ENGAGEMENT OF SEA TARGETS BY AA ARTY

1. TASKS

(a) HAA (3.7in eqpts)

(i) 419 Hy AA Tp, 423 Hy AA Tp in support of Northern Fire Comd CA btys in the anti ship def of GAGE ROADS and FREMANTLE harbour (Vide CA OI 1, paras 1 (a) and 6)

(ii) 454 Hy AA Tp in support of SOUTHERN FIRE COMD CA Btys in the anti ship def of COCKBURN SOUND Naval Base (Vide CA OI 1, paras 1 (b) and 6).

(b) LAA (40 mm BOFORS)

(i) LAA Bty eqpts (one on NORTH MOLE, two on SOUTH MOLE) in support of HARBOUR Bty (CA) in the anti ship def of GAGE ROADS and FREMANTLE Harbour against MTBs and midget subs.

(c) Priority

In both of above cases anti ship def is the secondary role of AA eqpts, primary role in 1 (a) and 1 (b) being HAA and LAA respectively.

2. TAC CONTROL

(a) HAA

(i) Under normal circumstances the responsible FC or CDFC MAINLAND will initiate request for support. If there are no hostile aircraft within radar range under Gun Defended Area conditions, or in all cases under Aircraft Fighter Zone conditions, CAAD will allot the gun sta requested to an anti ship role. FC concerned or CDFC is responsible for provision of rangefinding infm at 30 sec intervals until AAOR advises that further data is NOT required. All data must be converted to Air Defence Grid reference by FC or CDFC before despatch, and will include adjustment for 2 mins of travel to compensate for time lag.

(ii) Under circumstances when CA btys must be assumed to be out of action, and comms from AAOR to LDH, or to FCs and CDFC have broken down, HAA Tps (allotted anti ship role) will engage on their own initiative (subject to their primary Anti Aircraft Role) naval targets committing hostile acts.

(iii) Fire on naval targets will cease on direction of FCs, CDFC or LDH (Vide CA OI para 3 (d)) through AAOR. In cases as set out in sub para 2 a (ii) above, cease fire on ship targets will be at initiative of TCO of the gun sta.

(iv) Should CAAD consider that it is necessary for gun stas committed to engagement of sea targets to revert to primary role, cease fire on ship targets will be ordered by AAOR, and FCs or CDFC advised accordingly.

(v) At all times Frt Comd in his appreciation of the tac situation may give an overriding direction for a nominated HAA gun sta (or stas) to revert from primary to secondary role or vice versa

(b) LAA

(i) If hostile aircraft that may be engaged by these eqpts are NOT in the area, guns will automatically engage sea targets which are being fired on by HARBOUR Bty. Fire will cease immediately HARBOUR Bty ceases firing or on order from AAOR. Should HARBOUR Bty go out of action, Bofors will continue to engage targets committing hostile acts, and will cease fire on their own initiative.

(ii) An air sentry will be posted throughout the action. Immediately hostile aircraft that may be engaged appear Bofors will revert to primary role.

3. METHOD OF COMMITMENT

(a) 419 (H1) and 423 (H6) HAA TPS

(i) FC NORTHERN (on ROTTNEST) during daylight in good visibility or CDFC MAINLAND by night and in low visibility will make request for AA Support.

(ii) Until the efficiency of the existing comd comns are improved, requests and rangefinding infm will be submitted to LDH from where it will be relayed to AAOR. Similarly LDH will relay messages from AAOR to FC or CDFC.

(iii) Routine advice of when CDFC MAINLAND is functioning (Vide CA OI para 1 (b)) will be passed from LDH to AAOR.

(b) 454 (H10) HAA TP

(i) FC SOUTHERN (on GARDEN) at all times will be the responsible offr.

(ii) To save time lag, requests will be directed to TCO 454 HAA Tp who will comply unless instr has been received from AAOR to anticipate immediate air attack.

(iii) FC will advise AAOR of action taken, but CAAD may redirect 454 HAA Tp to revert to primary role if considered necessary and advise FC.

(iv) Should communications with AAOR fail and enemy aircraft apppoach within radar range of 454 gun sta , the TCO will carefully watch the aircraft and revert to Primary role of Hy AA, in sufficient time to engage immediately the plane or planes come within gun range, advising FC SOUTHERN accordingly.

(c) STANDARD TELEPHONE PROCEDURE

(i) Requests:-
eg Request H6 engage target cruiser type 2/1 moving South, grid ref T00

(ii) Reply H6 allotted to engage cruiser at grid ref. T00.

or H6 NOT available for anti ship role

(d) BOFORS

(i) Eqpts will be manned for CA alarms and/or when CASLs on NORTH and SOUTH MOLES are exposed operationally.

(ii) LDH will relay this infm to AAOR for despatch to the guns.

(iii) Nos 1 of guns will commit eqpts in accordance with para 2 (b).

4. METHOD OF FIRE CONTROL

(a) As per AAPI 19

(b) Observation by night will be as provided by CASLs already allotted by CA btys to the target indicated.

Note For infm of FC and CDFCs, methods of ranging which will probably be used by AA are as follows:-

(i) At night or in low visibility "GUNFIRE"

(ii) During daylight in good visibility, ranging in steps of 200^{x} with one or two guns; fire for effect with as many guns as can bear on the target.

5. AMN

HAA

3.7in gun sta nominated will each retain 50 rds HE fuze 230 on ea gun for anti ship role. Amn fuze 199 will be used if this is expended.

IAA

100 rds AP or SAP amn will be maintained on ea gun nominated for anti ship role.

5.25 BATTERY AA/CA SOUTH BEACH

For some time past considerable publicity had been given in the local press to the installation of another electricity power house for the metropolitan area.

2. Various locations have been suggested and it appears that SOUTH FREMANTLE is generally favoured as the most suitable site.

3. In view of the construction of 8 gun 5.25 AA/CA battery on the high ground east of ROBBS JETTY it is suggested that the local government be informed of military installations in the SOUTH FREMANTLE area, and that concurrence of this HQ be obtained before final selection of site and commencement of construction.

POWER HOUSE

On 13 Sep 44, I had a conference with Mr W.H. TAYLOR of WA Tramways and Electricity Supply on the question of the site of a proposed power house south of Fremantle.

2. The proposed site of the power house is between the railway and the beach from ROBBS JETTY to approx 1000 yds NORTH (Fremantle 1in to 1 mile : 745317 to 742326). SOUTH BEACH 5.25s are to be installed at 754324.

3. The power house will consist of buildings some 70 - 80 ft above sea level with chimneys to 163 ft above sea level Trunnion height of guns is 94 ft.

4. It has been advised that the most modern improvements to reduce smoke to a minimum will be incorporated in the construction of the power house. Nevertheless, smoke will be exhausted and will considerably reduce AA efficiency in the area west and north west of FREMANTLE Harbour.

5. Mr. Taylor requested information as to how far SOUTH of his proposed site we would require him to move. As a result of taking a line from the battery to SECOND HEAD on GARDEN IS, he was told that anywhere SOUTH of 747313 would NOT interfere with the guns coast role. Though he made no comment, he appeared satisfied that his two requirements - sufficiency of water and proximity to FREMANTLE - ARMADALE RAILWAY - were fulfilled.

6. He has no intention of recommending any other site to his Minister.

7. Another site for 5.25s is available some 2000 yds SOUTH of the present one and if it was occupied, the power house on the present proposed site would NOT interfere with the guns role. It however is NOT as satisfactory a site

in itself and it reduces the cover NORTH of FREMANTLE Harbour.

8. As (i) LHQ ordered the 5.25in battery to be sited at approx 743330

(ii) LHQ have approved of the present site.

(iii) The site in itself is the best in the area.

(iv) The site gives the best protection to FREMANTLE Harbour.

(v) The Allied Works Council have already started work on the site with one excavation full depth and another half done.

I recommend that the guns be installed at the accepted site and the WA Government informed that their power house cannot be erected in the triangle SOUTH BEACH Station (740336) - 760323 - 747313, nor at any other site where the top of their chimneys would be at a greater angle of elevation from the gun site than 3°.

DIRECTIVE NO 9

TRAINING OCT 44

1. COAST ARTILLERY

(a) In view of the reduction of trained personnel in batteries as a result of reorganisation training will be instituted whereby all male personnel will be given maximum practice in laying on passing vessels, applying corrections and becoming conversant with the drill procedure. Even if personnel are unlikely to be able to qualify as layers the above will be instituted so that they will be of practical value (even if not of technical and theoretical value) as layers.

(b) Attached hereto as Appendix "A" is a copy of BCs ranging form for close defence. This form will be adopted forthwith and copies will be distributed to batteries from this HQ. The main difference from the original BCs form is that ticks will be used to signify shot and corrections against the group on which they are given. Batteries will requisition for further supplies of this form from time to time as supplies are required.

(c) The review of the tactical shoots for month of September have revealed the following:-

(i) Fire discipline in many cases proved to be faulty. BCs will watch this matter carefully and correct in battery drill and gun drill. The CAD pamphlet appropriate to the equipment conferned at respective batteries will be carefully studied with regard to the above. The incorrect usage of "Stop" "Go on" and other orders that do or do not cancel stop was a noticeable error.

(ii) BCs in many cases failed to give their observations to BCAs and in consequence it was not possible for BCAs to keep a correct record of information and give assistance and advice to the BC when requested. In some instance where rounds fell out for line but gave an indication for range, BCs gave only the line or the range observation. Complete observations must be given.

(iii) Tactical shoots seawards for October are set out as Appendix "B".
