HUCHENNEVILLE (Somme)			<p>JANUARY 1919.</p> <p>The Unit remained at HUCHENNEVILLE during the whole of the month.</p> <p>The evacuations during January were somewhat heavier than during December, but on the whole were small. The same remarks apply here as in regard to December, the animals were not under active conditions, and those diseases which account for the great percentage of evacuations, were either absent or else accounted for ^{BUT} very little wastage. The number of animals passing out from the Division on account of sickness constituted ordinary wear and tear.</p> <p>Although the number of evacuations for Debility were higher, yet the general condition of other animals passing through, was in no way any worse than December. The increase in cases of Debility was probably due to the fact that animals were evacuated before they were allowed to get so poor as they would under conditions of Active Service.</p> <p>A large number of Stray animals were evacuated. These were animals which Units had found near the Line, and made use of in marching out, and having no further use passed them through to the M.V.S..</p> <p><u>CLASSIFICATION OF ANIMALS EVACUATED ACCORDING TO CLASS:-</u></p> <table border="1" data-bbox="652 1189 2020 1431"> <thead> <tr> <th></th> <th><u>Riders</u></th> <th><u>L.D.</u></th> <th><u>H.D.</u></th> <th><u>Mules.</u></th> <th></th> </tr> </thead> <tbody> <tr> <td>A.I.
