HUCHENNEVILLE
(Somme)

DECEMBER 1918.

The Unit made only one move during the month from ALLERY to HUCHENNEVILLE (Sheet ABBEVILLE) (11/12/18)

As would be expected the work of the Unit was reduced to a Minimum, and the number of evacuations were very small. The great majority of the animals throughout the Division were stabled and not in heavy work, and consequently there was an absence of those cases which make up so large a percentage of the evacuations during the Winter months, viz Debility, Ulcerative Cellulitis, and Mange.

General condition of animals passing through the M.V.S. might be considered ^{as} slightly better than those of the two previous months.

CLASSIFICATION OF ANIMALS EVACUATED ACCORDING TO CLASS :-
