AWM4-1/42/6PART8

20 M July let AUSTRALIAN DIVISION. Summary - 6 a.m. 19th July to 6 a.m. 20th July

SOUTHERN. Quiet day. Continuous bursts of fire during Ho. I. Section the night. Destroyer shelled THIN TRENCHES yesterday afternoon and night and since then machine gun has not fired from there. Enemy was active opposite 7th Light Horse with bombs, but was driven off by us.

> MORTHERN. The day was quiet. Enemy expended a great deal of ammunition during the night, mostly directed against HCLLY RIDGE.

SOUTHERN. Very little to report during the day. There No.II. Section .. were signs of activity at JOHNSTONE'S JOLLY, fixed bayonets having been seen in the trenches and a great deal of dust from behind the works. At 2130 a party of Turks attempted to repair the barbed wire entanguements in front of their trenches on LONE FINE but were stopped by our machine guns. We continued work on our new firing line but found some difficulty in placing wire entanglements in front of the new trenches.

A detached post in BARBED WIRE GULLY reports sounds

of enemy digging a short distance away.

HORTHERN. The day was comparatively quiet. The 8th Battalion relieved the 6th and 7th in the left portion of the section.

Between 1900 and 2000 the enemy guns from BABY 700 and east of MOHTAR RIDGE fired 35 rounds. One 6-inch shell also fell in the right sub-section, blocking a communication trench. There was a certain amount of firing during the night but nothing of importance occurred.

We laid mines at the ends of saps D.25 and D.9A.

which are now under GERMAN OFFICERS TRENCH.

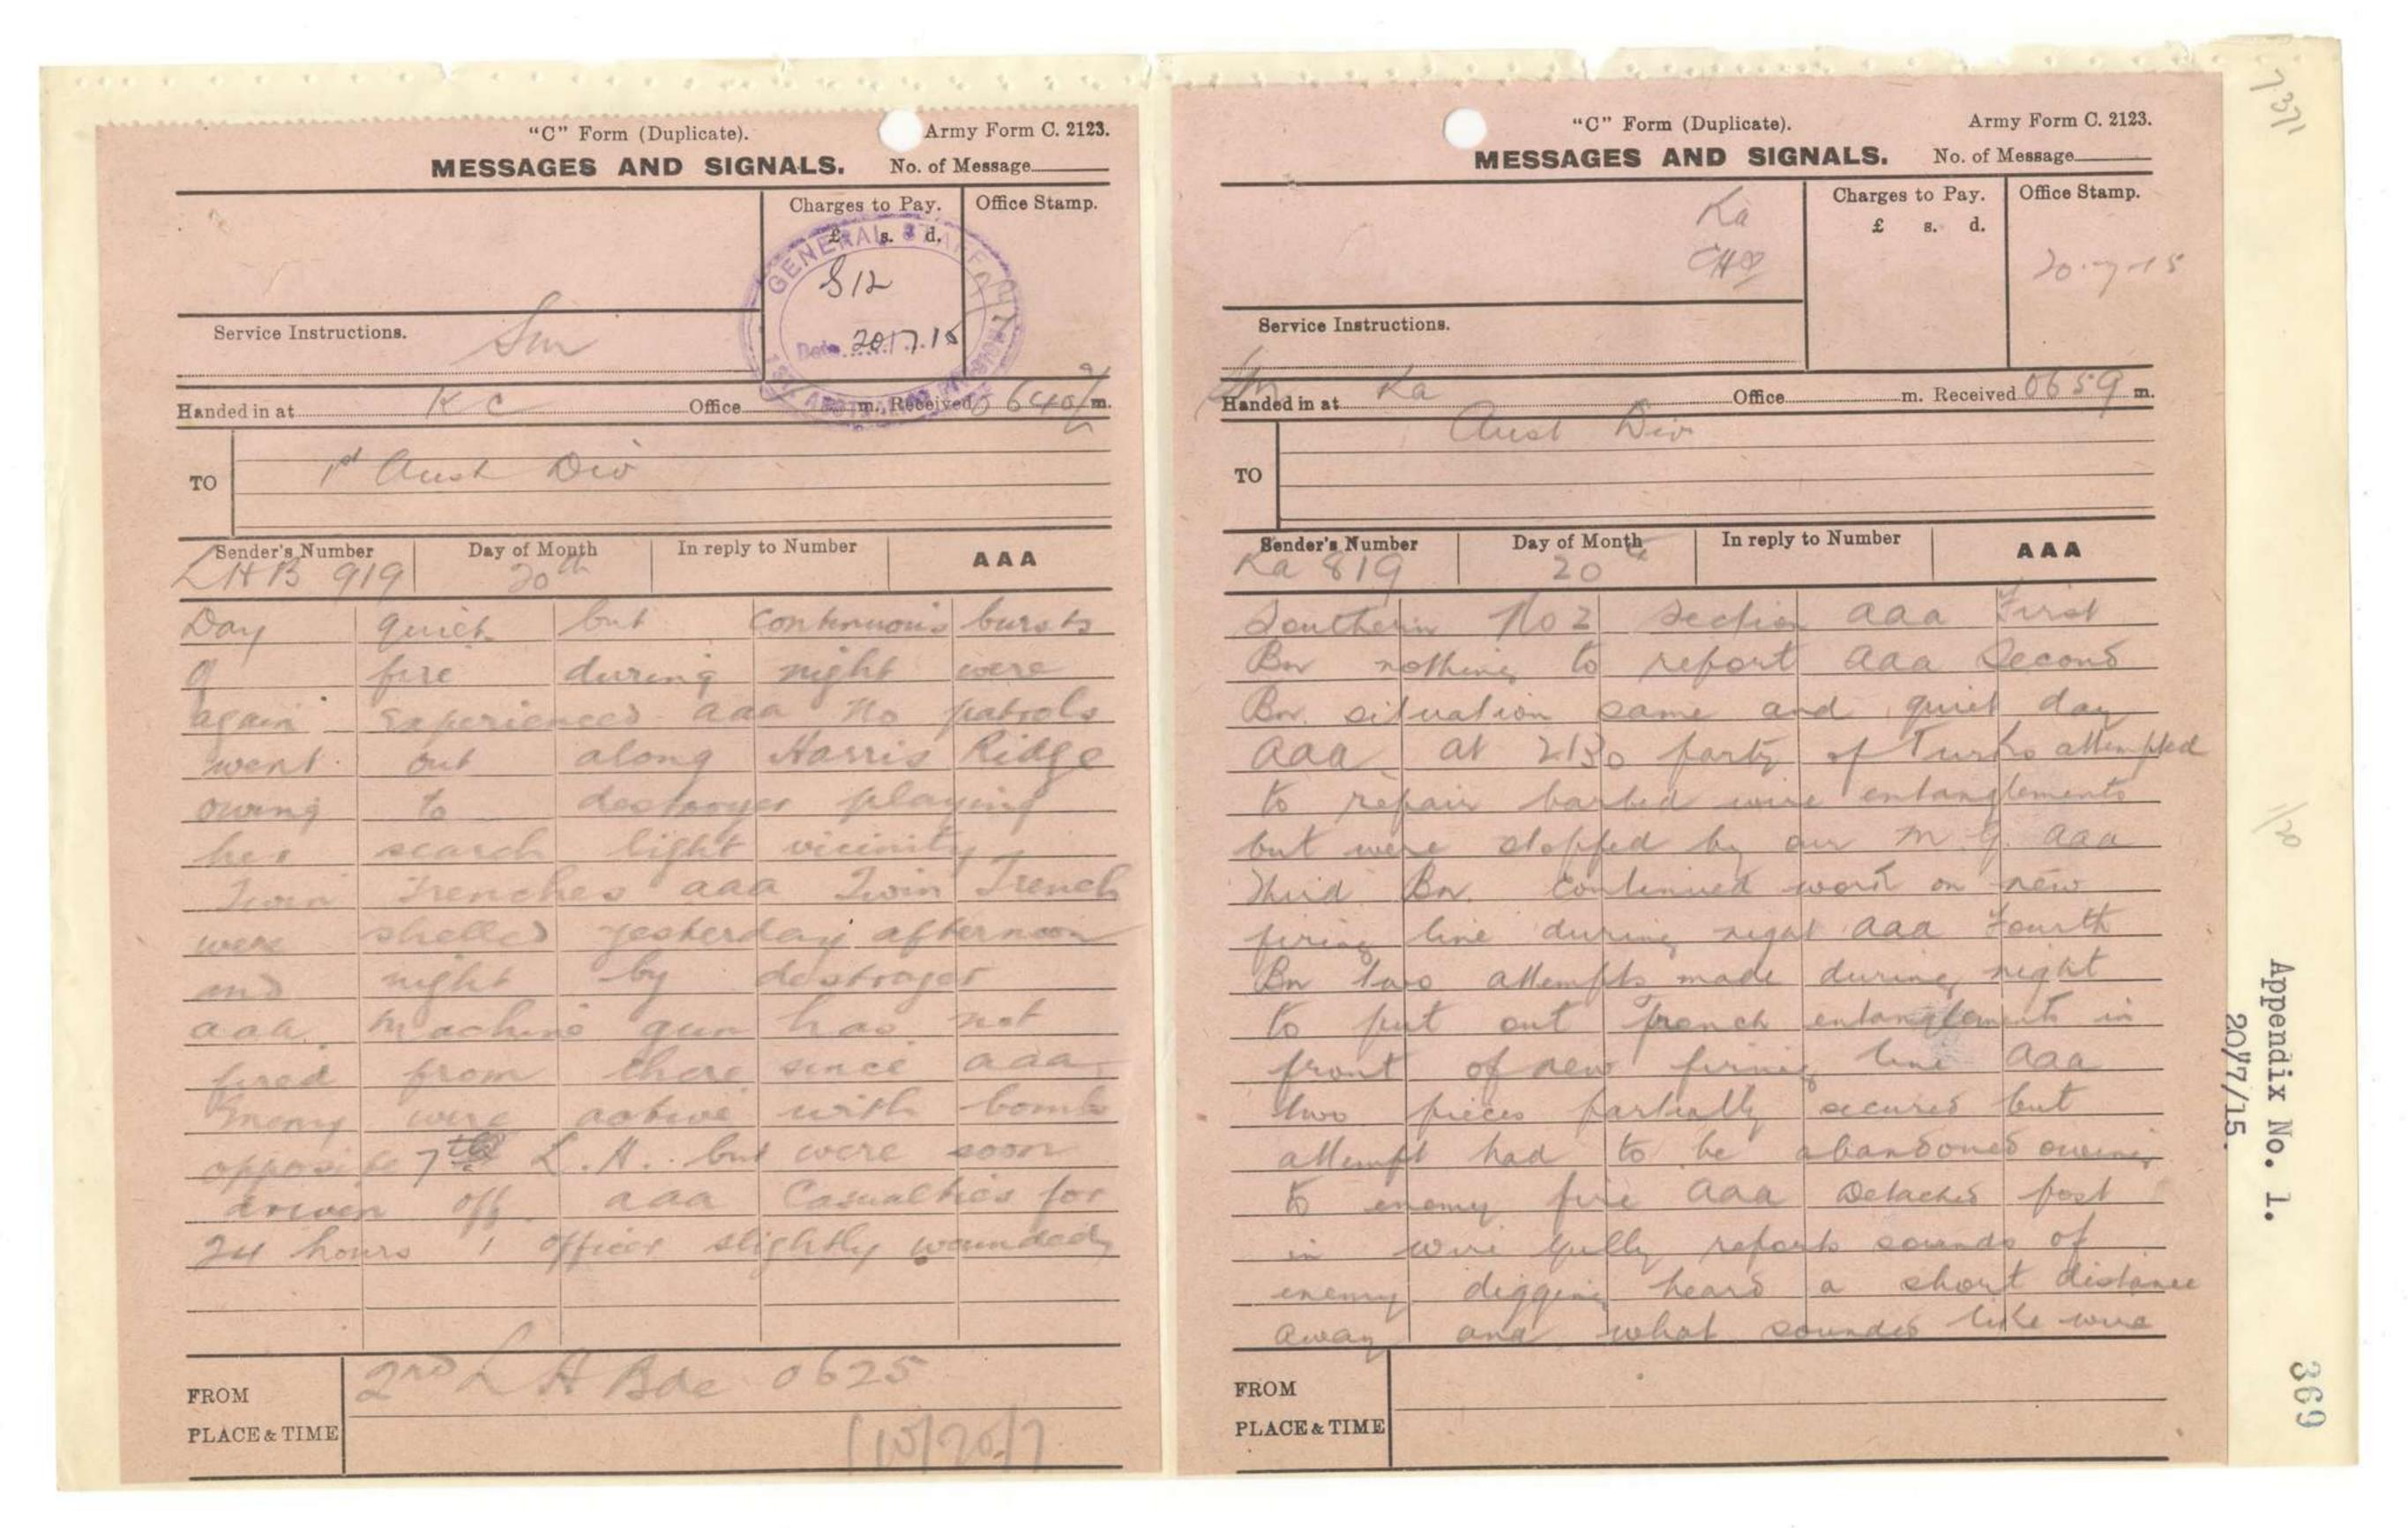

Patrols went out at 2200 from the right sub-section but encountered no enemy and obtained no information of value.

Artillary HUGHES'S battery fired eight pairs of rounds at CLIVE GROVE battery to indicate the target to H.M.S. "HUMBER". Until 1630 the enemy's artillery had been very quiet throughout the day but at that hour he opened from the SANDRIT RIDGE and was replied to by BROWNE'S battery. It was observed that, after a certain time, one gun of

the enemy ceased fire and one continued. At 1745 the 5-inch howitsers (City of Glasgow Battery) fired a series at guns located the provious day by seroplane in square 80 E.3 (in the 1/20,000 GALLIFOLI map). Aeroplane reported one hit obtained on a gun

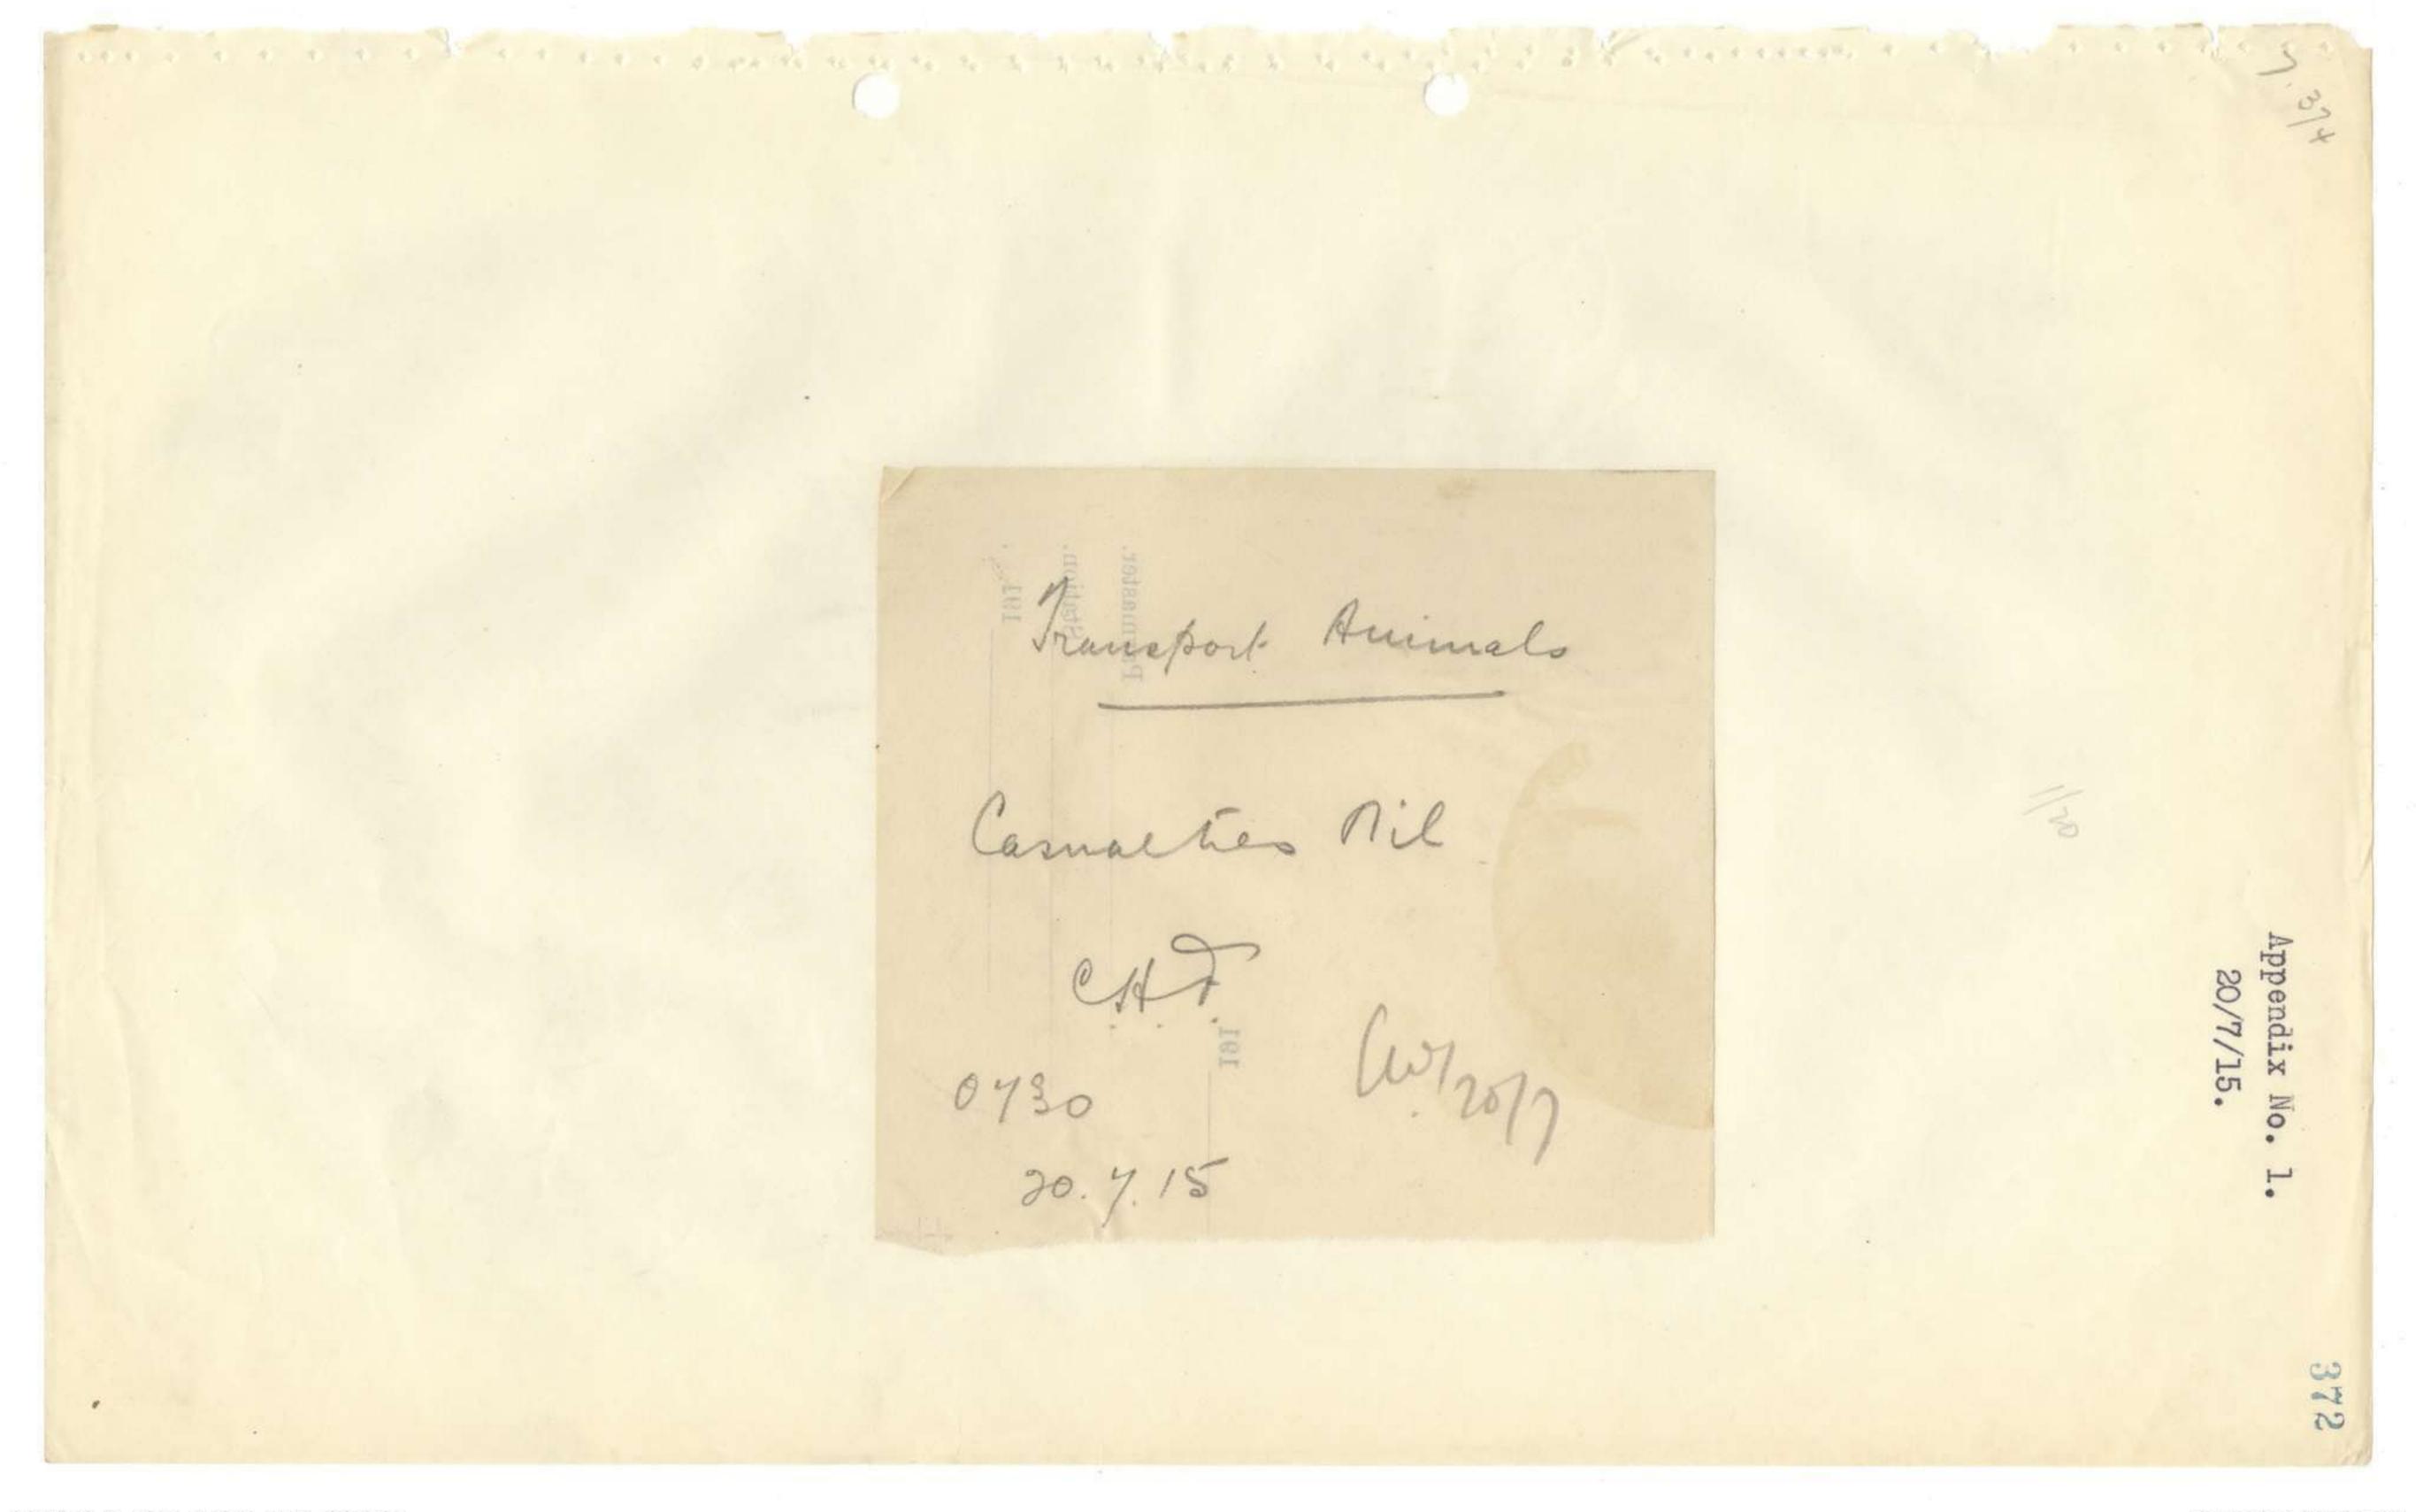

emplacement.

Artillery Daily Report - ----

20/7/15

No. 1 Section

At intervals during the morning enemy fired on the Beach with a machine gun from TWIN TRENCHES. The actual position of the gun could not be located.

Altogether HUGHE S BATTERY fired 15 rounds but the effect to cannot be stated.

At 0950 HUGHES BATTERY fired one round at working party in trenches N.E. of KABA TEPE Sq. 212 G 2 party ceased work temporarily, but were working again at 1110 when one more round was fired and party dispersed.

Bight pairs of rounds were fired at OLIVE GROVE BATTERY

to indicate target to H.M.S.HUMBER%

At 1700 JOPPS BATTERY fired 5 rounds over GEMENT EMPLAGEMENT where movement was reported.

No. 2 Section.

5 PHILLIPS and CADDYS Batteries did not fire.

At 1630 Snemy artilleryfvery quiet until 1630 when he opened at a slow rate from SAND PIT RIDGE. BROWNES Batter replied and fired in all 58 rounds including 10 rounds at QUARRY near SAND PIT. where a gun was thought to be. After about NHOWNES thirtieth round, one gun of enemy ceased fire and one continued.

At 1745 5" Howitzer (City of Glasgow Battery) fired a series at guns located the previous day by aeroplane in sq. 80 k 3 (Map of Gallipoli 1/20000) aerobeae reported one hit obtained on a gun emplacement, and also suggest another series should be fired at the same locality on the 20/7/15, and also a series at 81 G 4, both of which w will be carried out.

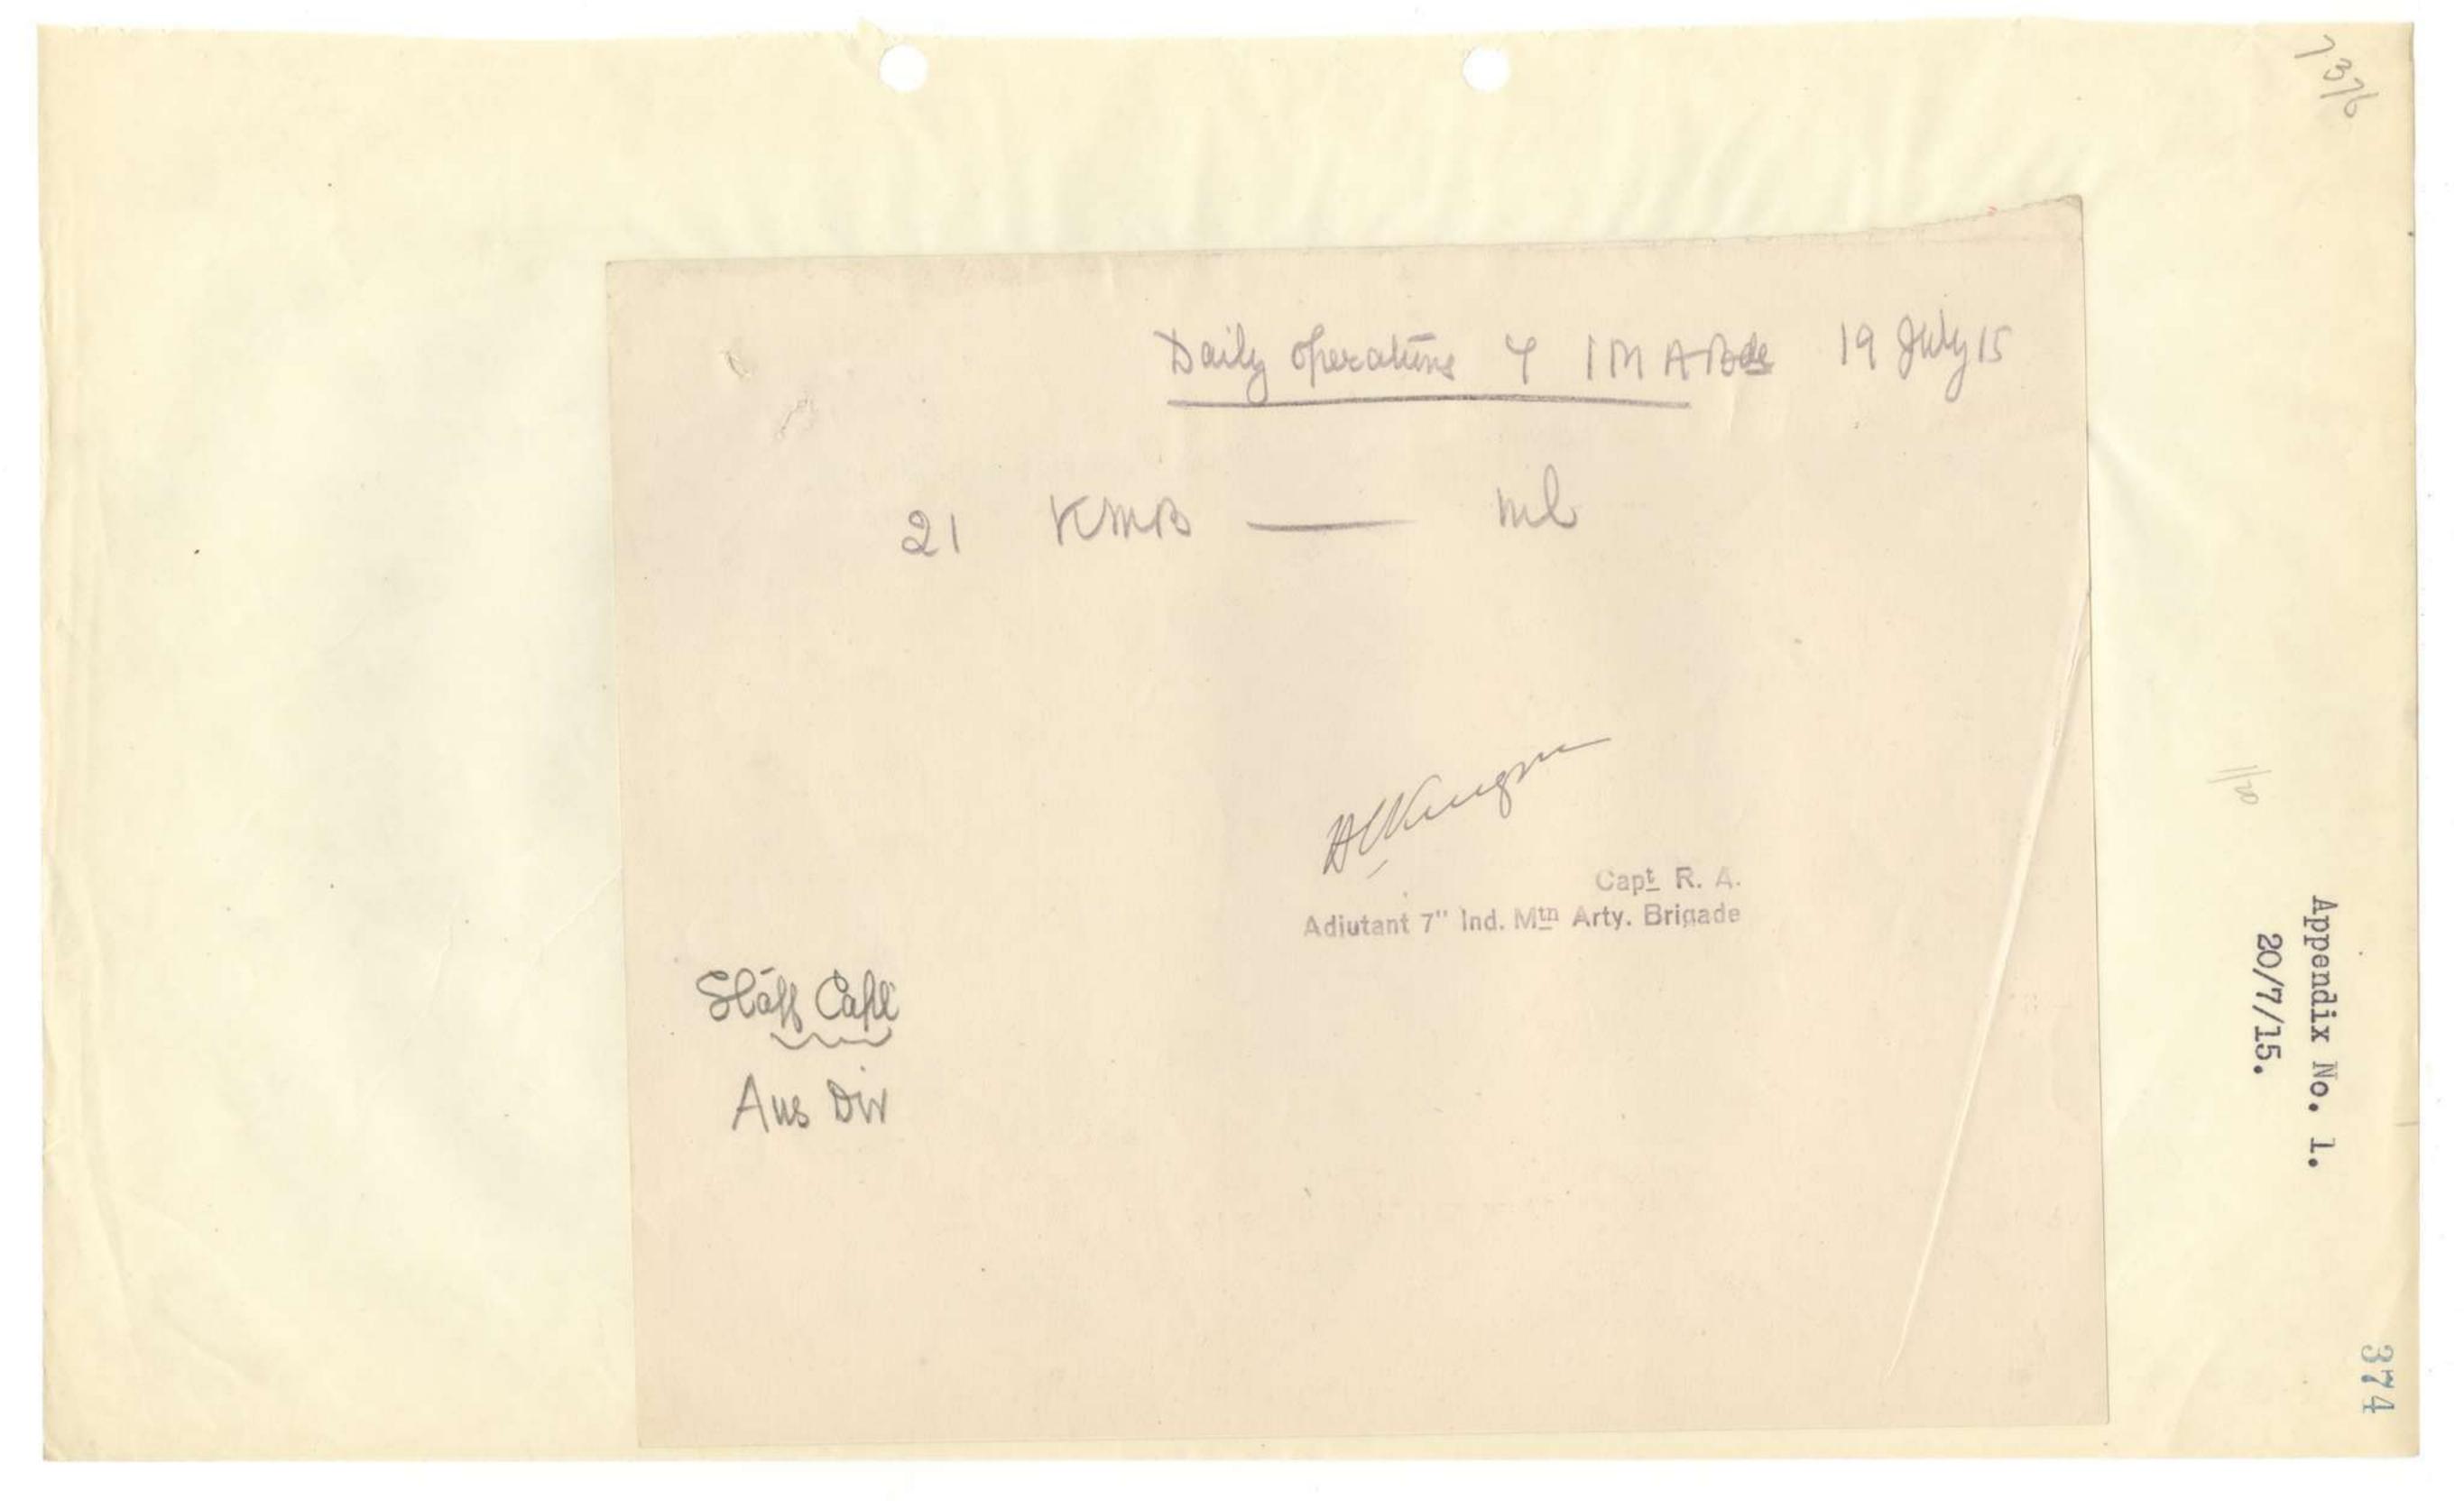

In reporting series fired in conjunction with aeroplane references are to the map of GALLIPOLI 1/20000 recently issued which has been taken into use by aeroplane observer s While the series were in progress, Howitzer from the direction of TUNKS HUMP fired about 30 rounds, distributed over our trenches and in the valley near CADDYS Battery, 5 "Howitzers at conclusion of aeroplane series fired 5 rounds at this gun.

Ammunition expended 18-pr 103 rounds 5" How 46 nil

Casualties 1 man wounded

The advantage Colonel Commanding Artillery 1st Aust. Div.

W7 2017

NEW ZEALAND AND AUSTRALIAN DIVISION

Summary of events from 6 a.m. 19th July to 6 a.m. 20th July 1915.

NO.3 SECTION

About 3 p.m. yesterday, the Turks were reported to be very active in front of COURTNEY'S, tunnelling forward from the GERMAN OFFICERS POST, and tipping earth in the wire Gully from the communication trench.

Much traffic was observed on the winding road leading up to KHILID BAHR Plateau. Later at about 4.30 p.m. a supply column was observed moving along the road past the ruined minaret in Square 204 A.

Between 9 and 10.30 p.m. the enemy opened short bursts of rifle

fire commencing from the front of the Australian Division.

The Canterbury Battalion rejoined this Section during the early part of the night from Imbros, and the Otago Battalion embarked for that Island at 3 a.m. to-day.

NO.4 SECTION

A quiet day, nothing unusual to report. The enemy on the NEK were quieter last night than they have been for the last week.

At 10.30 p.m. last night, the 15th Battalion, 4th Australian Infantry Brigade, was ordered to hold itself in readiness to assist the 1st Australian Bivision if required in the event of an attack.

ARTILLERY REPORT

The Howitzer Battery engaged MORTAR RIDGE with two rounds at 4 p.m. These were reported effective.

In conjunction with Australian 5-inch Howitzer Battery, our 4.5-inch Howitzers engaged the enemy's 6-inch gun near TURKS HUMP at 7 p.m. Eight rounds were fired - effective.

At 7.10 p.m. the Left Flank Section fired five rounds at 75 mm.

gun and the enemy ceased fire.

The 6-inch Howitzer was ordered to search OWEN'S GULLY and MULE VALLEY during the afternoon. Fire was opened at 5.40 p.m. and ceased at 6.30 p.m. Of the eight rounds fired, four fell in MULE VALLEY, two rounds in OWEN'S GULLY and two on JOHNSTON'S JOLLY Lyddite was employed and each round burst well.

It has now been arranged for night lines to be laid out by the lst and Howitzer Batteries on LONESOME PINE and the 6-inch Howitzer

on JOHNSTON'S JOLLY.

The reports received yesterday show that our immediate front was exceptionally quiet. The only thing unusual to report is that during nearly the whole day smoke was seen to rise from the South side of JOHNSTON'S JOLLY.

The number of rounds fired by Japanese Mortar - Nil.

MEMORANDUM

I forward herewith /05 copies of Special Army Corps
Order for distribution.

2. The attack referred to will most likely be in one of two forms, either a strong night attack or an assault after heavy bombardment by day.

As regards an attack by night, we are well prepared for this and no attack has yet succeeded against
our arrangements. At the same time, no serious attack
has yet been delivered which has not penetrated our
trenches at some point or other - so that our measures
for meeting night attack and for launching local counter
attacks at once at any time of day or night must be reviewed and set in order.

Particular attention must be paid to an ample provision of bombs and of flares: while all telephone communication must be guarded against injury by the enemy's fire as much as possible.

An attack by day is unlikely to be delivered except after a heavy bombardment of our fire and support trenches. The enemy have not the guns or the ammunition to batter our trenches on the scale employed in Flanders but still we have seen that much damage can be caused.

(A)

(B)

An infantry assault cannot, however, be delivered till this bombardment has ceased, and the following principles should be kept in mind when a heavy artillery bombardment of our line begins :-

When it is decided to evacuate the trenches temporarily, the trenches on either side of the part evacuated are to be warned of the intention. The commanders so warned will at once make arrangements to bring part of their fire and particularly of machine gun fire, on the ground in front of the evacuated portion.

At the same time the Section commander will be informed, and he will in turn inform all other sections of the defence, who will similarly make arrangements to bring cross fire bearing in mind that the portion most likely to be assaulted is the one which has been bombarded.

The troops withdrawn will be formed up in readiness in the nearest covered place or intact trench, with several observers out watching for signs of the enemy. As soon as the enemy assault begins, all are to take up firing positions the battered trenches being as useful as any, in readiness (aided by the cross fire referred to) to destroy the attackers.

As the garrison will not, probably, be able to employ its full strength in fire, the remainder are to be formed up ready to counter attack at once with the bayonet, if the enemy manages to effect a lodg ment in our trenches. Bomb parties are to be well supplied with bombs and a good supply kept at hand in regimental reserves.

A close look out will be kept on all known approaches and all unusual massing of troops will be reported at once to Section commanders and commanders in the fire trenches.

In recent bombardments of our trenches, the fire has 3. moved slowly down from North to South. In the event of a

Appendix No. 2 20/7/15.

serious bombardment, made with the intention of preparing for an attack on the trenches selected, work on restoring the trenches is to begin as soon as the bombardment passes on. With this in view stocks of sand bags, and French wire entanglement where entanglements are required, are to be kept close at hand in battalion store ready for use at once.

- 4. We may have to meet an artillery bombardment late in the evening combined with or followed by musketry fire to prevent rebuilding the trenches, with an infantry assault on top. The notice given by bombardment will prepare us for this form of attack which in any case is unlikely to be delivered until the waning of the moon gives an interval of darkness between sunset and moonrise.
- 5. Finally to prepare for the attack which is not unlikely all our present arrangements should be reviewed in detail and improved where necessary, and steps for rapid rebuilding of our defences and for delivery of immediate local counter attack thought out beforehand and ready to put into action.

SPECIAL AND CORPS ORDER.

AFZAC COVE, 19th July, 1915.

We have recently received information that at a Council of War hold among the Turkish leaders, it has been decided to send another 100,000 men to the Peninsula and to make a final tremendous attack upon the British treeps here. Whether such an attack is likely to be delivered mostly upon us or upon Cape Helles we cannot say, but as we are the weaker force it is quite possible they may think they candrive us out of our tremehes, if they can only come in large enough numbers. I am quite certain there is not an Australian or a New Zealander who believes this, or who will for one moment allow them to do so in whatever numbers they might come. In fact, from my daily visits to the tremehes, I know well that you are all only longing for the Turks to come and attack us, so as to give you yet another chance of showing them what Australian and New Zealand soldiers can do.

Our tronches are strong and our shooting is good, so we know we can wait any attack with perfect confidence. The only thing we have to remember is to be fully propared for it in every way, and to be fully determined to destroy every Turk who appears in front of our trenches: accurate and rapid fire in the first instance, and if he ever gots up to the trenches, then the bayonet.

We have to remember that we may now be faced with the brutal contrivences of the German in the way of asphyxiating gases. Helicts are being served out to all ranks which give complete immnity from this, and instructions have been given to all as to the exact precedure to be adopted in the event of the energ's attack being preceded by asphyxiating gas. If these orders are followed, you need have no fear whatever of the gas, the very use of which will here than ever determine you to wipe out an energy who can sink to such destardly devices.

of the town

Appendix No. 2. 20/7/15.

OPERATION MEMORANDUM No. 23

Major-General J.G. TEGGE, C. M. G. Commanding 1st Australian Division.

> Divisional Headquarters, 20th July, 1915.

(TO ACCOMPANY SPECIAL ARMY CORPS ORDER, dated 19th JULY, 1915.)

1. - General. The attack referred to in Special Army Corps Order, dated 19th July, may take the form of either :-

(1) a strong night attack; or

(ii) an assault after heavy bombardment by day.

Our measures to meet attack and to launch local counterattacks at once, at any time of day or night, must be reviewed and
set in order.

- 2. Bombs and flares. Particular attention will be paid to the organization of bomb throwers and the provision of an ample supply of bombs and flares.
- 3. Telephone communications will be guarded against injury by enemy's fire, and, where necessary, alternative means of communication will be provided.
- 4. Action in event of bombardment. (i) When treeps are withdrawn from fire trenches subjected to heavy artillery bombardment, the units on either side of the part evacuated will be informed so that some of their fire, and particularly their machine gun fire, may be breaght to bear on the ground in front of the evacuated portion. At the same time the section commander will be informed and he will, in turn, warn all other sections of the defence, as well as the artillery. Every effort will be made to arrange for cross fire to be brought to bear on the ground in front of trenches subjected to heavy bombardment for this is the portion most likely to be assaulted.

(ii) The troops withdrawn will be formed up under the nearest cover, with several observers watching for signs of the enemy's advance, ready to man their old tronches or other fire positions as soon as the enemy's assault begins, that is, as soon as the bombardment has ceased.

(iii) As the garrison may not be able to employ its full strongth in fire, the remainder will be formed up ready to counterattack at once with the bayonet if the enemy manages to effect a lodgment in our trenches.

(iv) A close lookout will be kept on all known approaches and all the usual massing of enemy troops will be reported at once to section commanders and commanders in the fire trenches.

- (v) As soon as bombardment coases, fire positions are to be restored whenever this is possible. For this purpose stocks of sandbags and lengths of ready made wire outanglements are to be kept close at hand ready for use as required.
- 5. Preparations to meet attack. In order to be prepared for the attack which is not unlikely, all our present arrangements should be reviewed in detail and improved where necessary. Steps for rapidly rebuilding our defences and for the delivery of immediate local counter-attacks require to be thought out before-hand, and rehearsed as far as may be practicable.

Gonoral Staff.

138's Extract from G. Legistry: - 20" July, 1915: 1 1913

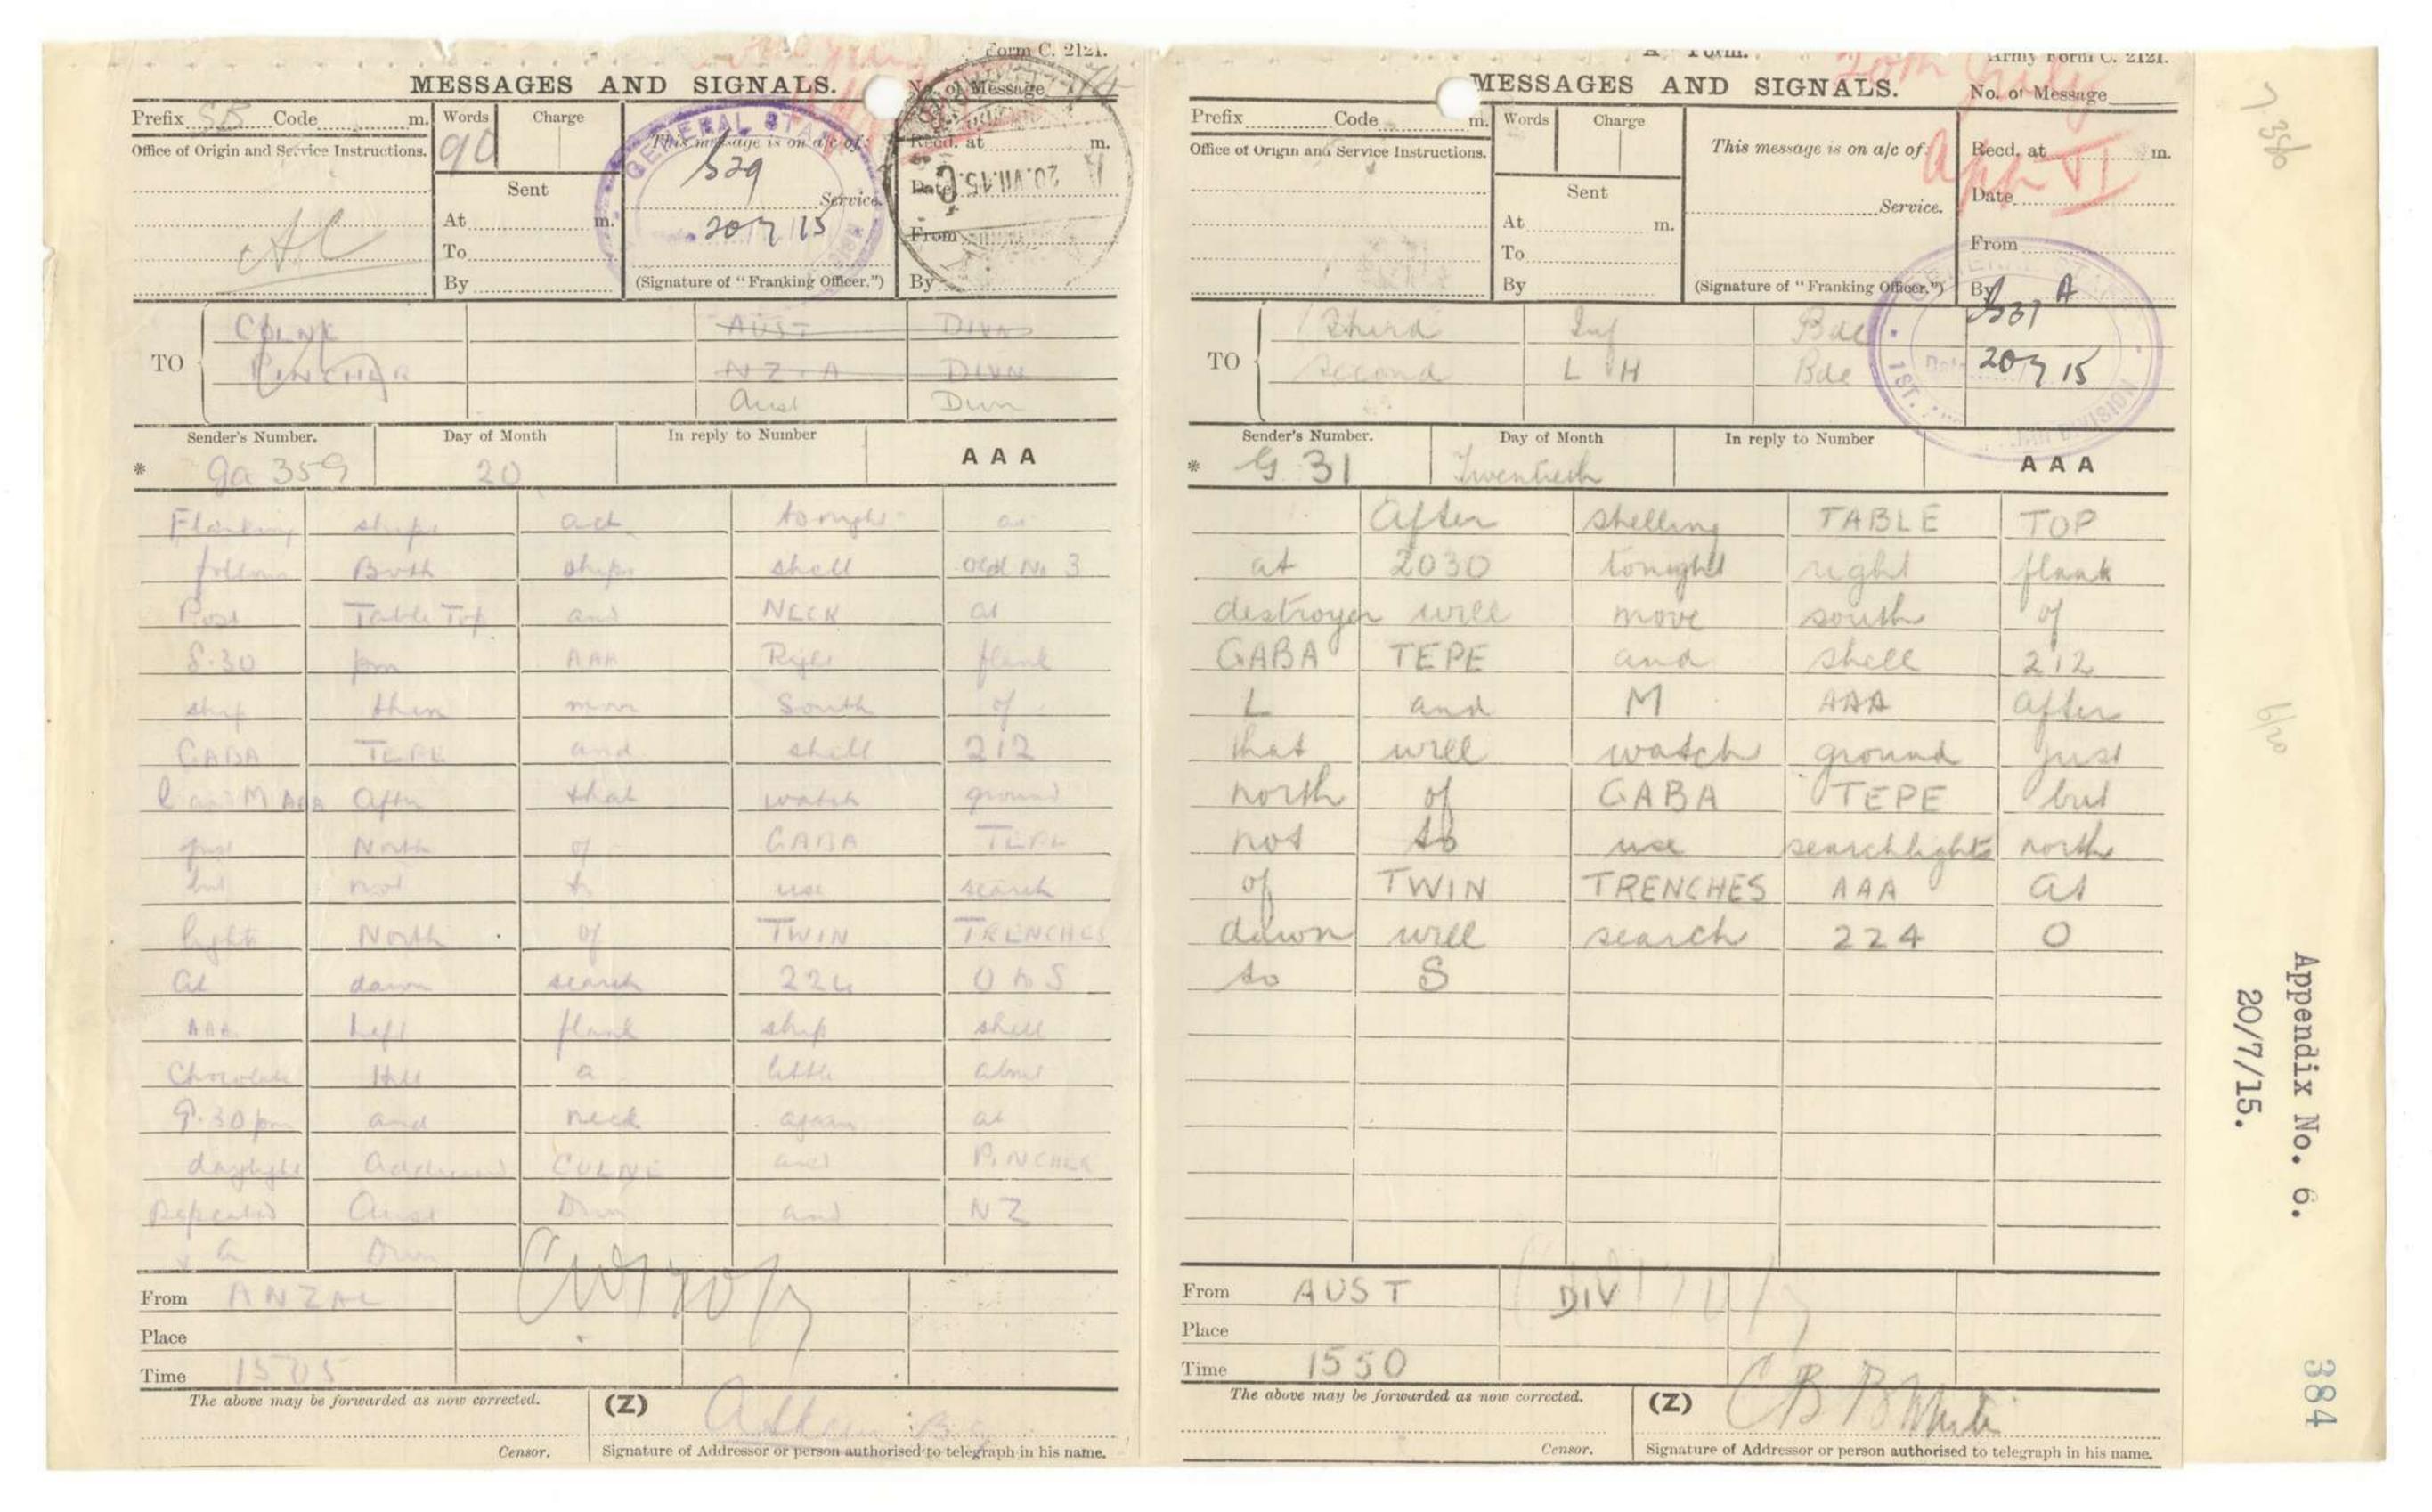

La 609 to a Grand Ig 602 from angac. With reference to para 1 of Ga 239 of Lodays date it is reported that the 39th 41st and 42nd Regts. left Constandinople between July 11th and 13th. This would bring them into our neighbourhood marching quickly Soday AMAN or Somorrow Ined-Pandik area, and he 39th from between Sculari and Berkos (ie., the Black Sen military area). a sulsequent report states hat the 46" and 4" Regds, also from the Black Sea area, left Constantinople on the 13" and 14" July respectively. Their possible advent here during the course of the next two or three days, therefore, must also be reckoved

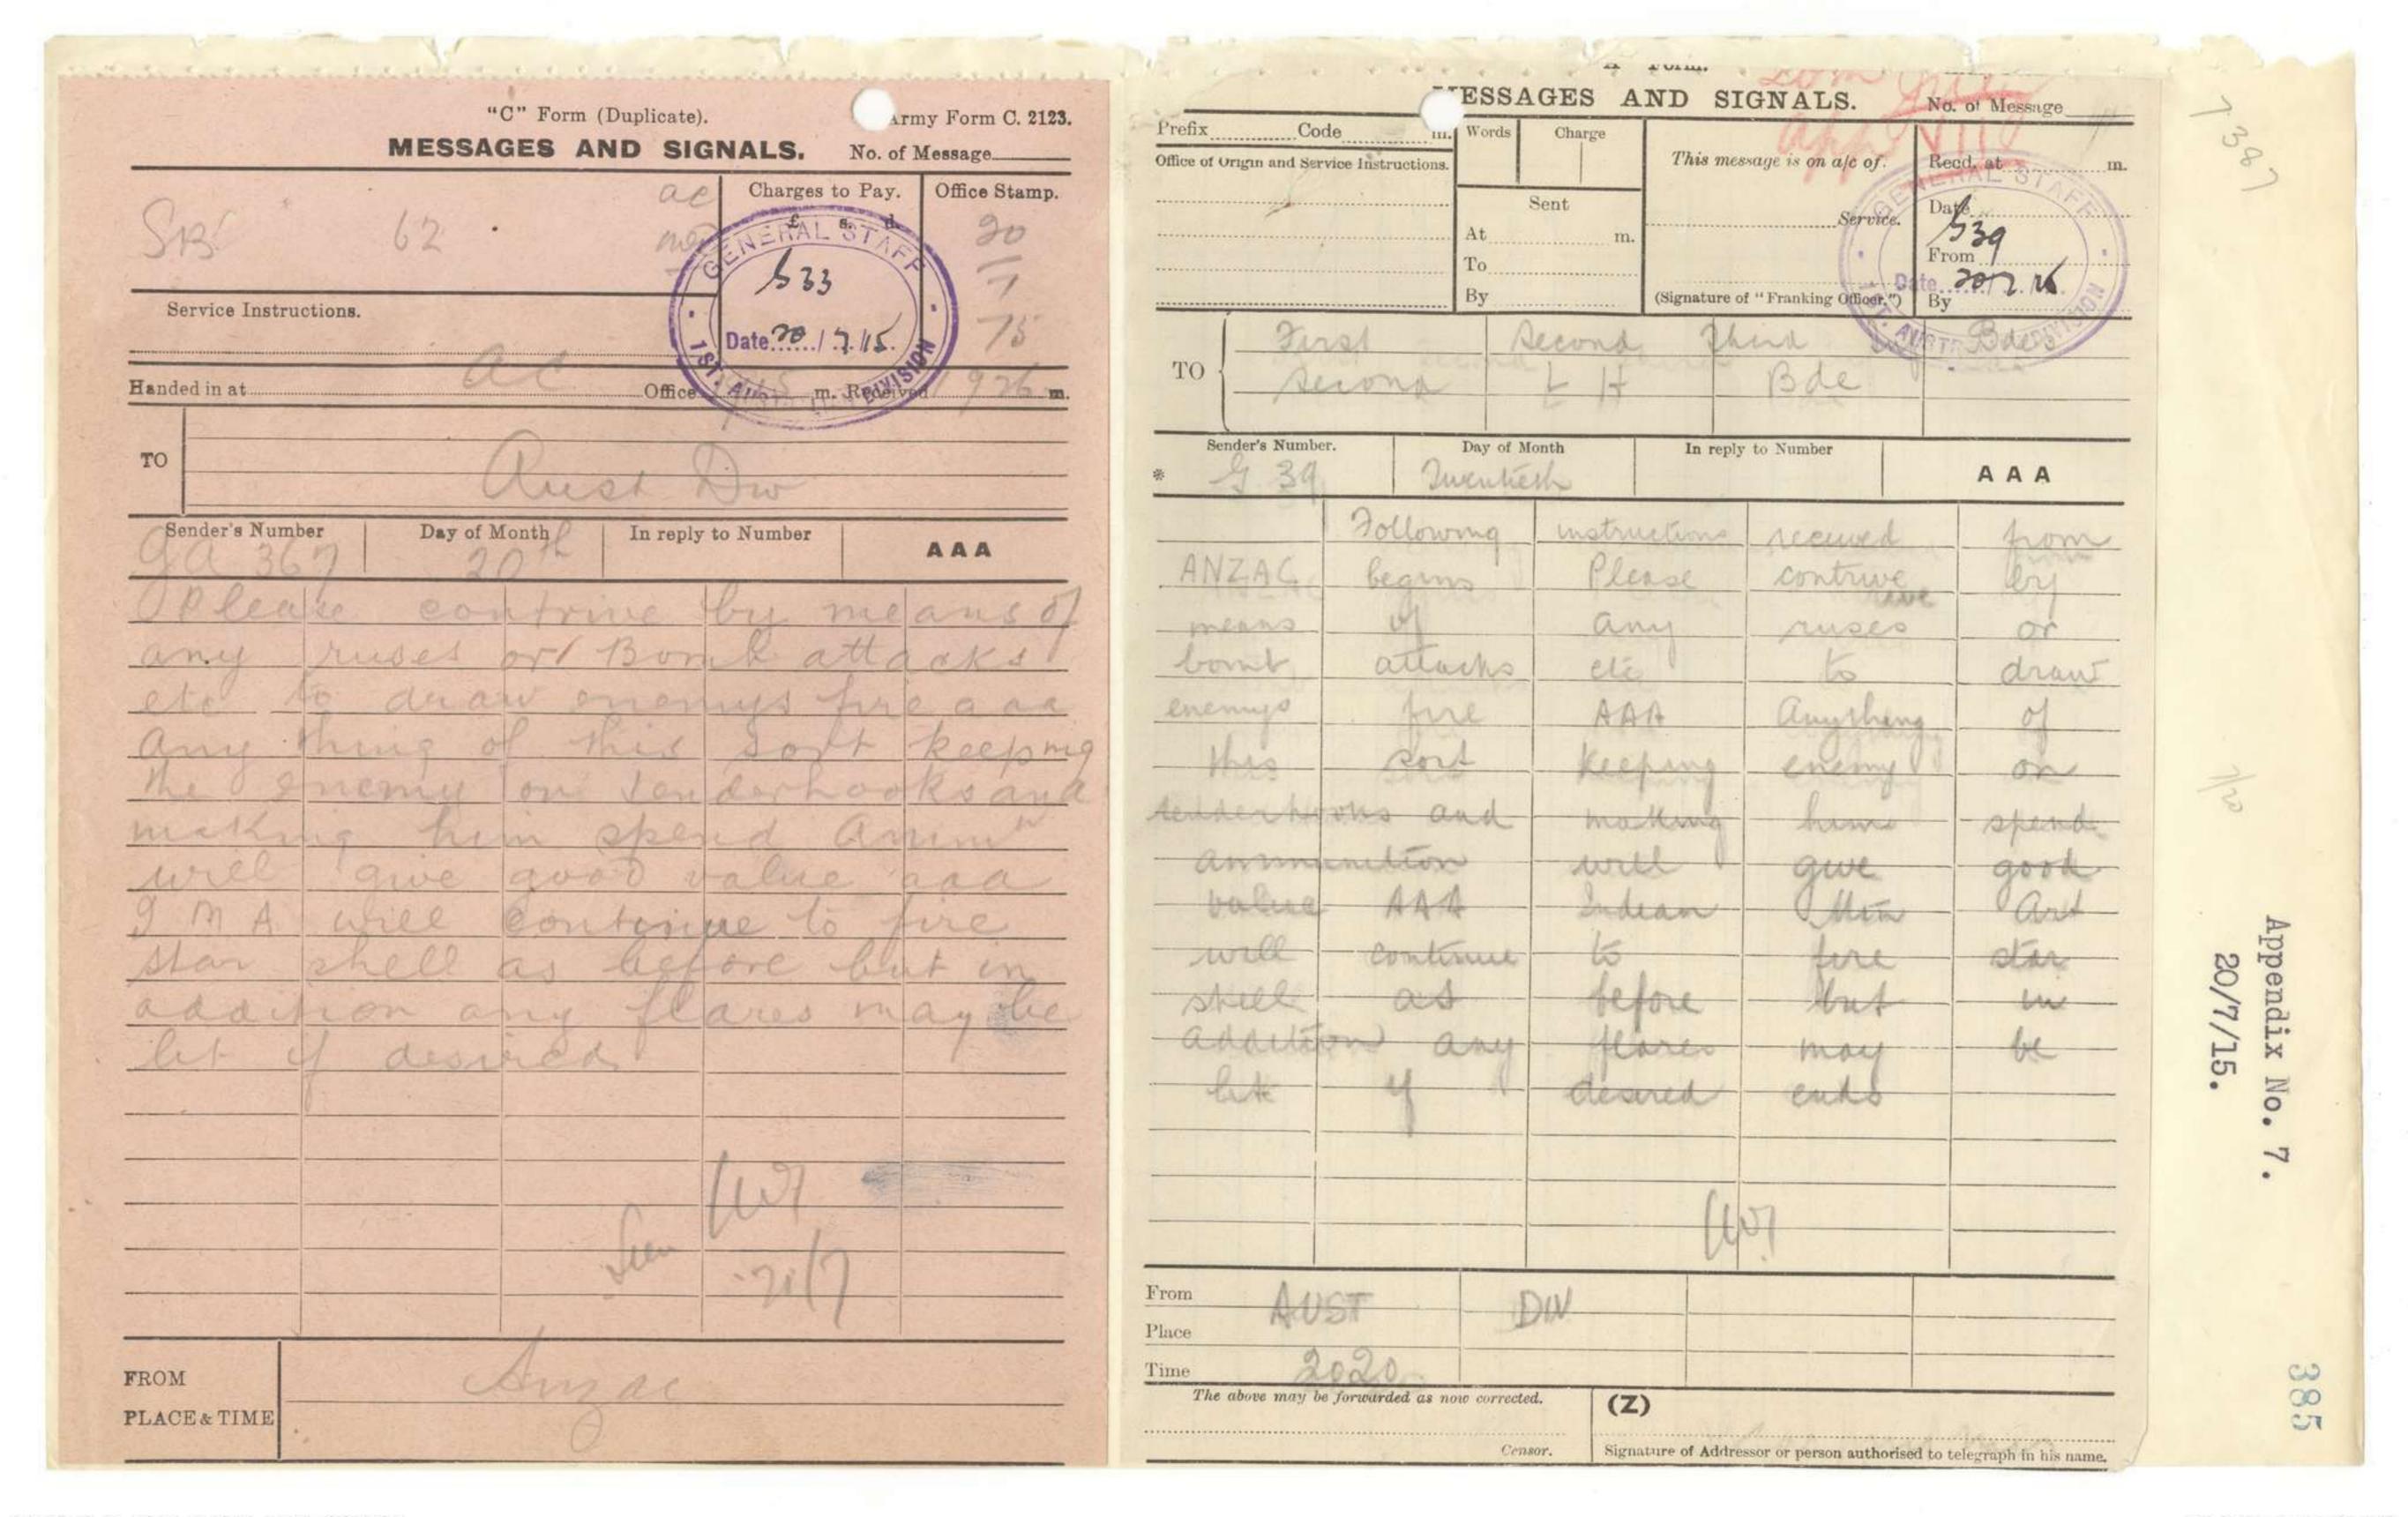

13 6 stract from 95. registry, 20 - July 1915; - pag 15 Ga. 362 from anzac Please see para. 3 of the organization orders sent with my Ga. 361, (Para 3. heads — " all troops should land wearing two while 6- mich armlets and a white thatch on back of right shoulder. Calveo is preferable but trus paper well do in hen?) The army Corps Commander wishes a a similar distinguishing mark to be worn by all ranks of the army Corps in the event of operations from within the angre position, and wishes notice given to you now so that the material, cloth or paper, may be set aside before the call comes.

AEROPLANE REPORTS.

16th July, 1915.

Map 1/40,000. Trenches and guns (2) at 249 M 1,2 and 4. Trenches at 250 R and 250 T. Communication trench between. Stores in gully at G 1 and 4. Large packing cases, about eight in number, about 12 feet long by 5 feet square. Three or four hundred men in this gully. Stores and 500 men in gully at 225 L 7. One 100 lb. bomb exploded on opposite side of gully, about 30 yards from men and stores at 225 G 1.

Kilia Liman One small steamer, about 100 feet long, alongside pier. Eight small sailing craft about 50 feet long. Ten small sailing craft sailing up Kilia Liman, northerly direction, keeping within 50-100 yards of European shore. One small torpedo boat came from Ak Bashi Liman to S. of Nagara and then returned. She passed 100 yards west of wreck at Nagara Point, showing that channel exists here. One small steamer, about 120 feet long, steaming across from Nagara Liman to Kilia Liman. Two small steamers, 100 feet long, in Nagara Liman. Two small steamers, 100 feet long, in Chanak, N. Bay. Also about six small craft.

17th July, 1915.

Camps 30 huts, 93 G 7. 20 bivouacs, 92 I 8. 80 U 6 and 3 - 250 yards of bivouacs - estimated number 2500 men. 68 D 2 - 10 to 20 huts and shelters. 68 J 5 - 20 huts and shelters. 68 W 2 - 30 shelters. 81 C 8 - camp and stores, about 200 men. Seven two-horsed vehicles at 81 T 9 moving North. 100 cavalry at 81 H 5. Guns firing (two big ones) on crest at 80 F 8. One gun firing, 80 F 3. Trenches as on enclosed tracing. No signs of life in Biyuk Anafarta. Trenches and shelters at 56 A and B.-about 100 men. Trenches at 55 U - about 50-100 men in them.

Ak Bashi Liman Two sailing ships 150 feet long, one steamer 150 feet long, and six small craft. One steam vessel by net at 215 R l. Net was very much sagged and I doubt if it will stand the current for long.

Reconnaisance flight.

Area of reconnaisance - ground west of Yalova Dere on the Boghali Sheet - Scale 1/20,000.

Roads. Two first class roads running east and west Used by enemy transport. (1) The coast road from Kilia Iakele through Boghali Kale and thence east along the coast. A column of about 20 wagons was seen, at 1140 at 58 K 2 moving west. Dropped one bomb on them which failed to explode. (2) The Kilia Fakele - Yalova Road. A column of about 20 wagons seen at 1145 at 83 C 5 moving east. No movement on any other road or track.

Camps A camp in 82 Y near Boghali. This camp consists of some half dozen long sheds and about a dozen smaller sheds. The former camps North and West of Boghali have disappeared and the number of troops in the neighborhood must be greatly diminished.

Entrenchments, There are a few trenches dug about Mal Tepe (1200 yards S.W. of Boghali) as shewn in the accompanying sketch. These

were probably dug as practice for the troops under training at Boghali Camp. There are occasional short trenches on the spurs of Koja Chemen Tepe in 94 B facing North. Apart from these there is no entrenched position in this area N of Kilia Dere.

Gun Positions. No gun positions have been prepared in this area Troops. There was no sign of troops in any of the villages in this area.

Australian Division. N. Z. & A. Division I. M. A. Brigado 69th Bde R.F.A.

ARmy Corps Headquarters, 20th July, 1915

1st AUSTRALIAN DIVISION.

Summary - 6 a.m. 20th July to 6 a.m. /2let July . 2 /7/15

No.I. Section .. Nothing of importance occurred during the day. Huses drew a great deal of enemy fire at various hours. At 0215 the enemy lit a big defensive flare which lasted till 0235.

A patrol sent out from CHATHAM'S FOST moved along the beach for some 700 yards but did not encounter any enemy. At 0130 patrol withdrew to within about 300 yards of CHATHAM'S FOST and from there a party was sent to the BALKAN GUN FITS. They were fired on by the enemy who appeared to be occupying the ridge from the FITS towards our FOST. The patrol fell back gradually drawing the enemy after them until finally some 200 Turks came within 50 yards of our wire entanglements and were speedily driven off.

No.II. Section .. Southern. A very quiet day. More entanglements were put out last night and the crater opposite JOHNSTONE'S JOLLY was successfully occupied. In a tunnel not far from the present crater picking was reported to be only 5 feet from the face, and a charge was laid and fired at 0330.

Throughout the night the enemy fired heavily. The

NORTHERN. Very quiet in this portion of our line also.

The left mr pertion of our trenches were shelled at 1400, and 1445, and again at 1900 and 2000. A good deal of damage was done to the trenches but no casualties.

detached post in BARBED WIRE GULLY reported all was quiet

A patrol reconnoitring BARBED WIRE GULLY reports having seen a party of about 200 men who appeared to be a covering party for the enemy's engineers who were working apparently at entanglements on our left of JOHNSTONE'S JOLLY.

At 2330 there was a sudden outburst of machine gun and rifle fire and indications of an attack from GERMAN

OFFICERS TREECH but nothing eventuated.

Artillery .. At 1815 the OLIVE GROVE right section and the third gun a little to the south of these two guns opened fire on our right flank trenches, McCAY RIDGE, and RAZORBACK.

The guns were engaged by BURGESS'S battery and the detachment of the single gun, which was visible, left immediately.

BROWNE'S battary fired 3 effective rounds at a work-

ing party below TURKS HUMP. MX

At 1706 after an aeroplane series by 5-inch howitzers, the guns at THE SANDFIT opened on the trenches of No.II Section very accurately. Fire from BROWNE'S battery caused them to cease.

At 1730 the howitzers fired 11 rounds distributed over the eastern end of JOHNSTONE'S JOLLY, east of THE

CHESSBOARD, and LEGGE VALLEY.

At 1800 the 5-inch howitzers fired a series with aeroplane observation. The reports indicate that one gun was probably damaged and also some dugouts. Another series with aeroplane observation will be fired on the 21st.

Report.

1ST AUSTRALIAN DIVISION

Artillery Daily Report,

21-7-15

1st Section.

At 1500 a party was observed working on trenches at Southern end PINE RIDGE - HUGHES BATTERY fired one round. and party dispersed.

At 1815 The OLIVE GROVE Right Section and a third gun a little to the South of these two guns opened fire on our right flank trenches McKAYS RIDGE and RAZORBACK) These guns were engagedby BURGESS BATTERY the detachment of the single gun which was visible left immediately and BURGESS BATTERY was concentrated on the other two.

At 1830 No. 1 6" Howitzer fired 9 rounds at a gun in OLIVE GROVE and the last few rounds fell very close to target but a direct hit did not happen to be made.

No. 2 Section.

4 BROWNES BATTERY fired three effective rounds at working

5 party below TURKS HUMP 122

At 1500 guns at SAND PIT opened fire on No. 2 Section trenches BROWNES BATTERY fired a few rounds and enemy guns ceased fire.

on SAND PIT again opened on trenches of No. 2 Section very accurately - BROWNES BATTERY was ready to engage the these guns and PHILLIPS and CADDYS BATTERIES were laid on enemy trenches at Head of MONASH GULLY and CHESSBOARD and fired at the same time as BROWNES BATTERY guns at SAND PIT deased fire.

At 173056" Howitzers fired 11 rounds distributed over Eastern and JOHNSTONES JOLLY East of CHESSBOARD and LEGGE VALLEY at its junction with WIRE GULLY all rounds detonated and appeared effective on trenches.

observation - the report indicates that one gun was possibly damaged and also some dug-outs. Many of the 23 rounds fired are reported as between 5 and 20 yards from target which appears to be on a ratorback - the strong wind made howiter shooting difficult at such a target. Another series with aeroplane observation will be fired on 21/7/15at 1600 at gun target about 200 yards S.E. of position registered above

Ammunition expended 18-pr 30 rds.

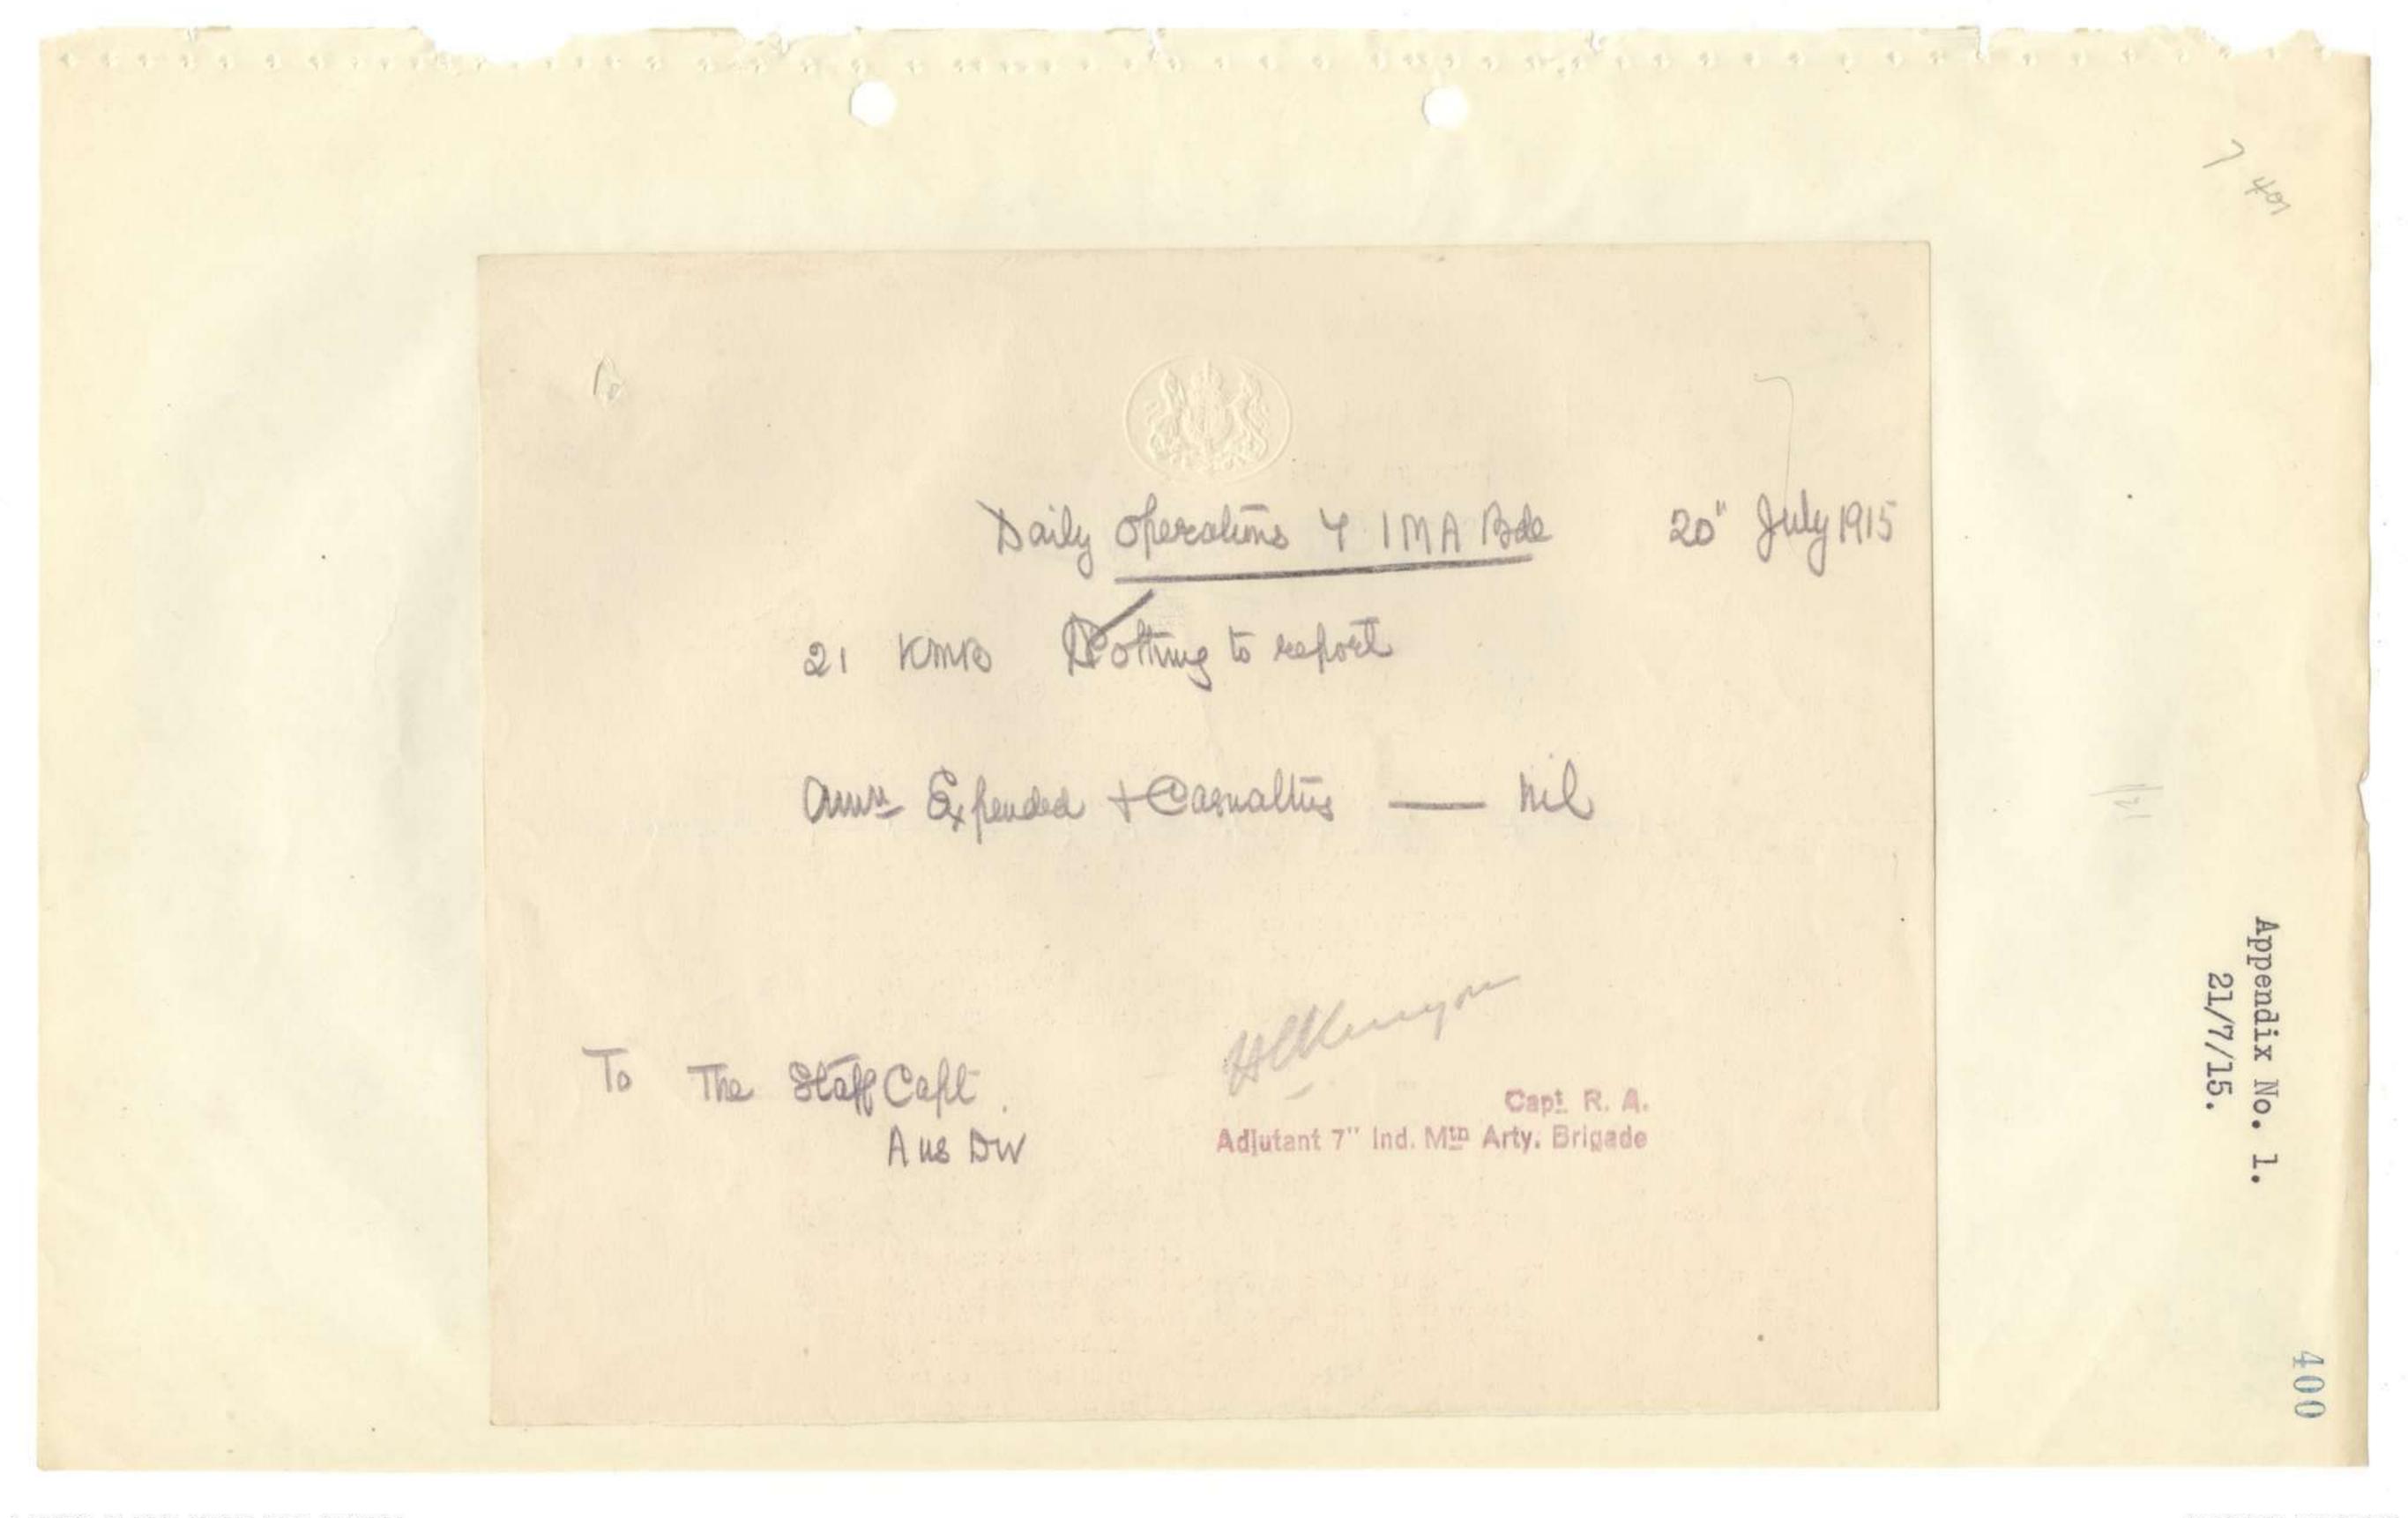

5" How. 42"

6"How. 9 rds

Commanding Artillery 1st Aust. Div.

CORRECTION - in my yesterdays report for 46 rds 5" howz. read 25 rds howitzer.

an 21/7

NEW ZEALAND AND AUSTRALIAN DIVISION

Summary of events from 6 a.m. 20th July to 6 a.m. 21st Guly

NO. 3 SECTION

At 3 p.m. the Turks in front of QUINN'S showed some activity

by bombing and sniping, but both were quickly overcome.

At 11.15 p.m. a heavy burst of rifle fire opened from the enemy trenches on the NEK, and in front of POPE'S, gradually working round in front of QUINN'S and COURTNEY'S and lasting for about half an hour.

No movement of the enemy was seen. Otherwise, very quiet

in front of this Section throughout the above period.

NO. 4 SECTION

Early yesterday morning, some Turks were heard in the scrub in front of No. / Sap (SECRET SAP). Fire was purposely not opened on them as it was thought that they might get into the Secret Sap without being aware of its existence, but as daylight was coming on, and as they did not seem to be getting any nearer, fire was eventually opened, and after daylight it was observed that two of them were lying dead in the scrub. Their bodies have been recovered during the night, and their effects, together with their rifles, will be sent in to-day.

At 10.15 a.m. our aeroplane dropped a heavy bomb close to the enemy main communication trench which runs down the Gully on

the seaward side of BABY 700.

The ruse carried out at 11.15 p.m., consisting of the firing of star-shells and the throwing of bombs, drew a heavy rifle and Machine Gun fire from the NEK trenches. The Turks also opened fire with a bomb mortar, and fired rockets.

This lasted for about fifteen minutes, and then died away.

Otherwise, there was nothing unusual to report.

ARTILLERY REPORT.

At 4.20 p.m. eleven rounds were fired by the Howitzer Battery at a Camel Train moving East through SALT LAKE VALLEY. They were effective, as the Train was dispersed.

The number of rounds fired by Japanese Mortar - Nil.

AUSTRALIAN AND ARMY

Army Corps Headquarters, Anzac Cove, 21st July, 1915.

From: - General Staff, Australian & New Zealand Army Corps.

:- Australian Division. New Zealand & Aust. Division. I.M.A. Brigade. 69th Brigade, R.F.A.

MEMORANDUM.

In continuation of Memorandum Ga. 237 of 11th July, Para 3, in the event of the enemy using gas cylinders to attack, the same procedure will be followed as in dealing with guns projecting shells, namely, bringing our gun fire to bear on the site of the cylinders as quickly as possible. But the cylinders may be employed from closer range and where possibly, our guns may not be able to fire on them. Here however, they will be within reach of our bomb mortars and possibly of our hand grenades.

All ranks will therefore be warned that if a gas attack is being begun from close range they are to make every effort to locate the place in which the cylinders are being . used and to smother it with bombs, at the same time giving notice to the Garland, 3".7, and Japanese bomb mortar squads, and to the nearest artillery observer.

A well aimed Lotbiniere bomb will probably be as effective as any in upsetting the machine and turning it on

the enemy.

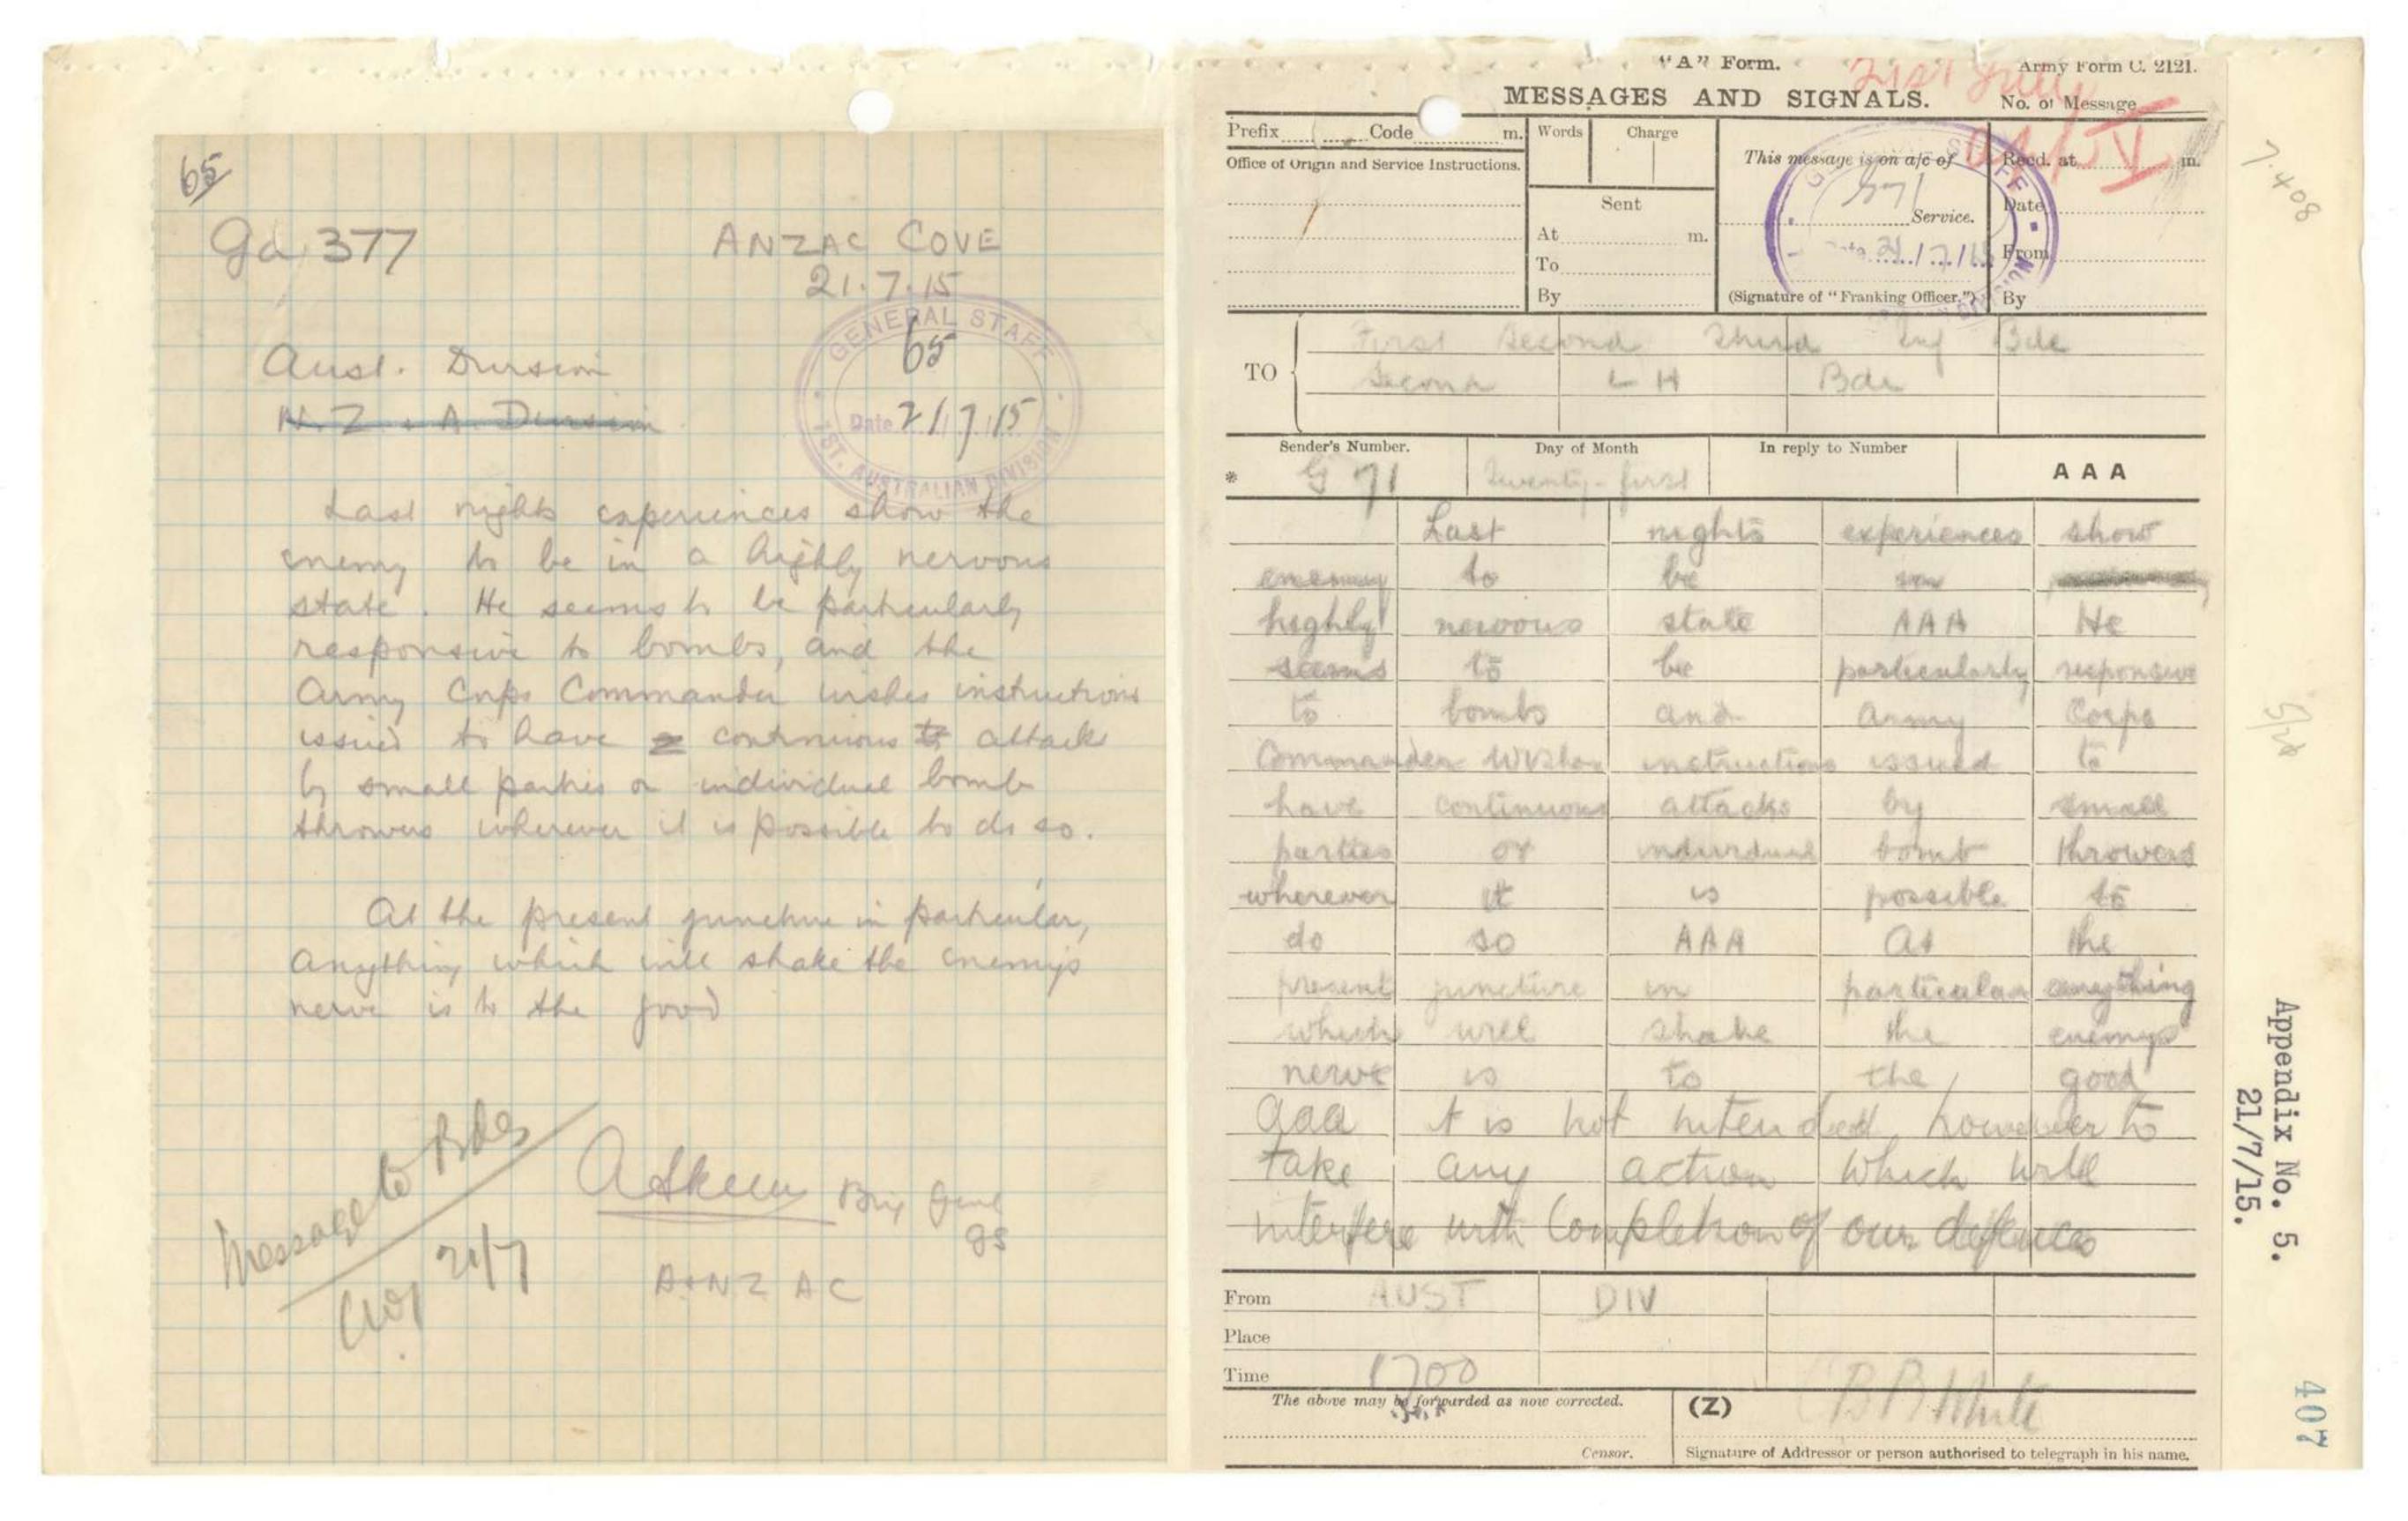

Brig-General, General Staff,

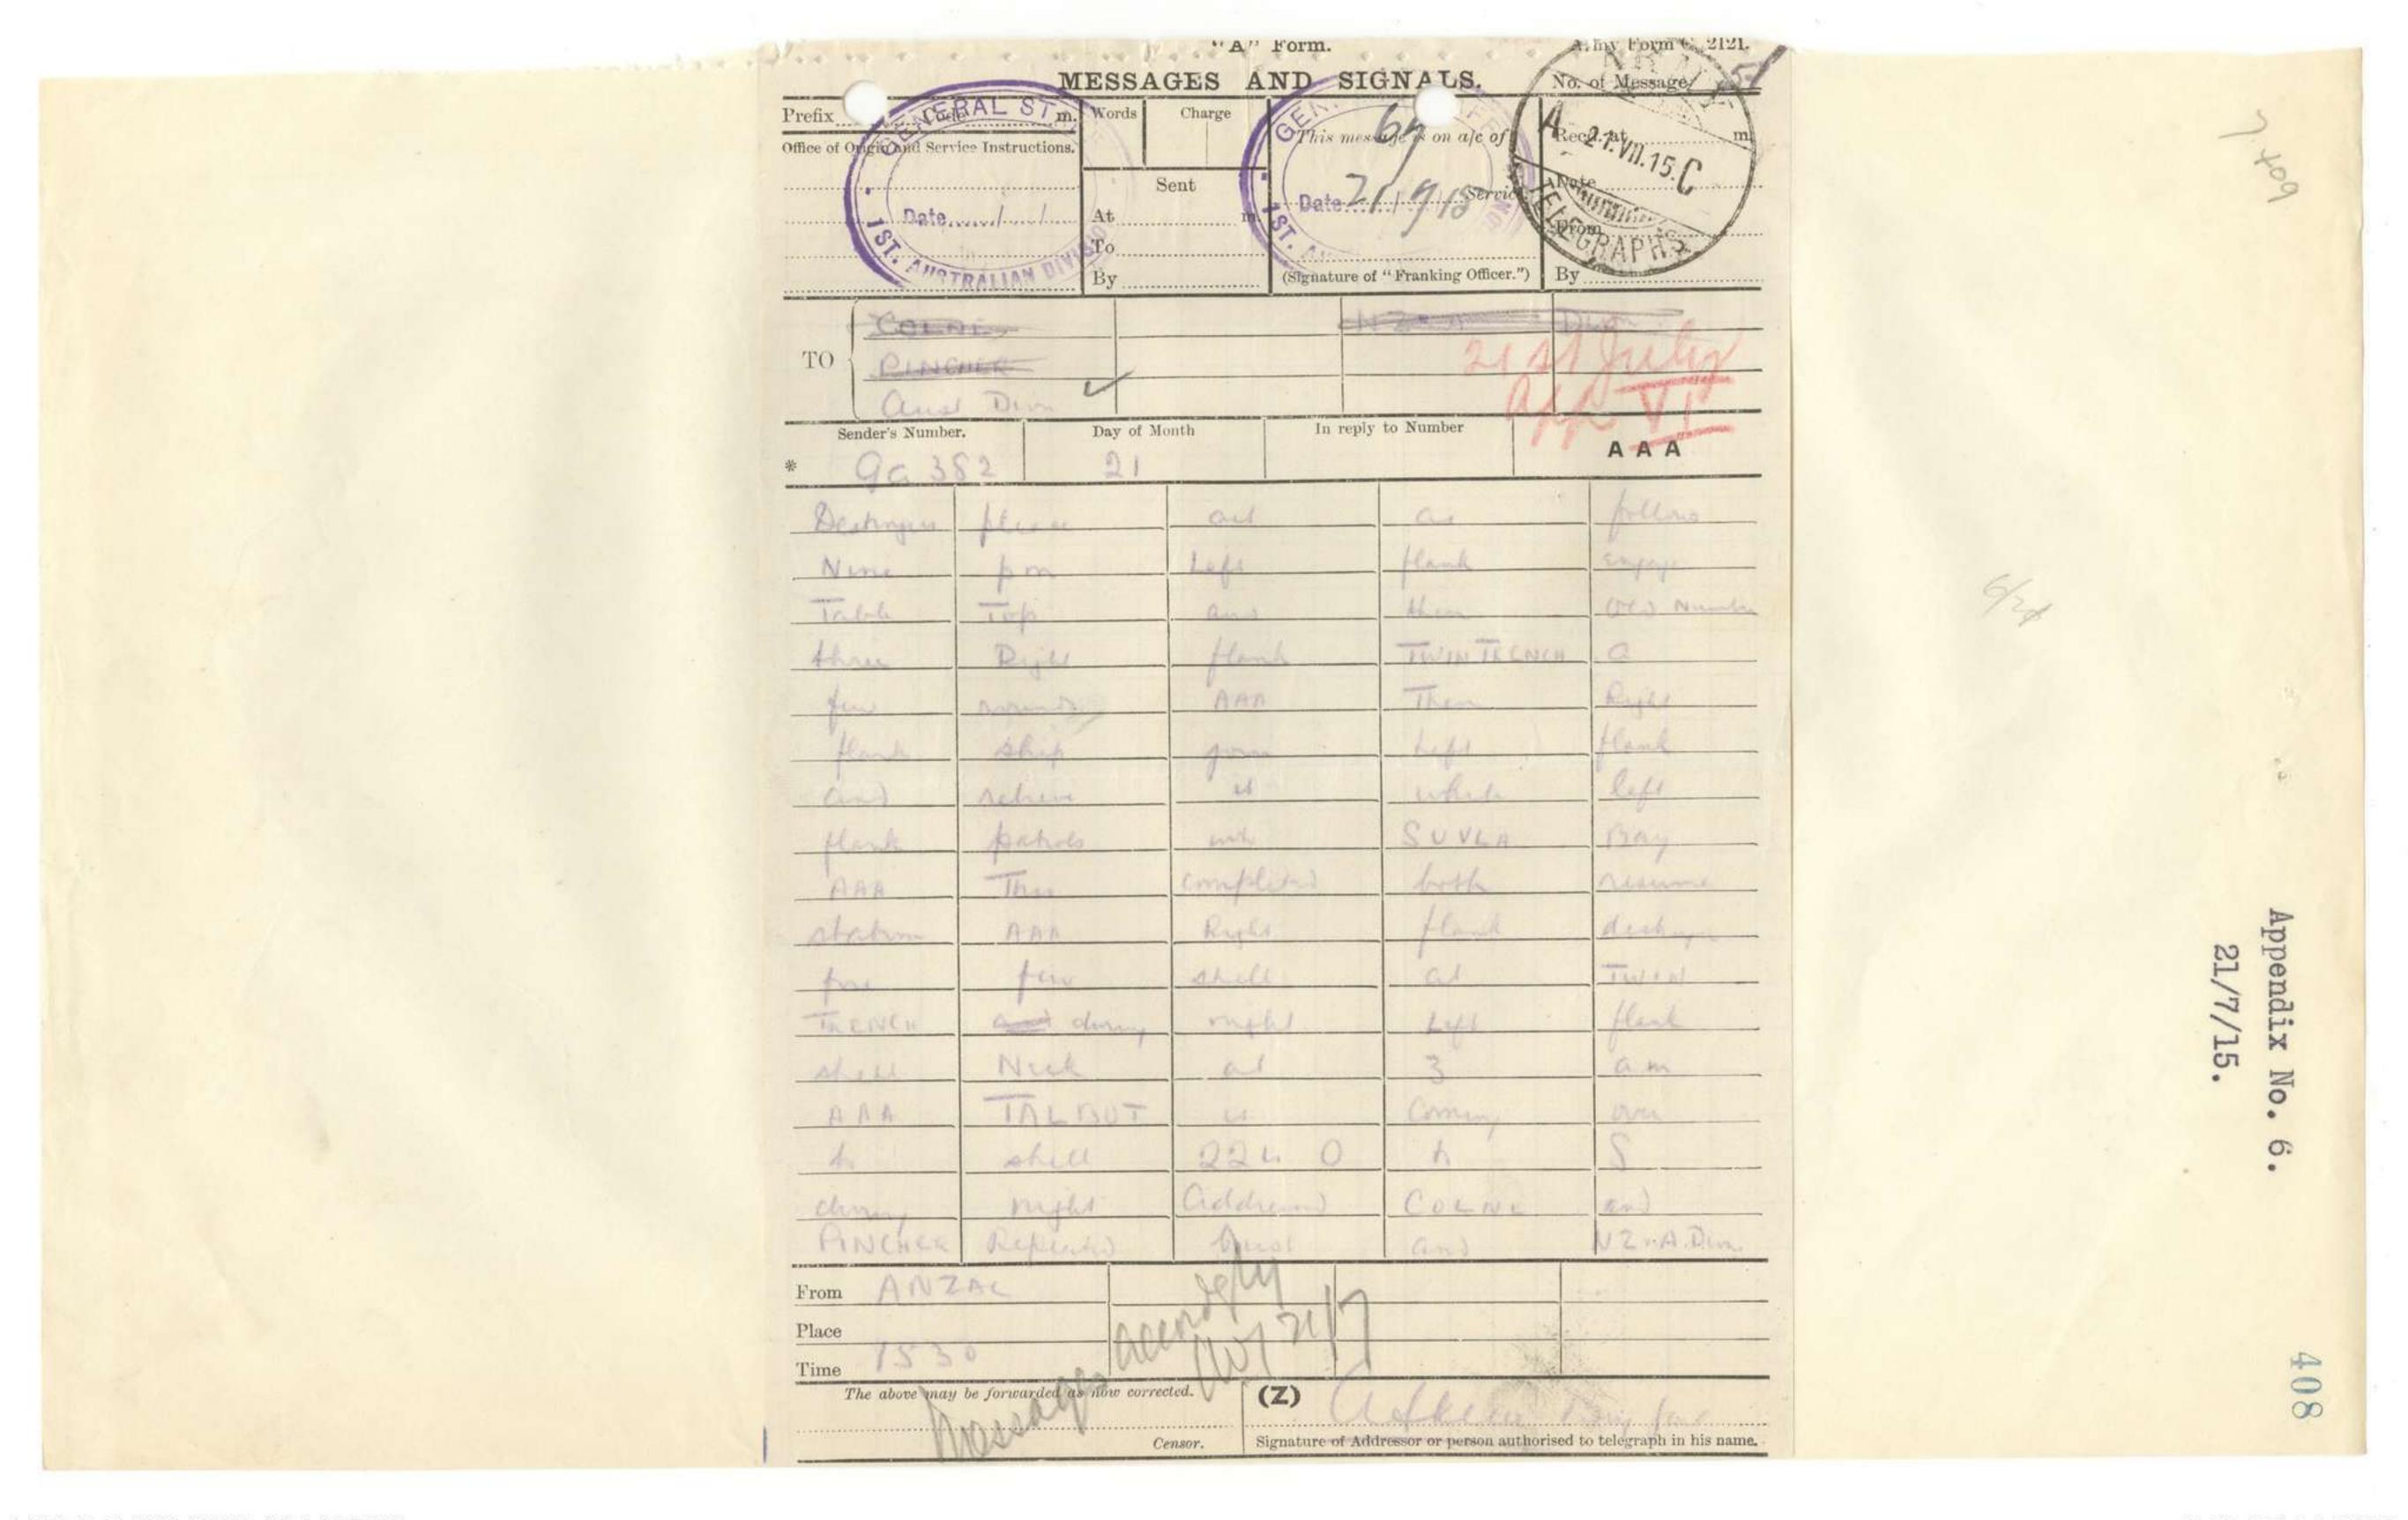

Australian and New Zealand Army Corps.

AUSTRALIAN WAR MEMORIAL

Boys,

constitution Day, which is the 25rd, by a big attack, but whether this is to be on us or at Cape Helles we do not know.

Onstitution Day for ourselves, and to give them such a lesson as they have never had in their lives before.

Remember they are an absolutely inferior army to ourselves in moral and training, and will only be driven to the attack, which will not be made with their hearts really in it.

bombardment, and it is possible that during this bombardment shells containing asphyriating gases will be fired at us. It is therefore essential that every man should carry the new helmet which has just been served out, and if there is an gas anywhere about, these helmets are at once to be worn. They may be found hot and a little uncomfortable, but remember they ensure absolute immunity from the gas, which therefore can do us no harm. If at any time you find yourself in a cloud of gas, the best thing is to stand still and keep quiet.

It is quite possible that if the attack commences at night, the enemy may precede it by quietly ejecting gas from cylinders. Here again there need be no fear if helmets are immediately worn, while we must at once see if we can locate the position of the cylinders, and knock them out either with gun fire or with bombs, or if possible maxims if they can be brought to bear upon them. Should we be able to upset a few cylinders in the enemy's trenches, they would find their dastardly use of gas recoiling entirely on their own heads.

During the bombardments trenches will be kept as empty as possible with due consideration for safety, as we want to avoid all possible lesses by shell fire. Then, when the bombardment is over, and the many are likely to attack, we will fill up our trenches with our full strength, and if our 20,000 boys here cannot pump lead into any unlimited number of Turks so as completely to wipe them out, I shall indeed be astonished.

will be be and bayonetted, and it is more than probable in several places they will be so demoralised that you will be able to follow them up and take their trenches and I hope machine guns without further opposition. A double issue of rum will probably be found in their trenches.

Record 21/7/15.

with andwood 29
