The following is the report of Lieut. J. McDONALD, 9th L.H. Regiment, in charge of special patrol from 9th L.H. despatched night 8th/9th Aug. to reconnoitre ground to N. of MASKERRAH for Enemy wire etc.

REF. MAP DAMIEH 1/40,000.

STRENGTH

1 Off. 1 Sgt. 5 O/R.

Patrol passed MASKERRAH at 2100. On reaching point W.30.a.10.5. the horses were left with 9th L.H. standing patrol and Special Patrol proceeded on bearing about 350 degrees travelling dismounted a distance of about 3500 yards. I detailed Sgt. RUNN to pace the distance.

Left point W.30.a.10.5. at 2130 and reached point about W.5.d.9.0. at 2350. This was most northerly point reached by patrol.

Bamboos with white paper attached were erected at points about W.24.a.8.5. and W.5.d.9.0. These were erected so that ranges could be taken on them early on 9/8/18.

COUNTRY

The country traversed was dry marshy, at present time being suitable for all arms.

It was thickly covered by bushes averaging three feet high.

No Wadi or impassable ground was encountered.

TRACKS

Many fresh enemy tracks were crossed. Most of these were made by horses and were running W.S.W. These in the majority of cases were probably made by enemy patrols as the halting place of two patrols was observed.

A large burnt patch about 100 yards in width was crossed about W.18.a.5.0. This was evidently burnt from East to West.

ENEMY DEFENCES.

No indications of enemy defences were seen and there was no sign of any wire.

The front of patrol sometimes covered about 300 yards.

MISCELLANEOUS

As the last bamboo was being erected movement was heard and three figures were seen about 70 yards to WEST. This indicated an enemy patrol which we managed to avoid. My patrol then left to return to horses. It was then 2355.

The patrol had returned about 200 yards when a long burst of Machine Gun fire was heard from the direction of W.4.central. After five minutes a similar burst was fired.

I came to the conclusion that the enemy must have heard our patrol was in the vicinity

On return journey the distance was again checked.

The Patrol returned rapidly to led horses which were reached at 0040.

I reported at MASKERRAH and arrived at 9th L.H. Regiment at 0200

Strength . 1 Officer, 1 Sergeant, and 5 Other ranks.
Arms carried, 2 Rifles , 6 Bayonets, 5 Revolvers.
Ammunition - S.A.A. 50 per rifle.
Revolver 12 per revolver.
Mills Grenades - 1 each all ranks.

Pace & Distance. Marched from W.30c.10.4. N on a bearing of 10 degrees for a distance of 1500 yards where a flag was placed about W.24.b.5.4, thence to edge of swamp, 2500 yards 13.a.1.6. From this point on a bearing varying from 15 & 18 degrees for a distance of a further 700 yards to WADI about X.7.c.5.8. where a second flag was planted , this was about 250 yards from enemy position.

Method of obtaining direction and distance.
Myself and one of the advance points each used compasses
Distance was paced both outwards and on return.

Country. The country is very heavily bushed, but passable for cavalry in troop columns, and half sections. It is not intersected by deep Wadis until the Wadi in X7 is reached, which has a wide bed with sloping banks, and is swampy along the Northern side of the depression, which would not carry horses.

The swamp in W.12.d and W.18.b and X13 is fair going, sandy, and horses would sink over the fetlock. There is no surface water.

Enemy Tracks. Camel tracks are very frequent, and appear to move from an easterly to a westerly direction, through Square W.24 and W.18, with a few visible in X.7.c.

Enemy Positions. There are Trenches not occupied large enough to hold 50 men in W.24.b also an unoccupied trench in X.13.c. These trenches were about 4 ft 6 in deep and well dug

The North bank of Wadi in X.7 is strongly held between 30 and 50 men were seen there .

On returning occupied post were encountered

(1) At W.24.b about a hundred yards to the west of the unoccupied trenches.

(2) At X.19a central.

Strength of these post is not known.

OBSTACLES. No wire or other obstacles were encountered.

Attitude of enemy. We were not interfered with on going out, but on return the enemy (1) at W.24.b was observed and 5 or 6 men were seen to move either to try and surround or to occupy trenches. No shots were fired , when manouevring to get away from these, No 2 post at X.19.a. fired a number of shots and sent up a flare.

After that intermittent firing took place along running East and West through X.7 central, on a front of about 2000 yards also 2 more flares were fired from ~~axis~~ along this line.

Mosquitoes. At every halt it was noticed that the mosquitoes were extremely vicious especially on the swampy area.

Note. Two bamboos (called flags in this report) were erected, bearing and distances will be taken on these this morning to verify positions.
Propaganda papers were left in foremost position gained and in the trenches at 24.B.
