol into the inlet manifold of a petrol engine by removing the air cleaner and pouring the petrol through the carburettor air intake will only be resorted to as an emergency.

3. Not more than approximately one tablespoon of petrol will be introduced by this method.

4. Under no circumstances will any attempt be made to start the the engine until the air-cleaner has been replaces.

GRO 227/45 CONSERVATION OF RUBBER - CRUDE AND SYNTHETIC TYRES.

1. Tyres in use in the field are now both of crude and synthetic construction and, as tyres of synthetic construction are far more susceptible to failure through abuse than tyres constructed from natural rubber, their introduction into the service has made it more imperative than ever that all instructions for care and maintenance of pneumatic tyres be strictly observed.

2. All concered will, therefore :-
(i) Exercise the utmost care to avoid all forms of tyre abuse, the principal of which are :-
Overloading
Under inflation
Incorrect fitting of tyres
Harsh Braking
Fierce Acceleration
Speeds exceeding those laid down in GRO 2340/44
Driving over obstructions and other causes of severe impact;

AUSTRALIAN WAR MEMORIAL AWM2022.5.2181

GRO 227/45 Continued.

(ii) Check wheel alignment frequently and correct irregularities promptly;
(iii) Ensure that tyres are "changed around" periodically in accordance with current instructions;

(iv) Remove stones and flint from tyres during unit maintenance

(v) Submit tyres for replacement at the correct stage for recapping, and

(vi) Submit damaged tyres for repair without delay.

4. Formations and units will ensure that prompt disciplinary action is taken where breaches of this order occur.

5. Clauses (v) and (vi) of para 3 above may be waived on the special authority of formation commanders in the assault and early developmental stages in new operational areas, during the period in which replacement or repair is not practicable nor expedient or in which replacement tyres and repair facilities are not immediately available. In such cases, worn or damaged tyres may, if considered necessary, be run to destruction.

No. [illegible]6.

AUSTRALIAN ARMY CANTEENS SERVICE.

The Australian Army Canteens Service distributed out of profits accumulated from the inception of the service to 31 Dec'44 the following amounts:-

CFO for Unit Trust Funds..	..£1,604,419
COCs' Amenities Funds and AMF Special Amenities Funds... ..	.. 1,070,382
Xmas fare and other Amenities	.. 45,134
Contributions to OR's Clubs	.. 262,251
	£2,982,186

The amount of profits accumulated at 31 Dec'44, but as yet undistributed, totals £2,409,843, and is used as capital to finance the business of the service. The Canteens Service Regulations provide that, at the winding up of the service, the fund of accumulated profits is to be vested in trustees to be appointed by the Minister for the benefit of members and members of the Military forces and their dependants or the dependants of deceased members, the intention being to provide for those cases of hardship which do not fall within the necessarily exact definitions of the Repatriation laws.

56. GRO 227/45.

CONSERVATION OF RUBBER - CRUDE AND SYNTHETIC TYRES.

(i) Tyres in use in the field are now both of crude and synthetic construction and, as tyres of synthetic construction are far more susceptible to failure through abuse than tyres constructed from natural rubber, their introduction into the service has made it more imperative than ever that all instructions for care and maintenance of pneumatic tyres be strictly observed.

(ii) All concerned will, therefore -

(a) exercise the utmost care to aboid all forms of tyre abuse, the principal of which are -
- overloading
- under inflation
- incorrect fitting of tyres
- harsh braking
- fierce acceleration
- speeds exceeding those laid down in GRO Q340/44.
- driving over obstructions and other causes of severe impact;

(b) check wheel alignment frequently and correct irregularitie promptly;

(c) ensure that tyres are "changed around" periodically in accordance with current instructions;

(d) remove stones and flint from tyres during unit maintenance;

(e) submit tyres for replacement at the correct stage for recapping; and

(f) submit damaged tyres for repair without delay.
