Over the period of this month there was a considerable loss in vehicle hours above normal maintenance and mechanical failures. This was considered to be caused by the large number of major engine repairs caused by the high (86) octane rating of the gasoline in use. As lower octane rating fuels are not available, it is considered that this condition will continue. Apart from the usual heavy commitments for buses on R&R and Tokyo runs, a number of buses were provided for the visiting New Zealand Rugby Union Team during their stay in the Tokyo Area.</p>
